Criteria for Performance Excellence
A Public-Private Partnership

Building active partnerships in the private sector—and between the private sector and all levels of government—is fundamental to the success of the Baldrige National Quality Program in improving national competitiveness. Private-sector support for the Program in the form of funds, volunteer efforts, and participation in information transfer continues to grow.

To ensure the continued growth and success of these partnerships, each of the following organizations plays an important role.

Foundation for the Malcolm Baldrige National Quality Award

The Foundation for the Malcolm Baldrige National Quality Award was created to foster the success of the Program. The Foundation’s main objective is to raise funds to permanently endow the Award Program.

Prominent leaders from U.S. organizations serve as Foundation Trustees to ensure that the Foundation’s objectives are accomplished. A broad cross section of organizations throughout the United States provides financial support to the Foundation.

National Institute of Standards and Technology

The U.S. Department of Commerce is responsible for the Baldrige National Quality Program and the Award. The National Institute of Standards and Technology (NIST), an agency of the Department’s Technology Administration, manages the Baldrige Program. NIST promotes U.S. economic growth by working with industry to develop and deliver the high-quality measurement tools, data, and services necessary for the nation’s technology infrastructure. NIST also participates in a unique, government–private-sector partnership to accelerate the development of high-risk technologies that promise significant commercial and economic benefits. Through a network of technology extension centers and field offices serving all 50 states and Puerto Rico, NIST helps small- and medium-sized businesses access the information and expertise they need to improve their competitiveness in the global marketplace.

American Society for Quality

The American Society for Quality (ASQ) assists in administering the Award Program under contract to NIST. ASQ is dedicated to the ongoing development, advancement, and promotion of quality concepts, principles, and techniques. ASQ strives to be the world’s recognized champion and leading authority on all issues related to quality. ASQ recognizes that continuous quality improvement will help the favorable positioning of American goods and services in the international marketplace.

Board of Overseers

The Board of Overseers advises the Department of Commerce on the Baldrige National Quality Program. The board is appointed by the Secretary of Commerce and consists of distinguished leaders from all sectors of the U.S. economy.

The Board of Overseers evaluates all aspects of the Program, including the adequacy of the Criteria and processes for determining Award recipients. An important part of the board’s responsibility is to assess how well the Program is serving the national interest. Accordingly, the board makes recommendations to the Secretary of Commerce and to the Director of NIST regarding changes and improvements in the Program.

Board of Examiners

The Board of Examiners evaluates Award applications and prepares feedback reports. The Panel of Judges, part of the Board of Examiners, makes Award recommendations to the Director of NIST. The board consists of leading U.S. business, education, and health care experts. NIST selects members through a competitive application process. For 2002, the board consists of about 400 members. Of these, 9 (who are appointed by the Secretary of Commerce) serve as Judges, and approximately 60 serve as Senior Examiners. The remainder serve as Examiners. All members of the board must take part in an Examiner preparation course.

In addition to reviewing applications, board members play a significant role in sharing information about the Baldrige Program. Their membership in hundreds of professional, trade, community, and state organizations helps them disseminate this information.

Award Recipients

Award recipients are required to share information on their successful performance and quality strategies with other U.S. organizations. However, recipients are not required to share proprietary information, even if such information was part of their Award application. The principal mechanism for sharing information is the annual Quest for Excellence Conference.

Award recipients in the 14 years of the Award have been extremely generous in their commitment to improving U.S. competitiveness and furthering the U.S. pursuit of performance excellence. They have shared information with hundreds of thousands of companies, education institutions, health care organizations, government agencies, and others. This sharing far exceeds expectations and Program requirements. Award recipients’ efforts have encouraged many other organizations in all sectors of the U.S. economy to undertake their own performance improvement efforts.
To: U.S. Business Community

Baldrige National Quality Program

Subject: The Baldrige Challenge

For 14 years, the Baldrige Criteria have been used by thousands of U.S. organizations to stay abreast of ever-increasing competition and to improve performance. In today’s business environment, the Criteria help organizations respond to the rapid pace of innovation, to a focus on core competencies, and to the challenges of outsourcing and supply chain management. Whether your business is small or large, is involved in service or manufacturing, or has one office or multiple sites across the globe, the Criteria provide a valuable framework that can help you plan in an uncertain environment. Use the Criteria to assess performance on a wide range of key business indicators: customer, product and service, financial, human resource, and operational. The Criteria can help you align resources; improve communication, productivity, and effectiveness; and achieve strategic goals.

How do you begin that first Baldrige assessment? Take a few minutes and scan the questions in the Organizational Profile on pages 10–11. Your first Baldrige assessment might be as simple as a discussion of the answers to these questions. For additional guidance, refer to our free booklet, *Getting Started with the Baldrige National Quality Program Criteria for Performance Excellence: A Guide to Self-Assessment and Action.*

If you are ready to take the full Baldrige challenge, you can perform a self-assessment as an internal improvement effort, or you can use your self-assessment as the basis for an Award application. Assessment against all seven Categories of the Criteria (see pages 12–28) allows you to identify strengths and to target opportunities for improving your processes and results. In the most competitive business sectors, organizations with world-class business results are able to achieve a score above 600 on the 1,000-point Baldrige scale. Organizations early in their performance improvement journey frequently score around 200 points.

Do you believe you have been making progress but want to accelerate or better focus your efforts? Try using our simple questionnaire, *Are We Making Progress?* This employee questionnaire, to be released early in 2002, addresses topics important to your employees and is organized according to the seven Baldrige Criteria Categories. It will help you check your progress toward meeting your organizational goals and will improve communication among your employees and your leadership team.

Even if you don’t expect to win the Baldrige Award, submitting an Award application has valuable benefits. Every applicant receives a detailed feedback report based on an independent, external assessment conducted by a panel of specially trained and recognized experts.

The Criteria are in your hands... so is an incredible opportunity. Why not take the challenge? Regardless of your organization’s past success, when you turn these pages, you turn the corner toward performance excellence. If you want more information, contact me at nqp@nist.gov.

Quest for Excellence XIV Conference

Each year, Quest for Excellence, the official conference of the Malcolm Baldrige National Quality Award, provides a forum for Baldrige Award recipients to share their exceptional performance practices with worldwide leaders in business, education, health care, and not-for-profit organizations. Quest for Excellence XIV will showcase the year 2001 Award recipients.

For the last 13 years, executives, managers, and quality leaders have come to this conference to learn how these role model organizations have achieved performance excellence. CEOs and other leaders from the Award recipients give presentations covering all seven Categories of the Baldrige Criteria, their journey to performance excellence, and their lessons learned. At this three-day conference designed to maximize learning and networking opportunities, attendees will be able to interact with Award recipients.

The Quest for Excellence XIV Conference will be held April 7–10, 2002, at the Marriott Wardman Park Hotel in Washington, DC. For further information, contact the Baldrige Program by mail: Baldrige National Quality Program, NIST, Administration Building, Room A600, 100 Bureau Drive, Stop 1020, Gaithersburg, MD 20899-1020; telephone: (301) 975-2036; fax: (301) 948-3716; or E-mail: nqp@nist.gov. For a general overview of the Baldrige National Quality Program, visit its Web site: www.quality.nist.gov.

The Malcolm Baldrige National Quality Award

The Award crystal, composed of two solid crystal prismatic forms, stands 14 inches tall. The crystal is held in a base of black anodized aluminum with the Award recipient’s name engraved on the base. A 22-karat gold-plated medallion is captured in the front section of the crystal. The medal bears the inscriptions “Malcolm Baldrige National Quality Award” and “The Quest for Excellence” on one side and the Presidential Seal on the other.

The President of the United States traditionally presents the Awards at a special ceremony in Washington, DC.

Education and health care organizations should use the appropriate Criteria booklets for their respective sectors. See page 56 for ordering information.

If you plan to apply for the Award in 2002, you also will need the booklet entitled *Baldrige Award Application Forms*. Ordering instructions are given on page 56.

Eligibility Forms due—April 16, 2002      Award Applications due—May 30, 2002

We are easy to reach. Our Web address is www.quality.nist.gov.
Criteria Purposes

The Criteria are the basis for organizational self-assessments, for making Awards, and for giving feedback to applicants. In addition, the Criteria have three important roles in strengthening U.S. competitiveness:

- to help improve organizational performance practices, capabilities, and results
- to facilitate communication and sharing of best practices information among U.S. organizations of all types
- to serve as a working tool for understanding and managing performance and for guiding planning and opportunities for learning

Criteria for Performance Excellence Goals

The Criteria are designed to help organizations use an integrated approach to organizational performance management that results in:

- delivery of ever-improving value to customers, contributing to marketplace success
- improvement of overall organizational effectiveness and capabilities
- organizational and personal learning

Core Values and Concepts

The Criteria are built upon the following set of interrelated Core Values and Concepts:

- visionary leadership
- customer-driven excellence
- organizational and personal learning
- valuing employees and partners
- agility
- focus on the future
- managing for innovation
- management by fact
- public responsibility and citizenship
- focus on results and creating value
- systems perspective

These values and concepts, described below, are embedded beliefs and behaviors found in high-performing organizations. They are the foundation for integrating key business requirements within a results-oriented framework that creates a basis for action and feedback.

Visionary Leadership

An organization’s senior leaders should set directions and create a customer focus, clear and visible values, and high expectations. The directions, values, and expectations should balance the needs of all your stakeholders. Your leaders should ensure the creation of strategies, systems, and methods for achieving excellence, stimulating innovation, and building knowledge and capabilities. The values and strategies should help guide all activities and decisions of your organization. Senior leaders should inspire and motivate your entire workforce and should encourage all employees to contribute, to develop and learn, to be innovative, and to be creative.

Senior leaders should serve as role models through their ethical behavior and their personal involvement in planning, communications, coaching, development of future leaders, review of organizational performance, and employee recognition. As role models, they can reinforce values and expectations while building leadership, commitment, and initiative throughout your organization.

Customer-Driven Excellence

Quality and performance are judged by an organization’s customers. Thus, your organization must take into account all product and service features and characteristics and all modes of customer access that contribute value to your customers and lead to customer acquisition, satisfaction, preference, referral, and loyalty and to business expansion. Customer-driven excellence has both current and future components: understanding today’s customer desires and anticipating future customer desires and marketplace offerings.

Value and satisfaction may be influenced by many factors throughout your customers’ overall purchase, ownership, and service experiences. These factors include your organization’s relationship with customers that helps build trust, confidence, and loyalty.

Customer-driven excellence means much more than reducing defects and errors, merely meeting specifications, or reducing complaints. Nevertheless, reducing defects and errors and eliminating causes of dissatisfaction contribute to your customers’ view of your organization and thus also are important parts of customer-driven excellence. In addition, your organization’s success in recovering from defects and mistakes (“making things right for your customer”) is crucial to retaining customers and building customer relationships.

Customer-driven organizations address not only the product and service characteristics that meet basic customer requirements but also those features and characteristics that differentiate products and services from competing offerings. Such differentiation may be based upon new or modified offerings, combinations of product and service offerings, customization of offerings, multiple access mechanisms, rapid response, or special relationships.

Customer-driven excellence is thus a strategic concept. It is directed toward customer retention, market share gain, and growth. It demands constant sensitivity to changing and emerging customer and market requirements and to the factors
that drive customer satisfaction and retention. It demands anticipating changes in the marketplace. Therefore, customer-driven excellence demands awareness of developments in technology and competitors’ offerings, as well as rapid and flexible response to customer and market requirements.

**Organizational and Personal Learning**

Achieving the highest levels of business performance requires a well-executed approach to organizational and personal learning. Organizational learning includes both continuous improvement of existing approaches and adaptation to change, leading to new goals and/or approaches. Learning needs to be embedded in the way your organization operates. This means that learning (1) is a regular part of daily work; (2) is practiced at personal, work unit, and organizational levels; (3) results in solving problems at their source (“root cause”); (4) is focused on sharing knowledge throughout your organization; and (5) is driven by opportunities to effect significant change and to do better. Sources for learning include employees’ ideas, research and development (R&D), customers’ input, best practice sharing, and benchmarking.

Organizational learning can result in (1) enhancing value to customers through new and improved products and services; (2) developing new business opportunities; (3) reducing errors, defects, waste, and related costs; (4) improving responsiveness and cycle time performance; (5) increasing productivity and effectiveness in the use of all resources throughout your organization; and (6) enhancing your organization’s performance in fulfilling its public responsibilities and service as a good citizen.

Employees’ success depends increasingly on having opportunities for personal learning and practicing new skills. Organizations invest in employees’ personal learning through education, training, and other opportunities for continuing growth. Such opportunities might include job rotation and increased pay for demonstrated knowledge and skills. On-the-job training offers a cost-effective way to train and to better link training to your organizational needs and priorities. Education and training programs may benefit from advanced technologies, such as computer- and Internet-based learning and satellite broadcasts.

Personal learning can result in (1) more satisfied and versatile employees who stay with the organization, (2) organizational cross-functional learning, and (3) an improved environment for innovation.

Thus, learning is directed not only toward better products and services but also toward being more responsive, adaptive, and efficient—giving your organization marketplace sustainability and performance advantages.

**Valuing Employees and Partners**

An organization’s success depends increasingly on the knowledge, skills, creativity, and motivation of its employees and partners.

Valuing employees means committing to their satisfaction, development, and well-being. Increasingly, this involves more flexible, high-performance work practices tailored to employees with diverse workplace and home life needs. Major challenges in the area of valuing employees include (1) demonstrating your leaders’ commitment to your employees’ success, (2) recognition that goes beyond the regular compensation system, (3) development and progression within your organization, (4) sharing your organization’s knowledge so your employees can better serve your customers and contribute to achieving your strategic objectives, and (5) creating an environment that encourages risk taking.

Organizations need to build internal and external partnerships to better accomplish overall goals. Internal partnerships might include labor-management cooperation, such as agreements with unions. Partnerships with employees might entail employee development, cross-training, or new work organizations, such as high-performance work teams. Internal partnerships also might involve creating network relationships among your work units to improve flexibility, responsiveness, and knowledge sharing.

External partnerships might be with customers, suppliers, and education organizations. Strategic partnerships or alliances are increasingly important kinds of external partnerships. Such partnerships might offer entry into new markets or a basis for new products or services. Also, partnerships might permit the blending of your organization’s core competencies or leadership capabilities with the complementary strengths and capabilities of partners.

Successful internal and external partnerships develop longer-term objectives, thereby creating a basis for mutual investments and respect. Partners should address the key requirements for success, means for regular communication, approaches to evaluating progress, and means for adapting to changing conditions. In some cases, joint education and training could offer a cost-effective method for employee development.

**Agility**

Success in globally competitive markets demands agility—a capacity for rapid change and flexibility. All aspects of e-commerce require and enable more rapid, flexible, and customized responses. Businesses face ever-shorter cycles for the introduction of new/improved products and services, as well as for faster and more flexible response to customers. Major improvements in response time often require simplification of work units and processes and/or the ability for rapid changeover from one process to another. Cross-trained and empowered employees are vital assets in such a demanding environment.

A major success factor in meeting competitive challenges is the design-to-introduction (product/service initiation) cycle time. To meet the demands of rapidly changing global
markets, organizations need to carry out stage-to-stage integration (such as concurrent engineering) of activities from research/concept to commercialization.

All aspects of time performance now are more critical, and cycle time has become a key process measure. Other important benefits can be derived from this focus on time; time improvements often drive simultaneous improvements in organization, quality, cost, and productivity.

**Focus on the Future**
In today’s competitive environment, a focus on the future requires understanding the short- and longer-term factors that affect your business and marketplace. Pursuit of sustainable growth and market leadership requires a strong future orientation and a willingness to make long-term commitments to key stakeholders—your customers, employees, suppliers and partners, stakeholders, the public, and your community. Your organization’s planning should anticipate many factors, such as customers’ expectations, new business and partnering opportunities, the increasingly global marketplace, technological developments, the evolving e-commerce environment, new customer and market segments, evolving regulatory requirements, community/societal expectations, and strategic moves by competitors. Strategic objectives and resource allocations need to accommodate these influences. A focus on the future includes developing employees and suppliers, creating opportunities for innovation, and anticipating public responsibilities.

**Managing for Innovation**
Innovation means making meaningful change to improve an organization’s products, services, and processes and to create new value for the organization’s stakeholders. Innovation should lead your organization to new dimensions of performance. Innovation is no longer strictly the purview of research and development departments; innovation is important for all aspects of your business and all processes. Organizations should be led and managed so that innovation becomes part of the culture and is integrated into daily work.

**Management by Fact**
Organizations depend on the measurement and analysis of performance. Such measurements should derive from business needs and strategy, and they should provide critical data and information about key processes, outputs, and results. Many types of data and information are needed for performance management. Performance measurement should include customer, product, and service performance; comparisons of operational, market, and competitive performance; and supplier, employee, and cost and financial performance.

Analysis refers to extracting larger meaning from data and information to support evaluation, decision making, and operational improvement. Analysis entails using data to determine trends, projections, and cause and effect that might not otherwise be evident. Analysis supports a variety of purposes, such as planning, reviewing your overall performance, improving operations, change management, and comparing your performance with competitors’ or with “best practices” benchmarks.

A major consideration in performance improvement and change management involves the selection and use of performance measures or indicators. The measures or indicators you select should best represent the factors that lead to improved customer, operational, and financial performance. A comprehensive set of measures or indicators tied to customer and/or organizational performance requirements represents a clear basis for aligning all activities with your organization’s goals. Through the analysis of data from your tracking processes, your measures or indicators themselves may be evaluated and changed to better support your goals.

**Public Responsibility and Citizenship**
An organization’s leaders should stress its responsibilities to the public and the need to practice good citizenship. These responsibilities refer to basic expectations of your organization related to business ethics and protection of public health, safety, and the environment. Protection of health, safety, and the environment includes your organization’s operations, as well as the life cycles of your products and services. Also, organizations should emphasize resource conservation and waste reduction at the source. Planning should anticipate adverse impacts from production, distribution, transportation, use, and disposal of your products. Effective planning should prevent problems, provide for a forthright response if problems occur, and make available information and support needed to maintain public awareness, safety, and confidence.

For many organizations, the product design stage is critical from the point of view of public responsibility. Design decisions impact your production processes and often the content of municipal and industrial wastes. Effective design strategies should anticipate growing environmental concerns and responsibilities.

Organizations should not only meet all local, state, and federal laws and regulatory requirements, but they should treat these and related requirements as opportunities for improvement “beyond mere compliance.” This requires the use of appropriate measures in managing public responsibility.

Practicing good citizenship refers to leadership and support—within the limits of an organization’s resources—of publicly important purposes. Such purposes might include improving education and health care in your community, environmental excellence, resource conservation, community service, improving industry and business practices, and sharing nonproprietary information. Leadership as a corporate citizen also entails influencing other
organizations, private and public, to partner for these purposes. For example, your organization might lead or participate in efforts to help define the obligations of your industry to its communities.

Focus on Results and Creating Value

An organization’s performance measurements need to focus on key results. Results should be used to create and balance value for your key stakeholders—customers, employees, stockholders, suppliers and partners, the public, and the community. By creating value for your key stakeholders, your organization builds loyalty and contributes to growing the economy. To meet the sometimes conflicting and changing aims that balancing value implies, organizational strategy should explicitly include key stakeholder requirements. This will help ensure that actions and plans meet differing stakeholder needs and avoid adverse impacts on any stakeholders. The use of a balanced composite of leading and lagging performance measures offers an effective means to communicate short- and longer-term priorities, monitor actual performance, and provide a clear basis for improving results.

Systems Perspective

The Baldrige Criteria provide a systems perspective for managing your organization to achieve performance excellence. The Core Values and the seven Baldrige Categories form the building blocks and the integrating mechanism for the system. However, successful management of overall performance requires organization-specific synthesis and alignment. Synthesis means looking at your organization as a whole and builds upon key business requirements, including your strategic objectives and action plans. Alignment means using the key linkages among requirements given in the Baldrige Categories, including the key measures/indicators.

Alignment is depicted in the Baldrige framework on page 5. Alignment includes your senior leaders’ focus on strategic directions and on your customers. It means that your senior leaders monitor, respond to, and manage performance based on your business results. Alignment includes using your measures/indicators to link your key strategies with your key processes and align your resources to improve overall performance and satisfy customers.

Thus, a systems perspective means managing your whole organization, as well as its components, to achieve success.

Criteria for Performance Excellence Framework

The Core Values and Concepts are embodied in seven Categories, as follows:

1. Leadership
2. Strategic Planning
3. Customer and Market Focus
4. Information and Analysis
5. Human Resource Focus
6. Process Management
7. Business Results

The figure on page 5 provides the framework connecting and integrating the Categories.

From top to bottom, the framework has the following basic elements.

Organizational Profile

Your Organizational Profile (top of figure) sets the context for the way your organization operates. Your environment, key working relationships, and strategic challenges serve as an overarching guide for your organizational performance management system.

System

The system is composed of the six Baldrige Categories in the center of the figure that define the organization, its operations, and its results.
Leadership (Category 1), Strategic Planning (Category 2), and Customer and Market Focus (Category 3) represent the leadership triad. These Categories are placed together to emphasize the importance of a leadership focus on strategy and customers. Senior leaders set your organizational direction and seek future opportunities for your organization.

Human Resource Focus (Category 5), Process Management (Category 6), and Business Results (Category 7) represent the results triad. Your organization’s employees and its key processes accomplish the work of the organization that yields your business results.

All actions point toward Business Results—a composite of customer, financial, and operational performance results, including human resource results and public responsibility.

The horizontal arrow in the center of the framework links the leadership triad to the results triad, a linkage critical to organizational success. Furthermore, the arrow indicates the central relationship between Leadership (Category 1) and Business Results (Category 7). The two-headed arrow indicates the importance of feedback in an effective performance management system.

Information and Analysis

Information and Analysis (Category 4) are critical to the effective management of your organization and to a fact-based system for improving performance and competitiveness. Information and analysis serve as a foundation for the performance management system.

Criteria Structure

The seven Criteria Categories shown in the figure are subdivided into Items and Areas to Address.

Items

There are 18 Items, each focusing on a major requirement. Item titles and point values are given on page 9. The Item format is shown on page 50.

Areas to Address

Items consist of one or more Areas to Address (Areas). Organizations should address their responses to the specific requirements of these Areas.

Baldrige Criteria for Performance Excellence Framework: A Systems Perspective

Organizational Profile: Environment, Relationships, and Challenges

1. Leadership
2. Strategic Planning
3. Customer and Market Focus
5. Human Resource Focus
6. Process Management
7. Business Results
4. Information and Analysis
KEY CHARACTERISTICS OF THE CRITERIA

1. The Criteria focus on business results.
The Criteria focus on the key areas of business performance, given below.

**Business performance areas:**
1. customer-focused results
2. financial and market results
3. human resource results
4. organizational effectiveness results, including operational and supplier performance

The use of this composite of indicators is intended to ensure that strategies are balanced—that they do not inappropriately trade off among important stakeholders, objectives, or short- and longer-term goals.

2. The Criteria are nonprescriptive and adaptable.
The Criteria are made up of results-oriented requirements. However, the Criteria do not prescribe
- that your organization should or should not have departments for quality, planning, or other functions;
- how your organization should be structured; or
- that different units in your organization should be managed in the same way.

These factors differ among organizations, and they are likely to change as needs and strategies evolve.

The Criteria are nonprescriptive for the following reasons:

1. The focus is on results, not on procedures, tools, or organizational structure. Organizations are encouraged to develop and demonstrate creative, adaptive, and flexible approaches for meeting basic requirements. Nonprescriptive requirements are intended to foster incremental and major (“breakthrough”) improvements, as well as basic change.

2. Selection of tools, techniques, systems, and organizational structure usually depends on factors such as business type and size, your organization’s stage of development, and employee capabilities and responsibilities.

3. Focus on common requirements, rather than on common procedures, fosters better understanding, communication, sharing, and alignment, while supporting innovation and diversity in approaches.

3. The Criteria support a systems perspective to maintaining organization-wide goal alignment.
The systems perspective to goal alignment is embedded in the integrated structure of the Core Values and Concepts, the Organizational Profile, the Criteria, and the results-oriented, cause-effect linkages among the Criteria Items.

Alignment in the Criteria is built around connecting and reinforcing measures derived from your organization’s processes and strategy. These measures tie directly to customer value and to overall performance. The use of measures thus channels different activities in consistent directions with less need for detailed procedures, centralized decision making, or process management. Measures thereby serve both as a communications tool and a basis for deploying consistent overall performance requirements. Such alignment ensures consistency of purpose while also supporting agility, innovation, and decentralized decision making.

A systems perspective to goal alignment, particularly when strategy and goals change over time, requires dynamic linkages among Criteria Items. In the Criteria, action-oriented cycles of learning take place via feedback between processes and results.

The learning cycles have four, clearly defined stages:
1. planning, including design of processes, selection of measures, and deployment of requirements
2. execution of plans
3. assessment of progress, taking into account internal and external results
4. revision of plans based upon assessment findings, learning, new inputs, and new requirements

4. The Criteria support goal-based diagnosis.
The Criteria and the Scoring Guidelines make up a two-part diagnostic (assessment) system. The Criteria are a set of 18 performance-oriented requirements. The Scoring Guidelines spell out the assessment dimensions—Approach, Deployment, and Results—and the key factors used to assess each dimension. An assessment thus provides a profile of strengths and opportunities for improvement relative to the 18 basic requirements. In this way, assessment leads to actions that contribute to performance improvement in all areas, as described in the shaded box above. This diagnostic assessment is a useful management tool that goes beyond most performance reviews and is applicable to a wide range of strategies and management systems.
The Criteria for Performance Excellence have evolved significantly over time to help businesses address a dynamic marketplace, focus on strategy-driven performance, and manage for results that balance the needs of all stakeholders. The Criteria have continually progressed toward a systems perspective of overall organizational performance management.

Each year, the decision whether to revise the Criteria must balance two contrasting considerations. On one hand, there is a need to maintain Criteria that are at the leading edge of validated management practice to help users address the increasingly complex challenges they face; on the other hand, there is a desire to stabilize the Criteria to allow users to have continuity in their use of the Criteria. Recognizing the significant challenges associated with the changes in Categories 4 (Information and Analysis) and 6 (Process Management) made in the 2001 Criteria and the challenging systems perspective provided by linkage to the new Organizational Profile, the decision was made to make no revisions to the Criteria for 2002. In addition, no revisions were made to the Item Notes or Category and Item Descriptions.

The most significant changes in the Criteria book for 2002 are summarized as follows:

- The Glossary of Key Terms has been almost doubled in size.
- A new diagram has been added to describe the steps toward a mature process approach.

Minor wording improvements have been made in other sections of the Criteria book, with the sections specifically mentioned above excluded from any changes.

**Glossary of Key Terms**

In total, 19 new words have been added to the glossary. Several of these words often are used in groupings:

- basic requirements, overall requirements, multiple requirements
- purpose, vision, mission, values
- goals, performance projections, benchmarks (previously defined)
- levels, trends
- alignment (previously defined), integration

The glossary definitions should help clarify the meaning of these terms and their relationship to the other terms within these groupings.

**Are We Making Progress?**

If you have been using the Baldrige Criteria in your organization and want to evaluate how much progress has been made, consider requesting our recently developed employee questionnaire, *Are We Making Progress?* This short questionnaire is organized according to the seven Baldrige Criteria Categories. You can use it with your senior leadership team, with a select subset of your employees, or with all employees. The responses you receive could help you improve your communications and help focus your improvement efforts.

**TOTAL POINTS** 1000

**Note:** The Scoring System used with the Criteria Items in a Baldrige assessment can be found on pages 47–48.
The *Organizational Profile* is a snapshot of your organization, the key influences on how you operate, and the key challenges you face.

### P.1 Organizational Description

Describe your organization’s business environment and your key relationships with customers, suppliers, and other partners.

Within your response, include answers to the following questions:

**a. Organizational Environment**

1. What are your organization’s main products and/or services? Include a description of how they are delivered to customers.

2. What is your organizational context/culture? Include your purpose, vision, mission, and values, as appropriate.

3. What is your employee profile? Include educational levels, workforce and job diversity, bargaining units, use of contract employees, and special safety requirements, as appropriate.

4. What are your major technologies, equipment, and facilities?

5. What is the regulatory environment under which your organization operates? Include occupational health and safety regulations; accreditation requirements; and environmental, financial, and product regulations.

**b. Organizational Relationships**

1. What are your key customer groups and/or market segments? What are their key requirements for your products and services? Include how these requirements differ among customer groups and/or market segments, as appropriate.

2. What are your most important types of suppliers and dealers and your most important supply chain requirements? What are your key supplier and customer partnering relationships and communication mechanisms?

### Notes:

**N1.** Customer group and market segment requirements (P.1b[1]) might include on-time delivery, low defect levels, price reductions, electronic communication, and after-sales service.

**N2.** Communication mechanisms (P.1b[2]) should be two-way and might be in person, electronic, by telephone, and/or written. For many organizations, these mechanisms might be changing.

Item notes serve three purposes: (1) to clarify terms or requirements presented in Items, (2) to give instructions on responding to the Criteria Item requirements, and (3) to indicate key linkages to other Items. In all cases, the intent is to help you respond to the Item requirements.

For definitions of the following **key terms**, see pages 30–33: how, mission, purpose, values, and vision.
P.2 Organizational Challenges

Describe your organization's competitive environment, your key strategic challenges, and your system for performance improvement.

Within your response, include answers to the following questions:

a. **Competitive Environment**
   (1) What is your competitive position? Include your relative size and growth in your industry and the numbers and types of your competitors.
   (2) What are the principal factors that determine your success relative to your competitors? Include any changes taking place that affect your competitive situation.

b. **Strategic Challenges**
   What are your key strategic challenges? Include operational, human resource, business, and global challenges, as appropriate.

c. **Performance Improvement System**
   How do you maintain an organizational focus on performance improvement? Include your approach to systematic evaluation and improvement of key processes and to fostering organizational learning and knowledge sharing.

---

**Notes:**

N1. Factors (P.2a[2]) might include differentiators such as price leadership, design services, e-services, geographic proximity, and warranty and product options.

N2. Challenges (P.2b) might include electronic communication with businesses and end-use consumers, reduced product introduction cycle times, mergers and acquisitions, global marketing and competition, customer retention, staff retention, and value chain integration.

N3. Performance improvement (P.2c) is an assessment dimension used in the Scoring System to evaluate the maturity of organizational approaches and deployment (see pages 47–48). This question is intended to help you and the Baldrige Examiners set a context for your approach to performance improvement.

For definitions of the following **key terms**, see page 33: strategic challenges and systematic.

---

**Importance of Your Organizational Profile**

Your Organizational Profile is critically important because

- it is the most appropriate starting point for self-assessment and for writing an application;
- it helps you identify potential gaps in key information and focus on key performance requirements and business results;
- it is used by the Examiners and Judges in all stages of application review, including the site visit, to understand your organization and what you consider important; and
- it also may be used by itself for an initial self-assessment. If you identify topics for which conflicting, little, or no information is available, it is possible that your assessment need go no further and you can use these topics for action planning.

---

**Page Limit**

For Baldrige Award applicants, the Organizational Profile is limited to five pages. These are not counted in the overall application page limit. Typing and format instructions for the Organizational Profile are the same as for the application. These instructions are given in the *Baldrige Award Application Forms* booklet. Ordering information is given on page 56.
The Leadership Category examines how your organization’s senior leaders address values, directions, and performance expectations, as well as a focus on customers and other stakeholders, empowerment, innovation, and learning. Also examined is how your organization addresses its responsibilities to the public and supports its key communities.

1.1 Organizational Leadership (80 pts.)

Describe how senior leaders guide your organization, including how they review organizational performance.

Within your response, include answers to the following questions:

a. Senior Leadership Direction
   (1) How do senior leaders set and deploy organizational values, short- and longer-term directions, and performance expectations, including a focus on creating and balancing value for customers and other stakeholders? Include how senior leaders communicate values, directions, and expectations through your leadership system and to all employees.
   
   (2) How do senior leaders create an environment for empowerment, innovation, organizational agility, and organizational and employee learning?

b. Organizational Performance Review
   (1) How do senior leaders review organizational performance and capabilities to assess organizational success, competitive performance, progress relative to short- and longer-term goals, and the ability to address changing organizational needs? Include the key performance measures regularly reviewed by your senior leaders. Also, include your key recent performance review findings.
   
   (2) How are organizational performance review findings translated into priorities for improvement and opportunities for innovation? How are they deployed throughout your organization and, as appropriate, to your suppliers/partners to ensure organizational alignment?
   
   (3) How do senior leaders use organizational performance review findings to improve both their own leadership effectiveness and your leadership system?

Notes:

N1. Organizational directions (1.1a[1]) relate to strategic objectives and action plans described in Items 2.1 and 2.2.

N2. Senior leaders’ organizational performance reviews (1.1b) should be informed by organizational performance analyses described in 4.1b and strategic objectives and action plans described in Items 2.1 and 2.2.

N3. Leadership effectiveness improvement (1.1b[3]) should be supported by formal and/or informal employee feedback/surveys.

N4. Your organizational performance results should be reported in Items 7.1, 7.2, 7.3, and 7.4.

Item responses are assessed by considering the Criteria Item requirements and the maturity of your approaches, breadth of deployment, and strength of your improvement process and results relative to the Scoring System. Refer to the Scoring System information on pages 47–48.

For definitions of the following key terms, see pages 29–33: alignment, approach, deployment, empowerment, goals, innovation, leadership system, measures, performance, senior leaders, stakeholders, and value.

For additional description of this Item, see page 34.
I.2 Public Responsibility and Citizenship (40 pts.)

Approach-Deployment

Describe how your organization addresses its responsibilities to the public and practices good citizenship.

Within your response, include answers to the following questions:

a. Responsibilities to the Public
   (1) How do you address the impacts on society of your products, services, and operations? Include your key processes, measures, and targets for regulatory and legal requirements and for addressing risks associated with your products, services, and operations.
   
   (2) How do you anticipate public concerns with current and future products, services, and operations? How do you prepare for these concerns in a proactive manner?
   
   (3) How do you accomplish ethical business practices in all stakeholder transactions and interactions?

b. Support of Key Communities
   How do your organization, your senior leaders, and your employees actively support and strengthen your key communities? Include how you identify key communities and determine areas of emphasis for organizational involvement and support.

Notes:

N1. Public responsibilities in areas critical to your business also should be addressed in Strategy Development (Item 2.1) and/or in Process Management (Category 6). Key results, such as results of regulatory/legal compliance or environmental improvements through use of “green” technology or other means, should be reported as Organizational Effectiveness Results (Item 7.4).

N2. Areas of community support appropriate for inclusion in 1.2b might include your efforts to strengthen local community services, education, and health; the environment; and practices of trade, business, or professional associations.

N3. The health and safety of employees are not addressed in Item 1.2; you should address these employee factors in Item 5.3.

For a definition of the following key term, see page 32: process.

For additional description of this Item, see page 34.
The Strategic Planning Category examines how your organization develops strategic objectives and action plans. Also examined are how your chosen strategic objectives and action plans are deployed and how progress is measured.

2.1 Strategy Development (40 pts.)

Describe how your organization establishes its strategic objectives, including enhancing its competitive position and overall performance.

Within your response, include answers to the following questions:

a. Strategy Development Process
   (1) What is your overall strategic planning process? Include key steps, key participants, and your short- and longer-term planning time horizons.

   (2) How do you ensure that planning addresses the following key factors? Briefly outline how relevant data and information are gathered and analyzed to address these factors:
      • customer and market needs/expectations/opportunities
      • your competitive environment and your capabilities relative to competitors
      • technological and other key changes that might affect your products/services and/or how you operate
      • your strengths and weaknesses, including human and other resources
      • your supplier/partner strengths and weaknesses
      • financial, societal, and other potential risks

b. Strategic Objectives
   (1) What are your key strategic objectives and your timetable for accomplishing them? Include key goals/targets, as appropriate.

   (2) How do your strategic objectives address the challenges identified in response to P.2 in your Organizational Profile? How do you ensure that your strategic objectives balance the needs of all key stakeholders?

Notes:

N1. “Strategy development” refers to your organization’s approach (formal or informal) to preparing for the future. Strategy development might utilize various types of forecasts, projections, options, scenarios, and/or other approaches to envisioning the future for purposes of decision making and resource allocation.

N2. “Strategy” should be interpreted broadly. Strategy might be built around or lead to any or all of the following: new products, services, and markets; revenue growth via various approaches, including acquisitions; and new partnerships and alliances. Strategy might be directed toward becoming a preferred supplier, a local supplier in each of your major customers’ markets, a low-cost producer, a market innovator, and/or a high-end or customized product/service provider.

N3. Challenges (2.1b[2]) addressed in your strategy might include rapid response, customization, lean or virtual manufacturing, rapid innovation, Web-based supplier/customer relationship management, and product/service quality. Responses to Item 2.1 should focus on your specific challenges—those most important to your business success and to strengthening your organization’s overall performance.

N4. Item 2.1 addresses your overall organizational strategy, which might include changes in services, products, and product lines. However, the Item does not address product and service design; you should address these factors in Item 6.1.

For a definition of the following key term, see page 33: strategic objectives.

For additional description of this Item, see pages 35–36.
2.2 Strategy Deployment (45 pts.)

Describe how your organization converts its strategic objectives into action plans. Summarize your organization’s action plans and related key performance measures/indicators. Project your organization’s future performance on these key performance measures/indicators.

Within your response, include answers to the following questions:

a. Action Plan Development and Deployment
   (1) How do you develop and deploy action plans to achieve your key strategic objectives? Include how you allocate resources to ensure accomplishment of your action plans.
   (2) What are your key short- and longer-term action plans? Include key changes, if any, in your products/services, your customers/markets, and how you operate.
   (3) What are your key human resource plans that derive from your short- and longer-term strategic objectives and action plans?
   (4) What are your key performance measures/indicators for tracking progress relative to your action plans? How do you ensure that your overall action plan measurement system achieves organizational alignment and covers all key deployment areas and stakeholders?

b. Performance Projection
   What are your performance projections for your key measures/indicators for both your short- and longer-term planning time horizons? How does your projected performance compare with competitors’ performance, key benchmarks, goals, and past performance, as appropriate?

Notes:

N1. Action plan development and deployment are closely linked to other Items in the Criteria. Examples of key linkages are
   • Item 1.1 for how your senior leaders set and communicate directions;
   • Category 3 for gathering customer and market knowledge as input to your strategy and action plans and for deploying action plans;
   • Category 4 for information and analysis to support your key information needs, to support your development of strategy, to provide an effective basis for your performance measurements, and to track progress relative to your strategic objectives and action plans;
   • Category 5 for your work system needs; employee education, training, and development needs; and related human resource factors resulting from action plans;
   • Category 6 for process requirements resulting from your action plans; and
   • Item 7.4 for specific accomplishments relative to your organizational strategy.

N2. Measures/indicators of projected performance (2.2b) might include changes resulting from new business ventures; business acquisitions; new value creation; market entry and shifts; and significant anticipated innovations in products, services, and technology.

For definitions of the following key terms, see pages 29–32: action plans, benchmarks, measures and indicators, and performance projections.

For additional description of this Item, see page 36.
The Customer and Market Focus Category examines how your organization determines requirements, expectations, and preferences of customers and markets. Also examined is how your organization builds relationships with customers and determines the key factors that lead to customer acquisition, satisfaction, and retention and to business expansion.

### 3.1 Customer and Market Knowledge (40 pts.)

**Approach-Deployment**

Describe how your organization determines requirements, expectations, and preferences of customers and markets to ensure the continuing relevance of your products/services and to develop new opportunities.

Within your response, include answers to the following questions:

**a. Customer and Market Knowledge**

1. How do you determine or target customers, customer groups, and/or market segments? How do you include customers of competitors and other potential customers and/or markets in this determination?

2. How do you listen and learn to determine key customer requirements (including product/service features) and their relative importance/value to customers’ purchasing decisions for purposes of product/service planning, marketing, improvements, and other business development? In this determination, how do you use relevant information from current and former customers, including marketing/sales information, customer retention data, won/lost analysis, and complaints? If determination methods vary for different customers and/or customer groups, describe the key differences in your determination methods.

3. How do you keep your listening and learning methods current with business needs and directions?

---

**Notes:**

N1. Customer groups (3.1a[1]) might include Web-based customers and/or customers with whom you have direct contact. Key product/service features and purchasing decisions might take into account transactional modes and factors such as confidentiality and security.

N2. If your products/services are sold to or delivered to end-use customers via other businesses such as retail stores or dealers, customer groups (3.1a[1]) should include both the end users and these intermediate businesses.

N3. “Product/service features” (3.1a[2]) refers to all the important characteristics of products/services and to their performance throughout their full life cycle and the full “consumption chain.” This includes all customers’ purchase experiences and other interactions with your organization. The focus should be on features that affect customer preference and repeat business—for example, those features that differentiate your products and services from competing offerings. Those features might include price, reliability, value, delivery, customer or technical support, and the sales relationship.

N4. Listening/learning (3.1a[2]) might include gathering and integrating Web-based data and information that bear upon customers’ purchasing decisions. Keeping your listening and learning methods current with business needs and directions (3.1a[3]) also might include use of current and new technology, such as Web-based data gathering.

For additional description of this Item, see page 37.
3.2 Customer Relationships and Satisfaction (45 pts.)

Describe how your organization builds relationships to acquire, satisfy, and retain customers and to develop new opportunities. Describe also how your organization determines customer satisfaction.

Within your response, include answers to the following questions:

a. Customer Relationships
   (1) How do you build relationships to acquire and satisfy customers and to increase repeat business and positive referrals?

   (2) How do you determine key customer contact requirements and how they vary for differing modes of access? How do you ensure that these contact requirements are deployed to all people involved in the response chain? Include a summary of your key access mechanisms for customers to seek information, conduct business, and make complaints.

   (3) What is your complaint management process? Include how you ensure that complaints are resolved effectively and promptly and that all complaints are aggregated and analyzed for use in improvement throughout your organization and by your partners, as appropriate.

   (4) How do you keep your approaches to building relationships and providing customer access current with business needs and directions?

b. Customer Satisfaction Determination
   (1) How do you determine customer satisfaction and dissatisfaction and use this information for improvement? Include how you ensure that your measurements capture actionable information that predicts customers’ future business with you and/or potential for positive referral. Describe significant differences in determination methods for different customer groups.

   (2) How do you follow up with customers on products/services and transactions to receive prompt and actionable feedback?

   (3) How do you obtain and use information on your customers’ satisfaction relative to customers’ satisfaction with competitors and/or benchmarks, as appropriate?

   (4) How do you keep your approaches to determining satisfaction current with business needs and directions?

Notes:

N1. Customer relationships (3.2a) might include the development of partnerships or alliances with customers.

N2. Determining customer satisfaction and dissatisfaction (3.2b) might include use of any or all of the following: surveys, formal and informal feedback, use of customer account histories, complaints, and transaction completion rates. Information might be gathered on the Internet, through personal contact or a third party, or by mail.

N3. Customer satisfaction measurements might include both a numerical rating scale and descriptors for each unit in the scale. Actionable customer satisfaction measurements provide useful information about specific product/service features, delivery, relationships, and transactions that bear upon the customers’ future actions—repeat business and/or positive referral.

N4. Your customer satisfaction and dissatisfaction results should be reported in Item 7.1.

For additional description of this Item, see pages 37–38.
4 Information and Analysis (90 pts.)

The Information and Analysis Category examines your organization’s information management and performance measurement systems and how your organization analyzes performance data and information.

4.1 Measurement and Analysis of Organizational Performance (50 pts.)

Describe how your organization provides effective performance management systems for measuring, analyzing, aligning, and improving performance at all levels and in all parts of your organization.

Within your response, include answers to the following questions:

a. Performance Measurement
   (1) How do you gather and integrate data and information from all sources to support daily operations and organizational decision making?
   (2) How do you select and align measures/indicators for tracking daily operations and overall organizational performance?
   (3) How do you select and ensure the effective use of key comparative data and information?
   (4) How do you keep your performance measurement system current with business needs and directions?

b. Performance Analysis
   (1) What analyses do you perform to support your senior leaders’ organizational performance review and your organization’s strategic planning?
   (2) How do you communicate the results of organizational-level analysis to work group and/or functional-level operations to enable effective support for decision making?
   (3) How do you align the results of organizational-level analysis with your key business results, strategic objectives, and action plans? How do these results provide the basis for projections of continuous and breakthrough improvements in performance?

Notes:

N1. Performance measurement is used in fact-based decision making for setting and aligning organizational directions and resource use at the work unit, key process, departmental, and whole organization levels.

N2. Comparative data and information sources (4.1a[3]) include benchmarking and competitive comparisons. “Benchmarking” refers to identifying processes and results that represent best practices and performance for similar activities, inside or outside your organization’s industry. Competitive comparisons relate your organization’s performance to that of competitors in your markets.

N3. Analysis includes examining trends; organizational, industry, and technology projections; and comparisons, cause-effect relationships, and correlations intended to support your performance reviews, help determine root causes, and help set priorities for resource use. Accordingly, analysis draws upon all types of data: customer-related, financial and market, operational, and competitive.

N4. The results of organizational performance analysis should contribute to your senior leaders’ organizational performance review in 1.1b and organizational strategic planning in Category 2.

N5. Your organizational performance results should be reported in Items 7.1, 7.2, 7.3, and 7.4.

For definitions of the following key terms, see pages 29–30: analysis and effective.

For additional description of this Item, see pages 38–40.
4.2 Information Management (40 pts.)

Approach-Deployment

Describe how your organization ensures the quality and availability of needed data and information for employees, suppliers/partners, and customers.

Within your response, include answers to the following questions:

a. Data Availability
   (1) How do you make needed data and information available? How do you make them accessible to employees, suppliers/partners, and customers, as appropriate?
   (2) How do you ensure data and information integrity, reliability, accuracy, timeliness, security, and confidentiality?
   (3) How do you keep your data and information availability mechanisms current with business needs and directions?

b. Hardware and Software Quality
   (1) How do you ensure that hardware and software are reliable and user friendly?
   (2) How do you keep your software and hardware systems current with business needs and directions?

Notes:

N1. Data availability (4.2a) is of growing importance as the Internet and e-business/e-commerce are used increasingly for business-to-business and business-to-consumer interactions and intranets become more important as a major source of organization-wide communications.

N2. Data and information access (4.2a[1]) might be via electronic and other means.

For additional description of this Item, see page 40.
The **Human Resource Focus** Category examines how your organization motivates and enables employees to develop and utilize their full potential in alignment with your organization’s overall objectives and action plans. Also examined are your organization’s efforts to build and maintain a work environment and an employee support climate conducive to performance excellence and to personal and organizational growth.

### 5.1 Work Systems (35 pts.) Approach-Deployment

Describe how your organization’s work and jobs, compensation, career progression, and related workforce practices motivate and enable employees and the organization to achieve high performance.

Within your response, include answers to the following questions:

a. **Work Systems**

   (1) How do you organize and manage work and jobs to promote cooperation, initiative/innovation, your organizational culture, and the flexibility to keep current with business needs? How do you achieve effective communication and knowledge/skill sharing across work units, jobs, and locations, as appropriate?

   (2) How do you motivate employees to develop and utilize their full potential? Include formal and/or informal mechanisms you use to help employees attain job- and career-related development/learning objectives and the role of managers and supervisors in helping employees attain these objectives.

   (3) How does your employee performance management system, including feedback to employees, support high performance and a customer and business focus? How do your compensation, recognition, and related reward/incentive practices reinforce these objectives?

   (4) How do you accomplish effective succession planning for senior leadership and throughout the organization?

   (5) How do you identify characteristics and skills needed by potential employees? How do you recruit, hire, and retain new employees? How do your work systems capitalize on the diverse ideas, cultures, and thinking of the communities with which you interact (your employee hiring and customer communities)?

---

**Notes:**

N1. “Employees” refers to your organization’s permanent, temporary, and part-time personnel, as well as any contract employees supervised by your organization. Employees include team leaders, supervisors, and managers at all levels. Contract employees supervised by a contractor should be addressed in business or support processes in Category 6.

N2. “Your organization’s work” refers to how your employees are organized and/or organize themselves in formal and informal, temporary, or longer-term units. This might include work teams, process teams, customer action teams, problem-solving teams, centers of excellence, functional units, cross-functional teams, and departments—self-managed or managed by supervisors.

“Jobs” refers to responsibilities, authorities, and tasks of individuals. In some work systems, jobs might be shared by a team.

N3. Compensation and recognition (5.1a[3]) include promotions and bonuses that might be based upon performance, skills acquired, and other factors. Recognition includes monetary and nonmonetary, formal and informal, and individual and group mechanisms.

For definitions of the following key terms, see pages 30–33: high-performance work, performance excellence, and work systems.

For additional description of this Item, see pages 40–41.
5.2 Employee Education, Training, and Development (25 pts.)

Approach-Deployment

Describe how your organization’s education and training support the achievement of your overall objectives, including building employee knowledge, skills, and capabilities and contributing to high performance.

Within your response, include answers to the following questions:

a. Employee Education, Training, and Development

(1) How do education and training contribute to the achievement of your action plans? How does your education and training approach balance short- and longer-term organizational objectives and employee needs, including development, learning, and career progression?

(2) How do you seek and use input from employees and their supervisors/managers on education and training needs and delivery options?

(3) How do you address in your employee education, training, and development your key organizational needs associated with technological change, management/leadership development, new employee orientation, safety, performance measurement/improvement, and diversity?

(4) How do you deliver education and training? Include formal and informal delivery, including mentoring and other approaches, as appropriate. How do you evaluate the effectiveness of education and training, taking into account individual and organizational performance?

(5) How do you reinforce the use of knowledge and skills on the job?

Notes:

N1. Technological change (5.2a[3]) might include computer and Internet literacy.

N2. Education and training delivery (5.2a[4]) might occur inside or outside your organization and involve on-the-job, classroom, computer-based, distance learning, and/or other types of delivery (formal or informal).

For additional description of this Item, see pages 41–42.
5.3 Employee Well-Being and Satisfaction (25 pts.)

Describe how your organization maintains a work environment and an employee support climate that contribute to the well-being, satisfaction, and motivation of all employees.

Within your response, include answers to the following questions:

a. Work Environment
   How do you improve workplace health, safety, and ergonomics? How do employees take part in improving them? Include performance measures and/or targets for each key environmental factor. Also include significant differences, if any, based on varying work environments for employee groups and/or work units.

b. Employee Support and Satisfaction
   (1) How do you determine the key factors that affect employee well-being, satisfaction, and motivation? How are these factors segmented for a diverse workforce and for varying categories and types of employees, as appropriate?
   (2) How do you support your employees via services, benefits, and policies? How are these tailored to the needs of a diverse workforce and different categories and types of employees, as appropriate?
   (3) What formal and/or informal assessment methods and measures do you use to determine employee well-being, satisfaction, and motivation? How do you tailor these methods and measures to a diverse workforce and to different categories and types of employees, as appropriate? How do you use other indicators, such as employee retention, absenteeism, grievances, safety, and productivity, to assess and improve employee well-being, satisfaction, and motivation?
   (4) How do you relate assessment findings to key business results to identify priorities for improving the work environment and employee support climate?

Notes:

N1. Specific factors that might affect your employees' well-being, satisfaction, and motivation (5.3b[1]) include effective employee problem or grievance resolution; safety factors; employees’ views of management; employee training, development, and career opportunities; employee preparation for changes in technology or the work organization; the work environment and other work conditions; management's empowerment of employees; information sharing by management; workload; cooperation and teamwork; recognition; services and benefits; communications; job security; compensation; and equal opportunity.

N2. Approaches for employee support (5.3b[2]) might include providing counseling, career development and employability services, recreational or cultural activities, nonwork-related education, day care, job rotation or sharing, special leave for family responsibilities or community service, home safety training, flexible work hours and location, outplacement, and retirement benefits (including extended health care).

N3. Measures/indicators of well-being, satisfaction, and motivation (5.3b[3]) might include data on safety and absenteeism, the overall turnover rate, the turnover rate for customer contact employees, employees’ charitable contributions, grievances, strikes, other job actions, insurance costs, worker’s compensation claims, and results of surveys. Survey indicators of satisfaction might include employee knowledge of job roles, employee knowledge of organizational direction, and employee perception of empowerment and information sharing. Your results relative to such measures/indicators should be reported in Item 7.3.

N4. Setting priorities (5.3b[4]) might draw upon your human resource results presented in Item 7.3 and might involve addressing employee problems based on their impact on your organizational performance.

For additional description of this Item, see page 42.
The *Process Management* Category examines the key aspects of your organization's process management, including customer-focused design, product and service delivery, key business, and support processes. This Category encompasses all key processes and all work units.

### 6.1 Product and Service Processes (45 pts.)

**Approach-Deployment**

Describe how your organization manages key processes for product and service design and delivery.

Within your response, include answers to the following questions:

#### a. Design Processes

1. What are your design processes for products/services and their related production/delivery systems and processes?
2. How do you incorporate changing customer/market requirements into product/service designs and production/delivery systems and processes?
3. How do you incorporate new technology, including e-technology, into products/services and into production/delivery systems and processes, as appropriate?
4. How do your design processes address design quality and cycle time, transfer of learning from past projects and other parts of the organization, cost control, new design technology, productivity, and other efficiency/effectiveness factors?
5. How do you design your production/delivery systems and processes to meet all key operational performance requirements?
6. How do you coordinate and test your design and production/delivery systems and processes? Include how you prevent defects/rework and facilitate trouble-free and timely introduction of products/services.

#### b. Production/Delivery Processes

1. What are your key production/delivery processes and their key performance requirements?
2. How does your day-to-day operation of key production/delivery processes ensure meeting key performance requirements?
3. What are your key performance measures/indicators used for the control and improvement of these processes? Include how in-process measures and real-time customer and supplier/partner input are used in managing your product and service processes, as appropriate.
4. How do you perform inspections, tests, and process/performance audits to minimize warranty and/or rework costs, as appropriate? Include your prevention-based processes for controlling inspection and test costs, as appropriate.
5. How do you improve your production/delivery systems and processes to achieve better process performance and improvements to products/services, as appropriate? How are improvements shared with other organizational units and processes and your suppliers/partners, as appropriate?

---

**Notes:**

N1. Product and service design, production, and delivery processes differ greatly among organizations, depending on many factors. These factors include the nature of your products and services, technology requirements, issues of modularity and parts commonality, customer and supplier relationships and involvement, and product and service customization. Responses to Item 6.1 should be based upon the most critical requirements for your business.
### Notes:

**N1.** Your key business processes are those nonproduct/nonservice processes that are considered most important to business growth and success by your organization’s senior leaders. These might include processes for innovation, research and development, technology acquisition, information and knowledge management, supply chain management, supplier partnering, outsourcing, mergers and acquisitions, global expansion, project management, and sales/marketing. The key business processes to be included in Item 6.2 are distinctive to your organization and how you operate.

**N2.** To provide as complete and concise a response as possible for your key business processes, you might want to use a tabular format identifying the key processes and the attributes of each as called for in questions 6.2a(1)–6.2a(4).

**N3.** The results of improvements in your key business processes and key business process performance results should be reported in Item 7.4.

---

### 6.2 Business Processes (25 pts.)

**Approach-Deployment**

Describe how your organization manages its key processes that lead to business growth and success.

Within your response, include answers to the following questions:

**a. Business Processes**

1. What are your key business processes for business growth and success?
2. How do you determine key business process requirements, incorporating input from customers and suppliers/partners, as appropriate? What are the key requirements for these processes?
3. How do you design and perform these processes to meet all the key requirements?
4. What are your key performance measures/indicators used for the control and improvement of these processes? Include how in-process measures and customer and supplier feedback are used in managing your business processes, as appropriate.
5. How do you minimize overall costs associated with inspections, tests, and process/performance audits, as appropriate?
6. How do you improve your business processes to achieve better performance and to keep them current with business needs and directions? How are improvements shared with other organizational units and processes, as appropriate?

---

**For additional description of this Item, see page 44.**
6.3 Support Processes (15 pts.)

Describe how your organization manages its key processes that support your daily operations and your employees in delivering products and services.

Within your response, include answers to the following questions:

a. Support Processes

(1) What are your key processes for supporting your daily operations and your employees in delivering products and services?

(2) How do you determine key support process requirements, incorporating input from internal customers, as appropriate? What are the key operational requirements (such as productivity and cycle time) for these processes?

(3) How do you design these processes to meet all the key requirements?

(4) How does your day-to-day operation of key support processes ensure meeting key performance requirements?

(5) What are your key performance measures/indicators used for the control and improvement of these processes? Include how in-process measures and internal customer feedback are used in managing your support processes, as appropriate.

(6) How do you minimize overall costs associated with inspections, tests, and process/performance audits?

(7) How do you improve your support processes to achieve better performance and to keep them current with business needs and directions? How are improvements shared with other organizational units and processes, as appropriate?

Notes:

N1. Your key support processes are those that are considered most important for support of your organization’s product/service design and delivery processes and daily operations. These might include finance and accounting, facilities management, legal, human resource, and administration processes.

N2. The results of improvements in your key support processes and key support process performance results should be reported in Item 7.4.

For additional description of this Item, see page 44.
The Business Results Category examines your organization’s performance and improvement in key business areas—customer satisfaction, product and service performance, financial and marketplace performance, human resource results, and operational performance. Also examined are performance levels relative to those of competitors.

7.1 Customer-Focused Results (125 pts.)

Summarize your organization’s key customer-focused results, including customer satisfaction and product and service performance results. Segment your results by customer groups and market segments, as appropriate. Include appropriate comparative data.

Provide data and information to answer the following questions:

a. Customer Results
   (1) What are your current levels and trends in key measures/indicators of customer satisfaction and dissatisfaction, including comparisons with competitors’ levels of customer satisfaction?
   (2) What are your current levels and trends in key measures/indicators of customer-perceived value, customer retention, positive referral, and/or other aspects of building relationships with customers, as appropriate?

b. Product and Service Results
   What are your current levels and trends in key measures/indicators of product and service performance that are important to your customers?

Notes:

N1. Customer satisfaction and dissatisfaction results reported in this Item should relate to determination methods and data described in Item 3.2.

N2. Measures/indicators of customers’ satisfaction with your products/services relative to customers’ satisfaction with competitors might include objective information and data from your customers and from independent organizations.

N3. Service performance (7.1b) might include measures of success in providing nontraditional services to customers, such as Internet-based services.

For definitions of the following key terms, see pages 31–33: levels, results, and trends.

For additional description of this Item, see page 45.
7.2 Financial and Market Results (125 pts.)

Summarize your organization’s key financial and marketplace performance results by market segments, as appropriate. Include appropriate comparative data.

Provide data and information to answer the following questions:

a. Financial and Market Results
   (1) What are your current levels and trends in key measures/indicators of financial performance, including aggregate measures of financial return and/or economic value, as appropriate?
   (2) What are your current levels and trends in key measures/indicators of marketplace performance, including market share/position, business growth, and new markets entered, as appropriate?

Notes:

N1. Responses to 7.2a(1) might include aggregate measures such as return on investment (ROI), asset utilization, operating margins, profitability, profitability by market/customer segment, liquidity, debt to equity ratio, value added per employee, and financial activity measures.

N2. New markets entered (7.2a[2]) might include offering Web-based services.

For additional description of this Item, see pages 45–46.

7.3 Human Resource Results (80 pts.)

Summarize your organization’s key human resource results, including employee well-being, satisfaction, and development and work system performance. Segment your results to address the diversity of your workforce and the different types and categories of employees, as appropriate. Include appropriate comparative data.

Provide data and information to answer the following questions:

a. Human Resource Results
   (1) What are your current levels and trends in key measures/indicators of employee well-being, satisfaction and dissatisfaction, and development?
   (2) What are your current levels and trends in key measures/indicators of work system performance and effectiveness?

Notes:

N1. Results reported in this Item should relate to activities described in Category 5. Your results should be responsive to key process needs described in Category 6 and to your organization’s action plans and human resource plans described in Item 2.2.

N2. For appropriate measures of employee well-being and satisfaction (7.3a[1]), see Notes to Item 5.3. Appropriate measures/indicators of employee development might include innovation and suggestion rates, courses completed, learning, on-the-job performance improvements, and cross-training rates.

N3. Appropriate measures/indicators of work system performance and effectiveness (7.3a[2]) might include job and job classification simplification, job rotation, work layout, and changing supervisory ratios.

For additional description of this Item, see pages 45–46.
7.4 Organizational Effectiveness Results (120 pts.)

Summarize your organization’s key performance results that contribute to the achievement of organizational effectiveness. Include appropriate comparative data.

Provide data and information to answer the following questions:

a. Operational Results
   (1) What are your current levels and trends in key measures/indicators of the operational performance of key design, production, delivery, business, and support processes? Include productivity, cycle time, supplier/partner performance, and other appropriate measures of effectiveness and efficiency.
   (2) What are your results for key measures/indicators of accomplishment of organizational strategy?

b. Public Responsibility and Citizenship Results
   What are your results for key measures/indicators of regulatory/legal compliance and citizenship?

Notes:

N1. Results reported in 7.4a should address your key operational requirements and progress toward accomplishment of your key organizational performance goals as presented in the Organizational Profile and in Items 1.1, 2.2, 6.1, 6.2 and 6.3. Include results not reported in Items 7.1, 7.2, and 7.3.

N2. Regulatory and legal compliance results reported in 7.4b should address requirements described in Item 1.2.

N3. Results reported in Item 7.4 should provide key information for analysis (Item 4.1) and review (Item 1.1) of your organizational performance and should provide the operational basis for customer-focused results (Item 7.1) and financial and market results (Item 7.2).

For additional description of this Item, see page 46.
This Glossary of Key Terms defines and briefly describes terms used throughout the Criteria booklet that are important to performance management.

**Action Plans**

The term “action plans” refers to specific actions that respond to short- and longer-term strategic objectives. Action plans include details of resource commitments and time horizons for accomplishment. Action plan development represents the critical stage in planning when strategic objectives and goals are made specific so that effective, organization-wide understanding and deployment are possible. In the Criteria, deployment of action plans includes creation of aligned measures for work units. Deployment might also require specialized training for some employees or recruitment of personnel.

An example of a strategic objective for a supplier in a highly competitive industry might be to develop and maintain a price leadership position. Action plans likely would entail design of efficient processes and creation of an accounting system that tracks activity-level costs, aligned for the organization as a whole. Performance requirements might include unit and/or team training in setting priorities based upon costs and benefits. Organizational-level analysis and review likely would emphasize productivity growth, cost control, and quality.

See the definition of “strategic objectives” on page 33 for the description of this related term.

**Alignment**

The term “alignment” refers to consistency of plans, processes, information, resource decisions, actions, results, analysis, and learning to support key organization-wide goals. Effective alignment requires a common understanding of purposes and goals and use of complementary measures and information for planning, tracking, analysis, and improvement at three levels: the organizational level, the key process level, and the work unit level.

See the definition of “integration” on page 31 for the description of this related term.

**Analysis**

The term “analysis” refers to an examination of facts and data to provide a basis for effective decisions. Analysis often involves the determination of cause-effect relationships. Overall organizational analysis guides process management toward achieving key business results and toward attaining strategic objectives.

Despite their importance, individual facts and data do not usually provide an effective basis for actions or setting priorities. Actions depend on an understanding of relationships, derived from analysis of facts and data.

**Anecdotal**

The term “anecdotal” refers to process information that lacks specific methods, measures, deployment mechanisms, and evaluation/improvement/learning factors. Anecdotal information frequently uses examples and describes individual activities rather than systematic processes.

An anecdotal response to how senior leaders deploy performance expectations might describe a specific occasion when a senior leader visited all company facilities. On the other hand, a systematic approach might describe the communication methods used by all senior leaders to deliver performance expectations on a regular basis, the measures used to assess effectiveness of the methods, and the tools and techniques used to evaluate and improve the communication methods.

**Approach**

The term “approach” refers to how an organization addresses the Baldrige Criteria Item requirements, i.e., the methods and processes used by the organization. Approaches are evaluated on the basis of the appropriateness of the methods/processes to the Item requirements, the effectiveness of their use, and their alignment with organizational needs.

For further description, see the Scoring System on page 47.

**Basic Requirements**

The term “basic requirements” refers to the most central theme of an Item. Basic requirements are the fundamental or essential requirements of that Item.

In the Criteria, the basic requirements of each Item are presented as an introductory sentence(s) printed in bold. This presentation is illustrated in the Item format shown on page 50.

**Benchmarks**

The term “benchmarks” refers to processes and results that represent best practices and performance for similar activities, inside or outside an organization’s industry. Organizations engage in benchmarking activities to understand the current dimensions of world-class performance and to achieve discontinuous (nonincremental) or breakthrough improvement.

Benchmarks are one form of comparative data. Other comparative data organizations might use include industry data collected by a third party (frequently industry averages), data on competitors’ performance, and comparisons with similar organizations in the same geographic area.
Cycle Time

The term “cycle time” refers to the time required to fulfill commitments or to complete tasks. Time measurements play a major role in the Criteria because of the great importance of time performance to improving competitiveness. “Cycle time” refers to all aspects of time performance. Cycle time improvement might include time to market, order fulfillment time, delivery time, changeover time, customer response times, and other key measures of time.

Deployment

The term “deployment” refers to the extent to which an organization’s approach is applied to the requirements of a Baldrige Criteria Item. Deployment is evaluated on the basis of the breadth and depth of application of the approach to relevant processes and work units throughout the organization. For further description, see the Scoring System on page 47.

Effective

The term “effective” refers to how well an approach, a process, or a measure addresses its intended purpose. Determining effectiveness requires the evaluation of how well a need is met by the approach taken, its deployment, or the measure used.

Empowerment

The term “empowerment” refers to giving employees the authority and responsibility to make decisions and take actions. Empowerment results in decisions being made closest to the “front line,” where work-related knowledge and understanding reside.

Empowerment is aimed at enabling employees to satisfy customers on first contact, to improve processes and increase productivity, and to better the organization’s business results. Empowered employees require information to make appropriate decisions; thus, an organizational requirement is to provide that information in a timely and useful way.

Goals

The term “goals” refers to a future condition or performance level that one intends to attain. Goals can be both short term and longer term. Goals are ends that guide actions. Quantitative goals, frequently referred to as “targets,” include a numerical point or range. Targets might be projections based on comparative and/or competitive data. The term “stretch goals” refers to desired major, discontinuous (nonincremental) or breakthrough improvements, usually in areas most critical to your organization’s future success.

Goals can serve many purposes, including
- clarifying strategic objectives and action plans to indicate how success will be measured
- fostering teamwork by focusing on a common end
- encouraging “out-of-the-box” thinking to achieve a stretch goal
- providing a basis for measuring and accelerating progress

High-Performance Work

The term “high-performance work” refers to work approaches used to systematically pursue ever higher levels of overall organizational and individual performance, including quality, productivity, innovation rate, and cycle time performance. High-performance work results in improved service for customers and other stakeholders.

Approaches to high-performance work vary in form, function, and incentive systems. Effective approaches frequently include cooperation between management and the workforce, which may involve workforce bargaining units; cooperation among work units, often involving teams; self-directed responsibility/employee empowerment; employee input to planning; individual and organizational skill building and learning; learning from other organizations; flexibility in job design and work assignments; a flattened organizational structure, where decision making is decentralized and decisions are made closest to the “front line”; and effective use of performance measures, including comparisons. Many high-performance work systems use monetary and nonmonetary incentives based upon factors such as organizational performance, team and/or individual contributions, and skill building. Also, high-performance work approaches usually seek to align the organization’s structure, work, jobs, employee development, and incentives.

How

The term “how” refers to the processes that an organization uses to accomplish its mission requirements. In responding to “how” questions in the Approach-Deployment Item requirements, process descriptions should include information such as methods, measures, deployment, and evaluation/improvement/learning factors.

Innovation

The term “innovation” refers to making meaningful change to improve products, services, and/or processes and create new value for stakeholders. Innovation involves the adoption of an idea, process, technology, or product that is either new or new to its proposed application.
Successful organizational innovation is a multistep process that involves development and knowledge sharing, a decision to implement, implementation, evaluation, and learning. Although innovation is often associated with technological innovation, it is applicable to all key organizational processes that would benefit from change, whether through breakthrough improvement or change in approach or outputs.

Integration
The term “integration” refers to the harmonization of plans, processes, information, resource decisions, actions, results, analysis, and learning to support key organization-wide goals. Effective integration is achieved when the individual components of a performance management system operate as a fully interconnected unit.

See the definition of “alignment” on page 29 for the description of this related term.

Leadership System
The term “leadership system” refers to how leadership is exercised, formally and informally, throughout the organization—the basis for and the way that key decisions are made, communicated, and carried out. It includes structures and mechanisms for decision making; selection and development of leaders and managers; and reinforcement of values, directions, and performance expectations.

An effective leadership system respects the capabilities and requirements of employees and other stakeholders, and it sets high expectations for performance and performance improvement. It builds loyalties and teamwork based on the organization’s values and the pursuit of shared goals. It encourages and supports initiative and appropriate risk taking, subordinates organization to purpose and function, and avoids chains of command that require long decision paths. An effective leadership system includes mechanisms for the leaders to conduct a self-examination, receive feedback, and improve.

Levels
The term “levels” refers to numerical information that places or positions an organization’s results and performance on a meaningful measurement scale. Performance levels permit evaluation relative to past performance, projections, goals, and appropriate comparisons.

Measures and Indicators
The term “measures and indicators” refers to numerical information that quantifies input, output, and performance dimensions of processes, products, services, and the overall organization (outcomes). Measures and indicators might be simple (derived from one measurement) or composite.

The Criteria do not make a distinction between measures and indicators. However, some users of these terms prefer the term indicator (1) when the measurement relates to performance but is not a direct measure of such performance (e.g., the number of complaints is an indicator of dissatisfaction but not a direct measure of it) and (2) when the measurement is a predictor (“leading indicator”) of some more significant performance (e.g., increased customer satisfaction might be a leading indicator of market share gain).

Mission
The term “mission” refers to the overall function of an organization. The mission answers the question, “What is this organization attempting to accomplish?” The mission might define customers or markets served, distinctive competencies, or technologies used.

Multiple Requirements
The term “multiple requirements” refers to the individual questions Criteria users need to answer within each Area to Address. These questions constitute the details of an Item’s requirements. They are presented in black text under each Item’s Area(s) to Address. This presentation is illustrated in the Item format shown on page 50. See the definition of “overall requirements” for more information on Areas to Address.

Overall Requirements
The term “overall requirements” refers to the specific Areas Criteria users need to address when responding to the central theme of an Item. Overall requirements address the most significant features of the Item requirements.

In the Criteria, the overall requirements of each Item are introduced in blue text and assigned a letter designation for each Area to Address. This presentation is illustrated in the Item format shown on page 50.

Performance
The term “performance” refers to output results obtained from processes, products, and services that permit evaluation and comparison relative to goals, standards, past results, and other organizations. Performance might be expressed in nonfinancial and financial terms.

The Baldrige Criteria address three types of performance: (1) customer-focused, including key product and service performance; (2) financial and marketplace; and (3) operational.

“Customer-focused performance” refers to performance relative to measures and indicators of customers’ perceptions, reactions, and behaviors and to measures and indicators of product and service characteristics important to customers. Examples include customer retention, complaints, customer survey results, product reliability, on-time
delivery, customer-experienced defect levels, and service response time.

“Financial and marketplace performance” refers to performance relative to measures of cost, revenue, and market position, including asset utilization, asset growth, and market share. Examples include returns on investments, value added per employee, debt to equity ratio, returns on assets, operating margins, cash-to-cash cycle time, other profitability and liquidity measures, and market gains.

“Operational performance” refers to organizational, human resource, and supplier performance relative to effectiveness and efficiency measures and indicators. Examples include cycle time, productivity, waste reduction, regulatory compliance, and community involvement. Operational performance might be measured at the work unit level, key process level, and organizational level.

**Performance Excellence**

The term “performance excellence” refers to an integrated approach to organizational performance management that results in (1) delivery of ever-improving value to customers, contributing to marketplace success; (2) improvement of overall organizational effectiveness and capabilities; and (3) organizational and personal learning. The Baldrige Criteria for Performance Excellence provide a framework and an assessment tool for understanding organizational strengths and opportunities for improvement and thus for guiding planning efforts.

**Performance Projections**

The term “performance projections” refers to estimates of future performance or goals for future results. Projections may be inferred from past performance, may be based on competitors’ performance, or may be predicted based on changes in a dynamic marketplace. Projections integrate estimates of your organization’s rate of improvement and change, and they may be used to indicate where breakthrough improvement or change is needed. Thus, performance projections serve as a key planning management tool.

**Process**

The term “process” refers to linked activities with the purpose of producing a product or service for a customer (user) within or outside the organization. Generally, processes involve combinations of people, machines, tools, techniques, and materials in a systematic series of steps or actions. In some situations, processes might require adherence to a specific sequence of steps, with documentation (sometimes formal) of procedures and requirements, including well-defined measurement and control steps.

In many service situations, particularly when customers are directly involved in the service, process is used in a more general way, i.e., to spell out what must be done, possibly including a preferred or expected sequence. If a sequence is critical, the service needs to include information to help customers understand and follow the sequence. Service processes involving customers also require guidance to the providers of those services on handling contingencies related to customers’ likely or possible actions or behaviors.

In knowledge work such as strategic planning, research, development, and analysis, process does not necessarily imply formal sequences of steps. Rather, process implies general understandings regarding competent performance such as timing, options to be included, evaluation, and reporting. Sequences might arise as part of these understandings.

**Productivity**

The term “productivity” refers to measures of the efficiency of resource use.

Although the term often is applied to single factors such as staffing (labor productivity), machines, materials, energy, and capital, the productivity concept applies as well to the total resources used in producing outputs. The use of an aggregate measure of overall productivity allows a determination of whether the net effect of overall changes in a process—possibly involving resource tradeoffs—is beneficial.

**Purpose**

The term “purpose” refers to the fundamental reason that an organization exists. The primary role of purpose is to inspire an organization and guide its setting of values. Purpose is generally broad and enduring. Two organizations in different businesses could have similar purposes, and two organizations in the same business could have different purposes.

**Results**

The term “results” refers to outcomes achieved by an organization in addressing the requirements of a Baldrige Criteria Item. Results are evaluated on the basis of current performance; performance relative to appropriate comparisons; the rate, breadth, and importance of performance improvements; and the relationship of results measures to key organizational performance requirements. For further description, see the Scoring System on page 47.

**Senior Leaders**

The term “senior leaders” refers to an organization’s senior management group or team. In many organizations, this consists of the head of the organization and his or her direct reports.

**Stakeholders**

The term “stakeholders” refers to all groups that are or might be affected by an organization’s products, services,
and actions. Examples of key stakeholders include customers, employees, partners, stockholders, and local/professional communities.

**Strategic Challenges**

The term “strategic challenges” refers to those pressures that exert a decisive influence on an organization’s likelihood of future success. These challenges frequently are driven by an organization’s future competitive position relative to other providers of similar products or services. While not exclusively so, strategic challenges generally are externally driven. However, in responding to externally driven strategic challenges, an organization may face internal strategic challenges.

External strategic challenges may relate to customer or market needs/expectations; product/service or technological changes; or financial, societal, and other risks. Internal strategic challenges may relate to an organization’s capabilities or its human and other resources.

See the definition of “strategic objectives” for the relationship between strategic challenges and the strategic objectives an organization articulates to address key challenges.

**Strategic Objectives**

The term “strategic objectives” refers to an organization’s articulated aims or responses to address major change/improvement, competitiveness issues, and/or business advantages. Strategic objectives generally are focused externally and relate to significant customer, market, product/service, or technological opportunities and challenges (strategic challenges). Broadly stated, they are what an organization must achieve to remain or become competitive. Strategic objectives set an organization’s longer-term directions and guide resource allocations and redistributions.

See the definition of “action plans” on page 29 for the relationship between strategic objectives and action plans and for an example of each.

**Systematic**

The term “systematic” refers to approaches that are repeatable and use data and information so that improvement and learning are possible. In other words, approaches are systematic if they build in the opportunity for evaluation and learning and thereby permit a gain in maturity. For use of the term, see the Scoring Guidelines on page 48.

**Trends**

The term “trends” refers to numerical information that shows the direction and rate of change for an organization’s results. Trends provide a time sequence of organizational performance.

A minimum of three data points generally is needed to begin to ascertain a trend. The time period for a trend is determined by the cycle time of the process being measured. Shorter cycle times demand more frequent measurement, while longer cycle times might require longer periods before a meaningful trend can be determined.

Examples of trends called for by the Criteria include data related to customer and employee satisfaction and dissatisfaction results, product and service performance, financial performance, marketplace performance, and operational performance, such as cycle time and productivity.

**Value**

The term “value” refers to the perceived worth of a product, service, process, asset, or function relative to cost and relative to possible alternatives.

Organizations frequently use value considerations to determine the benefits of various options relative to their costs, such as the value of various product and service combinations to customers. Organizations need to understand what different stakeholder groups value and then deliver value to each group. This frequently requires balancing value for customers and other stakeholders, such as stockholders, employees, and the community.

**Values**

The term “values” refers to the guiding principles and/or behaviors that embody how the organization and its people are expected to operate. Values reflect and reinforce the desired culture of an organization. Values support and guide the decision making of every employee, helping the organization to accomplish its mission and attain its vision in an appropriate manner.

**Vision**

The term “vision” refers to the desired future state of an organization. The vision describes where an organization is headed, what it intends to be, or how it wishes to be perceived.

**Work Systems**

The term “work systems” refers to how your employees are organized into formal or informal units; how job responsibilities are managed; and your processes for compensation, employee performance management, recognition, communication, hiring, and succession planning. Organizations design work systems to align their components to enable and encourage all employees to contribute effectively and to the best of their ability.
Leadership (Category 1)

Leadership addresses how your senior leaders guide your organization in setting organizational values, directions, and performance expectations. Attention is given to how your senior leaders communicate with employees, review organizational performance, and create an environment that encourages high performance. The Category also includes your organization's responsibilities to the public and how your organization practices good citizenship.

1.1 Organizational Leadership

Purpose
This Item examines the key aspects of your organization’s leadership and the actions of your senior leaders to create and sustain a high-performance organization.

Requirements
You are asked how your senior leaders set and deploy values, short- and longer-term directions, and performance expectations and balance the expectations of customers and other stakeholders. This includes how leaders create an environment for empowerment, innovation, organizational agility, and learning. You also are asked how your senior leaders review organizational performance, what key performance measures they regularly review, and how review findings are used to drive improvement and innovation, including improvement in your leaders' effectiveness.

Comments
■ Leadership's central roles in setting values and directions, creating and balancing value for all stakeholders, and driving performance are the focus of this Item. Success requires a strong orientation to the future and a commitment to both improvement and innovation. Increasingly, this requires creating an environment for empowerment and agility, as well as the means for rapid and effective application of knowledge.
■ The organizational review called for in this Item is intended to cover all areas of performance. This includes not only how well you currently are performing but also how well you are moving toward the future. It is anticipated that the review findings will provide a reliable means to guide both improvement and opportunities for innovation that are tied to your organization’s key objectives, success factors, and measures. Therefore, an important component of your senior leaders’ organizational review is the translation of the review findings into an action agenda sufficiently specific for deployment throughout your organization and to your suppliers/partners and key customers.

1.2 Public Responsibility and Citizenship

Purpose
This Item examines how your organization fulfills its public responsibilities and encourages, supports, and practices good citizenship.

Requirements
You are asked how your organization addresses its current and future impacts on society in a proactive manner and how you accomplish ethical business practices in all stakeholder interactions. The impacts and practices are expected to cover all relevant and important areas—products, services, and operations.

You also are asked how your organization, your senior leaders, and your employees identify, support, and strengthen your key communities as part of good citizenship practices.

Comments
■ An integral part of performance management and improvement is proactively addressing legal and regulatory requirements and risk factors. Addressing these areas requires establishing appropriate measures/indicators that senior leaders track in their overall performance review. Your organization should be sensitive to issues of public concern, whether or not these issues are currently embodied in law.
■ Citizenship implies going beyond a compliance orientation. Good citizenship opportunities are available to organizations of all sizes. These opportunities include encouraging and supporting your employees’ community service.
■ Examples of organizational community involvement include influencing the adoption of higher standards in education by communicating employability requirements to schools and school boards; partnering with other businesses and health care providers to improve health in the local community by providing education and volunteer services to address public health issues; and partnering to influence trade, business, and professional associations to engage in beneficial, cooperative activities, such as sharing best practices to improve overall U.S. global competitiveness and the environment.

Strategic Planning (Category 2)

Strategic Planning addresses strategic and action planning and deployment of plans. The Category stresses that customer-driven quality and operational performance are key strategic issues that need to be integral parts of your organization’s overall planning.
Specifically,

- customer-driven quality is a strategic view of quality. The focus is on the drivers of customer satisfaction, customer retention, new markets, and market share—key factors in competitiveness, profitability, and business success.

- operational performance improvement contributes to short-term and longer-term productivity growth and cost/price competitiveness. Building operational capability—including speed, responsiveness, and flexibility—represents an investment in strengthening your competitive fitness.

The Criteria emphasize that improvement and learning need to be embedded in work processes. The special role of strategic planning is to align work processes with your organization’s strategic directions, thereby ensuring that improvement and learning reinforce organizational priorities.

The Strategic Planning Category examines how your organization

- understands the key customer, market, and operational requirements as input to setting strategic directions. This helps to ensure that ongoing process improvements and change are aligned with your organization’s strategic directions.

- optimizes the use of resources, ensures the availability of trained employees, and bridges short-term and longer-term requirements that may entail capital expenditures, technology development or acquisition, and supplier development.

- ensures that deployment will be effective—that there are mechanisms to transmit requirements and achieve alignment on three levels: (1) the organization/executive level, (2) the key process level, and (3) the work unit/individual job level.

The requirements in the Strategic Planning Category encourage strategic thinking and acting—to develop a basis for a distinct competitive position in the marketplace. These requirements do not imply formalized plans, planning systems, departments, or specific planning cycles. They also do not imply that all your improvements could or should be planned in advance. An effective improvement system combines improvements of many types and degrees of involvement. This requires clear strategic guidance, particularly when improvement alternatives, including major change, compete for limited resources. In most cases, setting priorities depends heavily on a cost rationale. However, you also might have critical requirements, such as public responsibilities, that are not driven by cost considerations alone.

### 2.1 Strategy Development

**Purpose**

This Item examines how your organization sets strategic directions and develops your strategic objectives, guiding and strengthening your overall performance and competitiveness.

**Requirements**

You are asked to outline your organization’s strategic planning process, including identifying key participants, key steps, and your planning time horizons. You are asked how you consider key factors that affect your organization’s future. These factors cover external and internal influences on your organization. You are asked to address each factor and outline how relevant data and information are gathered and analyzed.

You also are asked to summarize your key strategic objectives and your timetable for accomplishing them. Finally, you are asked how these objectives address the challenges outlined in your Organizational Profile.

**Comments**

- This Item calls for basic information on the planning process and for information on all the key influences, risks, challenges, and other requirements that might affect your organization’s future opportunities and directions—taking as long-term a view as possible. This approach is intended to provide a thorough and realistic context for the development of a customer- and market-focused strategy to guide ongoing decision making, resource allocation, and overall management.

- This Item is intended to cover all types of businesses, competitive situations, strategic issues, planning approaches, and plans. The requirements explicitly call for a future-oriented basis for action but do not imply formalized planning, planning departments, planning cycles, or a specified way of visualizing the future. Even if your organization is seeking to create an entirely new business situation, it is still necessary to set and to test the objectives that define and guide critical actions and performance.
This Item emphasizes competitive leadership, which usually depends on revenue growth and operational effectiveness. Competitive leadership requires a view of the future that includes not only the markets or segments in which your organization competes but also how it competes. How it competes presents many options and requires that you understand your organization’s and your competitors’ strengths and weaknesses. Although no specific time horizons are included, the thrust of this Item is sustained competitive leadership.

An increasingly important part of strategic planning is projecting the future competitive environment. Such projections help to detect and reduce competitive threats, to shorten reaction time, and to identify opportunities. Depending on the size and type of business, maturity of markets, pace of change, and competitive parameters (such as price or innovation rate), organizations might use a variety of modeling, scenarios, or other techniques and judgments to anticipate the competitive environment.

2.2 Strategy Deployment

Purpose
This Item examines how your organization converts your strategic objectives into action plans to accomplish the objectives and how your organization assesses progress relative to these action plans. The aim is to ensure that your strategies are deployed for goal achievement.

Requirements
You are asked how you develop and deploy action plans that address your organization’s key strategic objectives, including the allocation of needed resources. You are asked to summarize your key short- and longer-term action plans. Particular attention is given to changes in products/services, customers/markets, and how you operate. You also are asked about your key human resource plans that will enable accomplishment of your strategic objectives and action plans.

You are asked to give your key measures/indicators used in tracking progress relative to the action plans and how you use these measures to achieve organizational alignment and coverage of all key work units and stakeholders. Finally, you are asked to provide a projection of key performance measures/indicators. As part of this projection, you are asked how your projected performance compares with competitors’ performance, key benchmarks, goals, and past performance.

Comments
This Item asks how your action plans are developed and deployed. Accomplishment of action plans requires resources and performance measures, as well as the alignment of work unit and supplier/partner plans. Of central importance is how you achieve alignment and consistency—for example, via key processes and key measurements. Also, alignment and consistency are intended to provide a basis for setting and communicating priorities for ongoing improvement activities—part of the daily work of all work units. In addition, performance measures are critical for tracking performance. Action plans include human resource plans that support your overall strategy.

Key changes in your products/services or customers/markets might include Web-based or e-commerce initiatives, integrated within or separate from your current business.

Examples of possible human resource plan elements are

- a redesign of your work organization and/or jobs to increase employee empowerment and decision making
- initiatives to promote greater labor-management cooperation, such as union partnerships
- initiatives to foster knowledge sharing and organizational learning
- modification of your compensation and recognition systems to recognize team, organizational, stock market, customer, or other performance attributes
- education and training initiatives, such as developmental programs for future leaders, partnerships with universities to help ensure the availability of future employees, and establishment of technology-based training capabilities

Projections and comparisons in this Item are intended to encourage your organization to improve its ability to understand and track dynamic, competitive performance factors. Through this tracking process, your organization should be better prepared to take into account its rate of improvement and change relative to competitors’ and relative to your own targets or stretch goals. Such tracking serves as a key diagnostic management tool.

In addition to improvement relative to past performance and competitors’ performance, projected performance also might include changes resulting from new business ventures, entry into new markets, e-commerce initiatives, product/service innovations, or other strategic thrusts.

Customer and Market Focus (Category 3)

Customer and Market Focus addresses how your organization seeks to understand the voices of customers and of the marketplace. The Category stresses relationships as an important part of an overall listening, learning, and performance excellence strategy. Your customer satisfaction and dissatisfaction results provide vital information for understanding your customers and the marketplace. In many cases, such results and trends provide the most meaningful
information, not only on your customers’ views but also on their marketplace behaviors—repeat business and positive referrals.

3.1 Customer and Market Knowledge

Purpose
This Item examines your organization’s key processes for gaining knowledge about your current and future customers and markets, with the aim of offering relevant products and services, understanding emerging customer requirements and expectations, and keeping pace with marketplace changes and changing ways of doing business.

Requirements
You are asked how you determine key customer groups and how you segment your markets. You are asked how you consider potential customers, including your competitors’ customers. You are asked how you determine key requirements for and drivers of purchase decisions and how you determine key product/service features. You also are asked how these determinations include relevant information from current and former customers.

Finally, you are asked how you keep your customer listening and learning methods current with your changing business needs and directions.

Comments
- In a rapidly changing competitive environment, many factors may affect customer preference and loyalty and your interface with customers in the marketplace. This makes it necessary to listen and learn on a continuous basis. To be effective, listening and learning need to be closely linked with your organization’s overall business strategy.

- Knowledge of customer groups and market segments allows your organization to tailor listening and learning strategies and marketplace offerings, to support and tailor your marketing strategies, and to develop new business.

- A relationship strategy may be possible with some customers but not with others. Differing relationships may require distinctly different listening and learning strategies. The use of e-commerce is rapidly changing many marketplaces and may affect your listening and learning strategies, as well as your definition of customer groups and market segments.

- Selection of listening and learning strategies depends on your organization’s key business factors. Increasingly, companies interact with customers via multiple modes. Some frequently used modes include focus groups with key customers; close integration with key customers; interviews with lost customers about their purchase decisions; use of the customer complaint process to understand key product and service attributes; won/lost analysis relative to competitors; and survey/feedback information, including information collected on the Internet.

3.2 Customer Relationships and Satisfaction

Purpose
This Item examines your organization’s processes for building customer relationships and determining customer satisfaction, with the aim of acquiring new customers, retaining existing customers, and developing new market opportunities.

Requirements
You are asked how you build relationships to acquire and satisfy customers and to develop repeat business and positive referrals.

You are asked how you determine key customer contact requirements and how these vary for different modes of access. As part of this response, you are asked to describe key access mechanisms for customers to seek information, conduct business, and make complaints. You are asked how customer contact requirements are deployed along the entire response chain.

You are asked to describe your complaint management process. This description should include how you ensure prompt and effective problem resolution. The description also should cover how all complaints are
aggregated and analyzed for use in improvement throughout your organization and by your partners, as appropriate.

You are asked how you keep your approaches to relationship building and customer access current with your changing business needs and directions.

You are asked how you determine customer satisfaction and dissatisfaction, including how you capture actionable information that reflects customers’ future business and/or positive referral.

You are asked how you follow up with customers regarding products/services and recent transactions to receive prompt and actionable feedback.

You are asked how you obtain and use information on customer satisfaction relative to satisfaction with competitors and/or benchmarks so you can gauge your performance in the marketplace.

Finally, you are asked how you keep your methods for determining customer satisfaction current with your changing business needs and directions.

Comments

■ This Item emphasizes how you obtain actionable information from customers. Information that is actionable can be tied to key product, service, and business processes and be used to determine cost/revenue implications for setting improvement and change priorities.

■ Complaint aggregation, analysis, and root cause determination should lead to effective elimination of the causes of complaints and to setting priorities for process, product, and service improvements. Successful outcomes require effective deployment of information throughout the organization.

■ In determining customers’ satisfaction, a key aspect is their comparative satisfaction with competitors and competing or alternative offerings. Such information might be derived from your own comparative studies or from independent studies. The factors that lead to customer preference are of critical importance in understanding factors that drive markets and potentially affect longer-term competitiveness.

■ Changing business needs and directions might include new modes of customer access, such as the Internet. In such cases, key contact requirements might include online security for customers and access to personal assistance.

Information and Analysis (Category 4)

The Information and Analysis Category is the main point within the Criteria for all key information about effectively measuring and analyzing performance to drive improvement and organizational competitiveness. In the simplest terms, Category 4 is the “brain center” for the alignment of your organization’s operations and its strategic objectives. Central to such use of data and information are their quality and availability. Furthermore, since information and analysis might themselves be primary sources of competitive advantage and productivity growth, the Category also includes such strategic considerations.

4.1 Measurement and Analysis of Organizational Performance

Purpose

This Item examines your organization’s selection, management, and use of data and information for performance measurement and analysis in support of organizational planning and performance improvement. The Item serves as a central collection and analysis point in an integrated performance measurement and management system that relies on financial and nonfinancial data and information. The aim of measurement and analysis is to guide your organization’s process management toward the achievement of key business results and strategic objectives.

Requirements

You are asked how you gather and integrate data and information for monitoring daily operations and supporting organizational decision making and how you select and use measures for tracking those operations and overall organizational performance. You also are asked how you select and use comparative data and information to help drive performance improvement. These requirements address the major components of an effective performance measurement system.

You are asked what analyses you perform to support your senior leaders’ assessment of overall organizational performance and your strategic planning. You are asked how the results of organizational-level analysis are communicated to support decision making throughout your organization and are aligned with your business results, strategic objectives, and action plans.

Finally, you are asked how you keep your organization’s performance measurement system current with changing business needs and directions.

Comments

■ Alignment and integration are key concepts for successful implementation of your performance measurement system. They are viewed in terms of extent and effectiveness of use to meet your performance assessment needs. Alignment and integration include how measures are aligned throughout your organization, how they are integrated to yield organization-wide data/information, and how performance measurement requirements are deployed by your senior leaders to track work group and process-level performance on key measures targeted for organization-wide significance and/or improvement.
The use of comparative data and information is important to all organizations. The major premises for use are (1) your organization needs to know where it stands relative to competitors and to best practices, (2) comparative and benchmarking information often provides the impetus for significant (“breakthrough”) improvement or change, and (3) comparing performance information frequently leads to a better understanding of your processes and their performance. Benchmarking information also may support business analysis and decisions relating to core competencies, alliances, and outsourcing.

Your effective selection and use of comparative data and information require (1) determination of needs and priorities; (2) criteria for seeking appropriate sources for comparisons—from within and outside your organization’s industry and markets; and (3) use of data and information to set stretch goals and to promote major, nonincremental (“breakthrough”) improvements in areas most critical to your organization’s competitive strategy.

Individual facts and data do not usually provide an effective basis for setting organizational priorities. This Item emphasizes that close alignment is needed between your analysis and your organizational performance review and between your analysis and your organizational planning. This ensures that analysis is relevant to decision making and that decision making is based on relevant data and information.

Action depends on understanding cause-effect connections among processes and between processes and business/performance results. Process actions and their results may have many resource implications. Organizations have a critical need to provide an effective analytical basis for decisions because resources for improvement are limited and cause-effect connections are often unclear.

Analyses that your organization conducts to gain an understanding of performance and needed actions may vary widely depending on your type of organization, size, competitive environment, and other factors. Examples of possible analyses include:

- how product and service quality improvement correlates with key customer indicators such as customer satisfaction, customer retention, and market share
- cost/revenue implications of customer-related problems and effective problem resolution
- interpretation of market share changes in terms of customer gains and losses and changes in customer satisfaction
- improvement trends in key operational performance indicators such as productivity, cycle time, waste reduction, new product introduction, and defect levels
- relationships between employee/organizational learning and value added per employee
- financial benefits derived from improvements in employee safety, absenteeism, and turnover
- benefits and costs associated with education and training, including Internet-based, or e-learning, opportunities
- benefits and costs associated with improved organizational knowledge management and sharing
- how the ability to identify and meet employee requirements correlates with employee retention, motivation, and productivity
- cost/revenue implications of employee-related problems and effective problem resolution
- individual or aggregate measures of productivity and quality relative to competitors’
- cost trends relative to competitors’
- relationships among product/service quality, operational performance indicators, and overall financial performance trends as reflected in indicators such as operating costs, revenues, asset utilization, and value added per employee
- allocation of resources among alternative improvement projects based on cost/benefit implications or environmental/community impact
• net earnings derived from quality, operational, and human resource performance improvements
• comparisons among business units showing how quality and operational performance improvement affect financial performance
• contributions of improvement activities to cash flow, working capital use, and shareholder value
• profit impacts of customer retention
• cost/revenue implications of new market entry, including global market entry or expansion
• cost/revenue, customer, and productivity implications of engaging in and/or expanding e-commerce/e-business and use of the Internet and intranets
• market share versus profits
• trends in economic, market, and shareholder indicators of value

■ The availability of electronic data and information of many kinds (e.g., financial, operational, customer-related, accreditation/regulatory) and from many sources (e.g., internal, third party, and public sources; the Internet; Internet tracking software) permits extensive analysis and correlations. Effectively utilizing and prioritizing this wealth of information are significant organizational challenges.

4.2 Information Management

Purpose
This Item examines how your organization ensures the availability of high-quality, timely data and information for all your key users—employees, suppliers/partners, and customers.

Requirements
You are asked how you make data and information available and accessible to your user communities. You are asked how you ensure that the data and information have all the characteristics your users expect: reliability, accuracy, timeliness, and appropriate levels of security and confidentiality.

You also are asked how you ensure that your hardware systems and software are reliable and user friendly so that access is facilitated and encouraged.

Finally, you are asked how you keep your data availability mechanisms, software, and hardware current with changing business needs and directions.

Comments
■ Managing information can require a significant commitment of resources as the sources of data and information grow dramatically. The expanding use of electronic information within organizations’ operations, as part of organizational knowledge networks, from the Internet, and in business-to-business and business-to-consumer communications challenges organizational abilities to ensure reliability and availability in a user-friendly format.

■ Data and information are especially important in business networks, alliances, and supply chains. Your responses to this Item should take into account this use of data and information and should recognize the need for rapid data validation and reliability assurance, given the increasing use of electronic data transfer.

Human Resource Focus (Category 5)

Human Resource Focus addresses key human resource practices—those directed toward creating and maintaining a high-performance workplace and toward developing employees to enable them and your organization to adapt to change. The Category covers human resource development and management requirements in an integrated way, i.e., aligned with your organization’s strategic objectives. Your human resource focus includes your work environment and your employee support climate.

To reinforce the basic alignment of human resource management with overall strategy, the Criteria also cover human resource planning as part of overall planning in the Strategic Planning Category.

5.1 Work Systems

Purpose
This Item examines your organization’s systems for work and jobs, compensation, employee performance management, motivation, recognition, communication, and hiring, with the aim of enabling and encouraging all employees to contribute effectively and to the best of their ability. These systems are intended to foster high performance, to result in individual and organizational learning, and to enable adaptation to change.

Requirements
You are asked how you organize and manage work and jobs to promote cooperation, initiative/innovation, and flexibility. You are asked how you achieve effective communication and knowledge/skill sharing. You also are asked how your managers and supervisors motivate employees to develop and utilize their full potential, including the mechanisms you use to attain job- and career-related learning objectives.

You are asked how your employee performance management system, including feedback to employees, supports high performance and a customer/business focus. This should include how compensation, recognition, and related practices reinforce these objectives.

You are asked how you accomplish effective succession planning for senior leadership and others.

Finally, you are asked how you identify the capabilities needed by potential employees and how you recruit, hire,
and retain new employees. Your considerations should include the ability of your work system to benefit from the diverse ideas and cultures of your communities.

Comments

- High-performance work is characterized by flexibility, innovation, knowledge and skill sharing, alignment with organizational objectives, customer focus, and rapid response to changing business needs and requirements of the marketplace. The focus of this Item is on a workforce capable of achieving high performance. In addition to enabled employees and proper work system design, high-performance work requires ongoing education and training, as well as information systems that ensure proper information flow. To help employees realize their full potential, many organizations use individual development plans prepared with each employee and addressing his/her career and learning objectives.

- Work and job factors for your consideration include simplification of job classifications, cross-training, job rotation, use of teams (including self-directed teams), and changes in work layout and location. Also important is effective communication across functions and work units to ensure a focus on customer requirements and to ensure an environment with trust, knowledge sharing, and mutual respect.

- Compensation and recognition systems should be matched to your work systems. To be effective, compensation and recognition might be tied to demonstrated skills and/or to peer evaluations. Compensation and recognition approaches also might include profit sharing, rewarding exemplary team or unit performance, and linkage to customer satisfaction and loyalty measures or other business objectives.

- The requirements of high-performance work, coupled with the challenges of tight labor markets, necessitate more attention to succession planning and hiring profiles. This should include and capitalize on diversity factors.

5.2 Employee Education, Training, and Development

Purpose

This Item examines the education, training, and on-the-job reinforcement of knowledge and skills of your organization’s workforce, with the aim of meeting ongoing needs of employees and a high-performance workplace.

Requirements

You are asked how education and training tie to your action plans, including how education and training balance short- and longer-term individual and organizational objectives. You are asked how you seek and use input on education and training needs and delivery from those most directly benefitting—employees and their supervisors/managers.

You are asked how you address key organizational needs associated with technological change, management/leadership development, orientation of new employees, safety, performance improvement, and diversity.

You are asked how you deliver and evaluate education and training, taking into account individual and organizational performance. Finally, you are asked how you reinforce knowledge and skills on the job.

Comments

- Depending on the nature of your organization’s work, employees’ responsibilities, and the stage of organizational and personal development, education and training needs might vary greatly. These needs might include gaining skills for knowledge sharing, communications, teamwork, problem solving, interpreting and using data, meeting customer requirements, process analysis and simplification, waste and cycle time reduction, and setting priorities based on strategic alignment or cost/benefit analysis. Education needs also might include basic skills, such as reading, writing, language, arithmetic, and, increasingly, basic computer skills.

- Education and training delivery might occur inside or outside your organization and could involve on-the-job, classroom, computer-based, or distance learning, as well as other types of delivery. Training also might occur through developmental assignments within or outside your organization.

- When you evaluate education and training, you should seek effectiveness measures as a critical part of the evaluation. Such measures might address the impact on individual, unit, and organizational performance; the impact on customer-related performance; and a cost/benefit analysis of the training.
Although this Item does not specifically ask you about training for customer contact employees, such training is important and common. It frequently includes learning critical knowledge and skills in the following areas: your products, services, and customers; how to listen to customers; recovery from problems or failures; and how to effectively manage customer expectations.

5.3 Employee Well-Being and Satisfaction

Purpose
This Item examines your organization’s work environment, your employee support climate, and how you determine employee satisfaction, with the aim of fostering the well-being, satisfaction, and motivation of all employees while recognizing their diverse needs.

Requirements
You are asked how you ensure a safe and healthful work environment for all employees, taking into account their differing work environments and associated requirements. Special emphasis is placed on how employees contribute to identifying important factors and to improving workplace safety. You also are asked to identify appropriate measures and targets for key environmental factors so that status and progress can be tracked.

You are asked how you determine the key factors that affect employee well-being, satisfaction, and motivation. Included is how these factors are segmented for a diverse workforce and different categories/types of employees. In addition, you are asked how your services, benefits, and policies support employee well-being, satisfaction, and motivation based upon a holistic view of this key stakeholder group. Special emphasis is placed on the variety of approaches you use to satisfy a diverse workforce with differing needs and expectations.

You are asked to describe formal and/or informal assessment methods and measures you use to determine employee well-being, satisfaction, and motivation. This description should include how you tailor these methods and measures to a diverse workforce and how you use other indicators (e.g., employee turnover) to support your assessment. Finally, you are asked how you relate assessment findings to key business results to identify key priorities.

Comments
Most organizations, regardless of size, have many opportunities to contribute to employees’ well-being, satisfaction, and motivation. Some examples of services, facilities, activities, and other opportunities are personal and career counseling; career development and employability services; recreational or cultural activities; formal and informal recognition; nonwork-related education; day care; special leave for family responsibilities and/or community service; flexible work hours and benefits packages; outplacement services; and retiree benefits, including extended health care and access to employee services.

Although satisfaction with pay and satisfaction with promotion are important, these two factors generally are not sufficient to ensure overall employee satisfaction, motivation, and high performance. Some examples of other factors to consider are effective employee problem and grievance resolution; employee development and career opportunities; work environment and management support; workload; communication, cooperation, and teamwork; job security; appreciation of the differing needs of diverse employee groups; and organizational support for serving customers.

In addition to direct measures of employee satisfaction and well-being through formal or informal surveys, some other indicators include absenteeism, turnover, grievances, strikes, Occupational Safety and Health Administration (OSHA) reportables, and worker’s compensation claims.

Process Management (Category 6)

Process Management is the focal point within the Criteria for all key work processes. Built into the Category are the central requirements for efficient and effective process management: effective design; a prevention orientation; linkage to suppliers and partners and a focus on supply chain integration; operational performance; cycle time; and evaluation, continuous improvement, and organizational learning.

Agility, cost reduction, and cycle time reduction are increasingly important in all aspects of process management and organizational design. In simplest terms, “agility” refers to your ability to adapt quickly, flexibly, and effectively to changing requirements. Depending on the nature of your organization’s strategy and markets, agility might mean rapid changeover from one product to another, rapid response to changing demands, or the ability to produce a wide range of customized services. Agility also increasingly involves decisions to outsource, agreements with key suppliers, and novel partnering arrangements. Flexibility might demand special strategies, such as implementing modular designs, sharing components, sharing manufacturing lines, and providing specialized training. Cost and cycle time reduction often involve agile process management strategies. It is crucial to utilize key measures for tracking all aspects of your overall process management.

6.1 Product and Service Processes

Purpose
This Item examines your organization’s key product and service design and delivery processes, with the aim of improving your marketplace and operational performance.
Requirements

You are asked to identify your key design processes for products and services and their related production and delivery processes. You are asked how you address key requirements, such as customer/market requirements and new technology, including e-technology. You also are asked how you address key factors in design effectiveness, including cost control, cycle time, and learning from past design projects. Finally, you are asked how you ensure that design processes cover all key operational performance requirements and appropriate coordination and testing to ensure effective product/service launch without need for rework.

You are asked to identify your key production/delivery processes, their key performance requirements, and key performance measures. These requirements and measures are the basis for maintaining and improving your products, services, and production/delivery processes. You also are asked how you perform inspections, tests, and audits to minimize rework and warranty costs, and you are asked about your prevention-based processes for minimizing the need for inspections, tests, and audits. Finally, you are asked how you improve your production/delivery systems and processes to achieve better processes and products/services.

Comments

Your design approaches could differ appreciably depending on the nature of your products/services—whether the products/services are entirely new, variants, or involve major or minor process changes. You should consider the key requirements for your products and services. Factors that might need to be considered in design include safety, long-term performance, environmental impact, “green” manufacturing, measurement capability, process capability, manufacturability, maintainability, variability in customer expectations requiring product/service options, supplier capability, and documentation. Effective design also must consider cycle time and productivity of production and delivery processes. This might involve detailed mapping of manufacturing or service processes and redesigning (“re-engineering”) those processes to achieve efficiency, as well as to meet changing customer requirements.

This Item calls for information on the incorporation of new technology, including e-technology. E-technology might include sharing information with suppliers/partners, communicating with customers and giving them continuous (24/7) access, and automated information transfer from in-service products requiring maintenance in the field.

Many organizations need to consider requirements for suppliers/partners at the design stage. Overall, effective design must take into account all stakeholders in the value chain. If many design projects are carried out in parallel or if your organization’s products utilize parts, equipment, and facilities that are used for other products, coordination of resources might be a major concern, but it also might offer a means to significantly reduce unit costs and time to market.

Coordination of design and production/delivery processes involves all work units and/or individuals who will take part in production/delivery and whose performance materially affects overall process outcome. This might include groups such as R&D, marketing, design, product/process engineering, and key suppliers.

This Item calls for information on the management and improvement of key production/delivery processes. The information required includes a description of the key processes, their specific requirements, and how performance relative to these requirements is determined and maintained. Increasingly, these requirements might include the need for agility—speed and flexibility—to adapt to change.

Specific reference is made to in-process measurements and customer/supplier interactions. These measurements and interactions require the identification of critical points in processes for measurement, observation, or interaction. These activities should occur at the earliest points possible in processes to minimize problems and costs that may result from deviations from expected performance. Achieving expected performance frequently requires setting performance levels or standards to guide decision making. When deviations occur, corrective action is required to restore the performance of the process to its design specifications. Depending on the nature of the process, the corrective action could involve technical and/or human considerations. Proper corrective action involves changes at the source (root cause) of the deviation. Such corrective action should minimize the likelihood of this type of variation occurring again or elsewhere in your organization. When customer interactions are involved, differences among customers must be considered in evaluating how well the process is performing. This might entail allowing for specific or general contingencies, depending on the customer information gathered. This is especially true of professional and personal services.

This Item also calls for information on how processes are improved to achieve better performance. Better performance means not only better quality from your customers’ perspective but also better financial and operational performance—such as productivity—from your organization’s perspective. A variety of process improvement approaches are commonly used. These approaches include (1) sharing successful strategies across your organization, (2) process analysis and research (e.g., process mapping, optimization experiments, error proofing), (3) research and development results, (4) benchmarking, (5) using alternative technology, and (6) using information from customers of the processes—within and outside your organization. Process
improvement approaches might utilize financial data to evaluate alternatives and set priorities. Together, these approaches offer a wide range of possibilities, including complete redesign (“re-engineering”) of processes.

6.2 Business Processes

Purpose
This Item examines your organization’s key nonproduct/nonservice business processes, with the aim of improving business success.

Requirements
You are asked to identify your key business processes and their design requirements. You are asked how your organization’s key business processes are designed and performed to meet all your requirements and how you incorporate input from customers and suppliers/partners, as appropriate.

You are asked to identify your key performance measures for the control and improvement of your business processes, including how in-process measures and customer and supplier feedback are used.

You are asked how you minimize costs associated with inspections, tests, and audits through use of prevention-based processes. Finally, you are asked how you improve your business processes to achieve better performance and to keep them current with your changing business needs and directions.

Comments
- Your key business processes are those nonproduct/nonservice processes that are considered most important to business growth and success by your senior leaders. These processes frequently relate to an organization’s strategic objectives and critical success factors. Key business processes might include processes for innovation, research and development, technology acquisition, information and knowledge management, supply chain management, supplier partnering, outsourcing, mergers and acquisitions, global expansion, project management, and sales/marketing. Given the diverse nature of these processes, the requirements and performance characteristics might vary significantly for different processes.

- For many organizations, supply chain management is a growing factor in achieving productivity and profitability goals and overall business success. Suppliers and partners are receiving increasing strategic attention as organizations re-evaluate their core functions. Supplier processes should fulfill two purposes: to help improve the performance of suppliers and partners and also on specific actions to help them contribute to your organization’s improved performance. Supply chain management might include processes for supplier selection, with the aim of reducing the total number of suppliers and increasing preferred supplier and partnering agreements.

6.3 Support Processes

Purpose
This Item examines your organization’s key support processes, with the aim of improving your overall operational performance.

Requirements
You are asked to identify your key support processes and their design requirements. You are asked how your organization’s key support processes are designed to meet all your requirements and how you incorporate input from internal customers, as appropriate. You also are asked how day-to-day operation of your key support processes ensures meeting the key requirements, including how in-process measures and internal customer feedback are used.

You are asked how you minimize costs associated with inspection, tests, and audits through use of prevention-based processes. Finally, you are asked how you improve your key support processes to achieve better performance and to keep them current with your changing business needs and directions.

Comments
- Your support processes are those that support your daily operations and your product and/or service delivery but are not usually designed in detail with the products and services. The support process requirements usually do not depend significantly on product and service characteristics. Support process design requirements usually depend significantly on your internal requirements, and they must be coordinated and integrated to ensure efficient, effective linkage and performance. Support processes might include finance and accounting, facilities management, legal services, human resource services, public relations, and other administrative services.

- This Item calls for information on how your organization evaluates and improves the performance of your key support processes. Four approaches frequently used are (1) process analysis and research, (2) benchmarking, (3) use of alternative technology, and (4) use of information from customers of the processes. Together, these approaches offer a wide range of possibilities, including complete redesign (“re-engineering”) of processes.

Business Results (Category 7)

The Business Results Category provides a results focus that encompasses your customers’ evaluation of your organization’s products and services, your overall financial and market performance, and results of all key processes and process improvement activities. Through this focus, the Criteria’s purposes—superior value of offerings as viewed by your customers and the marketplace, superior organizational performance as reflected in your operational and financial indicators, and organizational and personal
learning—are maintained. Category 7 thus provides “real-time” information (measures of progress) for evaluation and improvement of processes, products, and services, in alignment with your overall organizational strategy. Item 4.1 calls for analysis of business results data and information to determine your overall organizational performance.

7.1 Customer-Focused Results

Purpose
This Item examines your organization’s customer-focused performance results, with the aim of demonstrating how well your organization has been satisfying your customers and delivering product and service quality that lead to satisfaction, loyalty, and positive referral.

Requirements
You are asked to provide current levels, trends, and appropriate comparisons for key measures/indicators of customer satisfaction and dissatisfaction, including comparisons with your competitors’ levels of customer satisfaction. You are asked to provide data and information on customer loyalty (retention), positive referral, and customer-perceived value. You also are asked to provide levels and trends in key measures/indicators of product and service performance. Such results should be for key drivers of your customers’ satisfaction and retention.

Comments
- This Item focuses on the creation and use of all relevant data to determine and help predict your organization’s performance as viewed by your customers. Relevant data and information include customer satisfaction and dissatisfaction; retention, gains, and losses of customers and customer accounts; customer complaints and warranty claims; customer-perceived value based on quality and price; customer assessment of access and ease of use (including courtesy in service interactions); and awards, ratings, and recognition from customers and independent rating organizations.
- This Item includes measures of product and service performance that serve as indicators of customers’ views and decisions relative to future purchases and relationships. These measures of product and service performance are derived from customer-related information gathered in Items 3.1 and 3.2.
- Product and service measures appropriate for inclusion might be based upon the following: internal quality measurements, field performance of products, data collected from your customers by other organizations on ease of use or other attributes, or customer surveys on product and service performance.
- The correlation between product/service performance and customer indicators is a critical management tool with multiple uses: (1) defining and focusing on key quality and customer requirements; (2) identifying product/service differentiators in the marketplace; and (3) determining cause-effect relationships between your product/service attributes and evidence of customer satisfaction and loyalty, as well as positive referrals. The correlation might reveal emerging or changing market segments, the changing importance of requirements, or even the potential obsolescence of offerings.

7.2 Financial and Market Results

Purpose
This Item examines your organization’s financial and market results, with the aim of understanding your marketplace challenges and opportunities.

Requirements
You are asked to provide levels, trends, and appropriate comparisons for key financial, market, and business indicators. Overall, these results should provide a complete picture of your financial and marketplace success and challenges.

Comments
- Measures reported in this Item are those usually tracked by senior leadership on an ongoing basis to assess your organization’s performance.
- Appropriate financial measures and indicators might include revenue, profits, market position, cash-to-cash cycle time, earnings per share, and returns. Marketplace performance measures might include market share, measures of business growth, new product and geographic markets entered (including exports), entry into e-commerce markets, and the percentage of sales derived from new products.

7.3 Human Resource Results

Purpose
This Item examines your organization’s human resource results, with the aim of demonstrating how well your organization has been creating and maintaining a positive,
productive, learning, and caring work environment for all employees.

Requirements
You are asked to provide current levels, trends, and appropriate comparisons for key measures/indicators of employee well-being, satisfaction, dissatisfaction, and development.

You also are asked to provide data and information on the performance and effectiveness of your organization’s work system.

Comments
- Results reported might include generic or organization-specific factors. Generic factors might include safety, absenteeism, turnover, satisfaction, and complaints (grievances). For some measures, such as absenteeism and turnover, local or regional comparisons might be appropriate.
- Organization-specific factors are those you assess for determining your employees’ well-being and satisfaction. These factors might include the extent of training or cross-training or the extent and success of self-direction.
- Results measures reported for work system performance might include improvement in job classification, job rotation, work layout, and local decision making. Results reported might include input data, such as extent of training, but the main emphasis should be on data that show effectiveness of outcomes.

7.4 Organizational Effectiveness Results

Purpose
This Item examines your organization’s other key operational performance results, with the aim of achieving organizational effectiveness, attaining key organizational goals, and demonstrating good organizational citizenship.

Requirements
You are asked to provide current levels, trends, and appropriate comparisons for key measures/indicators of operational and strategic performance that support the ongoing achievement of results reported in Items 7.1 through 7.3.

You also are asked to provide data and information on your organization’s regulatory/legal compliance and citizenship.

Comments
- This Item encourages your organization to develop and include unique and innovative measures to track business development and operational improvement. However, all key areas of business and operational performance should be evaluated by measures that are relevant and important to your organization.
- Measures/indicators of operational effectiveness and efficiency might include reduced emission levels, waste stream reductions, by-product use, and recycling; internal responsiveness indicators such as cycle times, production flexibility, lead times, set-up times, and time to market; business-specific indicators such as innovation rates and increased use of e-technology, product/process yields, and delivery performance to request; supply chain indicators such as reductions in inventory and/or incoming inspections, increases in quality and productivity, improvements in electronic data exchange, and reductions in supply chain management costs; third-party assessment results such as ISO 9000 audits; and indicators of strategic goal achievement.
- Measures should include environmental and regulatory compliance and noteworthy achievements in these areas, as appropriate. Results also should include indicators of support for key communities and other public purposes.
- If your organization has received sanctions or adverse actions under law, regulation, or contract during the past three years, the incidents and their current status should be summarized.
The scoring of responses to Criteria Items (Items) and Award applicant feedback are based on three evaluation dimensions: (1) Approach, (2) Deployment, and (3) Results. Criteria users need to furnish information relating to these dimensions. Specific factors for these dimensions are described below. Scoring Guidelines are given on page 48.

**Approach**

“Approach” refers to how you address the Item requirements—the method(s) used. The factors used to evaluate approaches include:

- the appropriateness of the methods to the requirements
- the effectiveness of use of the methods and the degree to which the approach
  - is repeatable, integrated, and consistently applied
  - embodies evaluation/improvement/learning cycles
  - is based on reliable information and data
- alignment with your organizational needs
- evidence of beneficial innovation and change

**Deployment**

“Deployment” refers to the extent to which your approach is applied. The factors used to evaluate deployment include:

- use of the approach in addressing Item requirements relevant and important to your organization
- use of the approach by all appropriate work units

**Results**

“Results” refers to outcomes in achieving the requirements given in Items 7.1–7.4. The factors used to evaluate results include:

- your current performance
- your performance relative to appropriate comparisons and/or benchmarks
- rate and breadth of your performance improvements
- linkage of your results measures to important customer, market, process, and action plan performance requirements identified in your Organizational Profile and in Approach-Deployment Items

**Item Classification and Scoring Dimensions**

Items are classified according to the kinds of information and/or data you are expected to furnish relative to the three evaluation dimensions given above.

The two types of Items and their designations are

1. Approach-Deployment
2. Results

Approach and Deployment are linked to emphasize that descriptions of Approach should always indicate the Deployment—consistent with the specific requirements of the Item. Although Approach and Deployment dimensions are linked, feedback to Award applicants reflects strengths and/or opportunities for improvement in either or both dimensions.

Results Items call for data showing performance levels, relevant comparative data, and improvement trends for key measures/indicators of organizational performance. Results Items also call for data on breadth of performance improvements, i.e., on how widespread your improvement results are. This is directly related to the Deployment dimension; if improvement processes are widely deployed, there should be corresponding results. A score for a Results Item is thus a composite based upon overall performance, taking into account the rate and breadth of improvements and their importance. (See next paragraph.)

**“Importance” as a Scoring Factor**

The three evaluation dimensions described previously are critical to evaluation and feedback. However, another critical consideration in evaluation and feedback is the importance of your reported Approach, Deployment, and Results to your key business factors. The areas of greatest importance should be identified in your Organizational Profile and in Items such as 2.1, 2.2, 3.1, 6.1, 6.2, and 7.4. Your key customer requirements and key strategic objectives and action plans are particularly important.

**Assignment of Scores to Your Responses**

The following guidelines should be observed in assigning scores to your Item responses:

- All Areas to Address should be included in your Item response. Also, responses should reflect what is important to your organization.
- In assigning a score to an Item, first decide which scoring range (e.g., 50 percent to 60 percent) best fits the overall Item response. Overall “best fit” does not require total agreement with each of the statements for that scoring range. Assigning the actual score within the range requires evaluating whether the Item response is closer to the statements in the next higher or next lower scoring range.
- An Approach-Deployment Item score of 50 percent represents an approach that meets the overall objectives of the Item and that is deployed to the principal activities and work units covered in the Item. Higher scores reflect maturity (cycles of improvement), integration, and broader deployment.
- A Results Item score of 50 percent represents a clear indication of improvement trends and/or good levels of performance in the principal results areas covered in the Item. Higher scores reflect better improvement rates and/or levels of performance, better comparative performance, and broader coverage and integration with business requirements.
<table>
<thead>
<tr>
<th>SCORE</th>
<th>APPROACH-DEPLOYMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>0%</td>
<td>- No systematic approach is evident; information is anecdotal.</td>
</tr>
</tbody>
</table>
| 10% to 20% | - The beginning of a systematic approach to the basic requirements of the Item is evident.  
- Major gaps exist in deployment that would inhibit progress in achieving the basic requirements of the Item.  
- Early stages of a transition from reacting to problems to a general improvement orientation are evident. |
| 30% to 40% | - An effective, systematic approach, responsive to the basic requirements of the Item, is evident.  
- The approach is deployed, although some areas or work units are in early stages of deployment.  
- The beginning of a systematic approach to evaluation and improvement of basic Item processes is evident. |
| 50% to 60% | - An effective, systematic approach, responsive to the overall requirements of the Item and your key business requirements, is evident.  
- The approach is well deployed, although deployment may vary in some areas or work units.  
- A fact-based, systematic evaluation and improvement process is in place for improving the efficiency and effectiveness of key processes.  
- The approach is aligned with your basic organizational needs identified in the other Criteria Categories. |
| 70% to 80% | - An effective, systematic approach, responsive to the multiple requirements of the Item and your current and changing business needs, is evident.  
- The approach is well deployed, with no significant gaps.  
- A fact-based, systematic evaluation and improvement process and organizational learning/sharing are key management tools; there is clear evidence of refinement and improved integration as a result of organizational-level analysis and sharing.  
- The approach is well integrated with your organizational needs identified in the other Criteria Categories. |
| 90% to 100% | - An effective, systematic approach, fully responsive to all the requirements of the Item and all your current and changing business needs, is evident.  
- The approach is fully deployed without significant weaknesses or gaps in any areas or work units.  
- A very strong, fact-based, systematic evaluation and improvement process and extensive organizational learning/sharing are key management tools; strong refinement and integration, backed by excellent organizational-level analysis and sharing, are evident.  
- The approach is fully integrated with your organizational needs identified in the other Criteria Categories. |

<table>
<thead>
<tr>
<th>SCORE</th>
<th>RESULTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>0%</td>
<td>- There are no results or poor results in areas reported.</td>
</tr>
</tbody>
</table>
| 10% to 20% | - There are some improvements and/or early good performance levels in a few areas.  
- Results are not reported for many to most areas of importance to your organization’s key business requirements. |
| 30% to 40% | - Improvements and/or good performance levels are reported in many areas of importance to your organization’s key business requirements.  
- Early stages of developing trends and obtaining comparative information are evident.  
- Results are reported for many to most areas of importance to your organization’s key business requirements. |
| 50% to 60% | - Improvement trends and/or good performance levels are reported for most areas of importance to your organization’s key business requirements.  
- No pattern of adverse trends and no poor performance levels are evident in areas of importance to your organization’s key business requirements.  
- Some trends and/or current performance levels—evaluated against relevant comparisons and/or benchmarks—show areas of strength and/or good to very good relative performance levels.  
- Business results address most key customer, market, and process requirements. |
| 70% to 80% | - Current performance is good to excellent in areas of importance to your organization’s key business requirements.  
- Most improvement trends and/or current performance levels are sustained.  
- Many to most trends and/or current performance levels—evaluated against relevant comparisons and/or benchmarks—show areas of leadership and very good relative performance levels.  
- Business results address most key customer, market, process, and action plan requirements. |
| 90% to 100% | - Current performance is excellent in most areas of importance to your organization’s key business requirements.  
- Excellent improvement trends and/or sustained excellent performance levels are reported in most areas.  
- Evidence of industry and benchmark leadership is demonstrated in many areas.  
- Business results fully address key customer, market, process, and action plan requirements. |

For definitions of the following key terms, see pages 29–33: anecdotal, basic requirements, integration, multiple requirements, overall requirements, and systematic.
Steps toward a Mature Process Approach
An Aid for Scoring Approach-Deployment Items

(1) Reacting to Problems
Operations are characterized by activities rather than by processes, and they are largely responsive to immediate needs or problems.

(2) Early Systematic Approach
The organization is at the beginning stages of conducting operations by processes with repeatability, evaluation and improvement, and some coordination among organizational units.

(3) Aligned Approach
Operations are characterized by processes that are repeatable and regularly evaluated for improvement, with learnings shared and with coordination among organizational units.

(4) Integrated Approach
Operations are characterized by processes that are repeatable and regularly evaluated for change and improvement in collaboration with other affected units. Efficiencies across units are sought and achieved.
The guidelines given in this section are offered to assist Criteria users in responding most effectively to the requirements of the 18 Criteria Items. Writing an application for the Baldrige Award involves responding to these requirements in 50 or fewer pages.

The guidelines are presented in three parts:

1. General Guidelines regarding the Criteria booklet, including how the Items are formatted
2. Guidelines for Responding to Approach-Deployment Items
3. Guidelines for Responding to Results Items

**General Guidelines**

1. **Read the entire Criteria booklet.**
   The main sections of the booklet provide an overall orientation to the Criteria, including how responses are to be evaluated for self-assessment or by Award Examiners.
   You should become thoroughly familiar with the following sections:
   - Criteria for Performance Excellence (pages 10–28)
   - Scoring information (pages 47–49)

2. **Review the Item format and understand how to respond to the Item requirements.**
   The Item format (see figure below) shows the different parts of Items, the role of each part, and where each part is placed. It is especially important to understand the Areas to Address and the Item Notes. Each Item and Area to Address is described in greater detail in a separate section (pages 34–46).

   Each Item is classified either **Approach-Deployment** or **Results**, depending on the type of information required. Guidelines for responding to Approach-Deployment Items are given on pages 51–52. Guidelines for responding to Results Items are given on pages 52–53.

   Item requirements are presented in question format. Some questions include modifying statements. Responses to an Item should contain answers to all questions and to modifying statements; however, each question need not be answered separately. Responses to multiple questions within a single Area to Address may be grouped, as appropriate to your organization.

---

N1. Action plan development and deployment are closely linked to other items in the Criteria. Examples of key linkages are:
- Item 1.1 for how your senior leaders set and communicate directions.
- Category 5 for gathering customer and market knowledge as input to your strategy and action plans.
- Category 4 for information and analysis to support your key information needs; to support your development of strategy; to provide an effective base for your performance measurements; and to track progress relative to your strategic objectives and action plans.

N2. Measures/indicators of projected performance (2.2b) might include changes resulting from new business ventures; business acquisitions; new value creation; market entry and shifts; and significant anticipated innovations in products, services, and technology.
3. Start by preparing the Organizational Profile.

The Organizational Profile is the most appropriate starting point for initiating a self-assessment or for writing an application. The Organizational Profile is intended to help everyone—including organizations using the Criteria for self-assessment, application writers, and reviewers—to understand what is most relevant and important to your organization's business and to its performance. The questions to address in responding to the Organizational Profile are on pages 10–11.

Guidelines for Responding to Approach-Deployment Items

Although the Criteria focus on key performance results, these results by themselves offer little diagnostic value. For example, if some results are poor or are improving at rates slower than your competitors', it is important to understand why this is so and what might be done to accelerate improvement.

The purpose of Approach-Deployment Items is to permit diagnosis of your organization’s most important processes—the ones that yield fast-paced organizational performance improvement and contribute to key business results. Diagnosis and feedback depend heavily on the content and completeness of Approach-Deployment Item responses. For this reason, it is important to respond to these Items by providing your key process information. Guidelines for organizing and reviewing such information follow.

1. Understand the meaning of “how.”

Approach-Deployment Items include questions that begin with the word “how.” Responses should outline your key process information, such as methods, measures, deployment, and evaluation/improvement/learning factors. Responses lacking such information, or merely providing an example, are referred to in the Scoring Guidelines as “anecdotal information.”

2. Understand the meaning of “what.”

Two types of questions in Approach-Deployment Items begin with the word “what.” The first type of question requests basic information on key processes and how they work. Although it is helpful to include who performs the work, merely stating who does not permit diagnosis or feedback. The second type of question requests information on what your key findings, plans, objectives, goals, or measures are. These questions set the context for showing alignment in your performance management system. For example, when you identify key strategic objectives, your action plans, human resource development plans, some of your results measures, and results reported in Category 7 should be expected to relate to the stated strategic objectives.

3. Write and review response(s) with the following guidelines and comments in mind.

- Show that activities are systematic.
  Approaches that are systematic are repeatable and use data and information so that improvement and learning are possible. In other words, approaches are systematic if they build in the opportunity for evaluation and learning and thereby permit a gain in maturity.

- Show deployment.
  Deployment information should summarize what is done in different parts of your organization. Deployment can be shown compactly by using tables.

- Show focus and consistency.
  There are four important factors to consider regarding focus and consistency: (1) the Organizational Profile should make clear what is important; (2) the Strategic Planning Category, including the strategic objectives and action plans, should highlight areas of greatest focus and describe how deployment is accomplished; (3) descriptions of organizational-level analysis and review (Items 4.1 and 1.1) should show how your organization analyzes and reviews performance information to set priorities; and (4) the Process Management Category should highlight processes that are key to your overall performance. Showing focus and consistency in the Approach-Deployment Items and tracking corresponding measures in the Results Items should improve business performance.

- Respond fully to Item requirements.
  Missing information will be interpreted as a gap in approach and/or deployment. All Areas to Address should be addressed. Individual components of an Area to Address may be addressed individually or together.

As much as possible, each Item response should be self-contained. However, responses to different Items might be mutually reinforcing. It is then appropriate to refer to the other responses rather than to repeat information. In such cases, key process information should be given in the Item requesting this information. For example, employee education and training should be described in detail in Item 5.2. Discussions about education and training elsewhere in your application would then reference but not repeat details given in your Item 5.2 response.

5. Use a compact format.

Applicants should make the best use of the 50 application pages permitted. Applicants are encouraged to use flowcharts, tables, and “bullets” to present information concisely.

6. Refer to the Scoring Guidelines.

Considerations in the evaluation of Item responses include the Criteria Item requirements and the maturity of the approaches, breadth of deployment, alignment with other elements of your performance management system, and strength of the improvement process relative to the Scoring Guidelines. Therefore, you need to consider both the Criteria and the Scoring Guidelines.

Guidelines for Responding to Results Items

The Criteria place the greatest emphasis on results. The following information, guidelines, and example relate to effective and complete reporting of results.

1. Focus on the most critical business results.

Results reported should cover the most important requirements for your business success, highlighted in your Organizational Profile and in the Strategic Planning and Process Management Categories.

2. Note the meaning of the four key requirements from the Scoring Guidelines for effective reporting of results data:

   - **trends** to show directions of results and rates of change
   - **performance** levels on a meaningful measurement scale
   - **comparisons** to show how results compare with those of other, appropriately selected organizations
   - **breadth and importance of results** to show that all important results are included

3. Include trend data covering actual periods for tracking trends.

   No minimum period of time is specified for trend data. Trends might span five years or more for some results. For important results, new data should be included even if trends and comparisons are not yet well established.

4. Use a compact format—graphs and tables.

   Many results can be reported compactly by using graphs and tables. Graphs and tables should be labeled for easy interpretation. Results over time or compared with others should be “normalized,” i.e., presented in a way (such as use of ratios) that takes into account various size factors. For example, reporting safety trends in terms of lost work days per 100 employees would be more meaningful than total lost work days if the number of employees has varied over the time period or if you are comparing your results to organizations differing in size.

5. Integrate results into the body of the text.

   Discussion of results and the results themselves should be close together in an Award application. *Trends that show a significant positive or negative change should be explained.* Use figure numbers that correspond to Items. For example, the third figure for Item 7.1 would be Figure 7.1-3. (See the example in the figure that follows.)

   The following graph illustrates data an organization might present as part of a response to Item 7.1, Customer-Focused Results. In the Organizational Profile, the organization has indicated on-time delivery as a key customer requirement.
Using the graph, the following characteristics of clear and effective data reporting are illustrated:

- A figure number is provided for reference to the graph in the text.
- Both axes and units of measure are clearly labeled.

- Trend lines report data for a key customer requirement—on-time delivery.
- Results are presented for several years.
- Appropriate comparisons are clearly shown.
- The company shows, using a single graph, that its three divisions separately track on-time delivery.

To help interpret the Scoring Guidelines (page 48), the following comments on the graphed results would be appropriate:

- The current overall company performance level is excellent. This conclusion is supported by the comparison with industry competitors and with a “world-class” level.
- The company shows excellent improvement trends.
- Division A is the current performance leader—showing sustained high performance and a slightly positive trend. Division B shows rapid improvement. Its current performance is near that of the best industry competitor but trails the “world-class” level.
- Division C—a new division—is having early problems with on-time delivery. (The company briefly should explain these early problems.)
The Malcolm Baldrige National Quality Award is an annual Award to recognize U.S. organizations for performance excellence.

**Award Purpose**
The Award promotes
- awareness of performance excellence as an increasingly important element in competitiveness
- information sharing of successful performance strategies and the benefits derived from using these strategies

**Award Participation**
The Award eligibility categories include
- manufacturing businesses
- service businesses
- small businesses
- education organizations
- health care organizations

Copies of the Education Criteria and Health Care Criteria are available, and ordering information can be found on page 56.

Three awards may be given in each category each year.

To participate in the Award process, an organization must submit an application package that addresses the Criteria for Performance Excellence (pages 10–28).

**Application Requirements**
Applicants need to submit an application package that consists of three parts:
- a validated Eligibility Certification Form
- a completed Application Form
- an application report consisting of an Organizational Profile and responses to the Criteria

Detailed information and the necessary forms are contained in the *Baldrige Award Application Forms* booklet. Ordering instructions for this booklet are given on page 56.

**Application Review**
Applications are reviewed and evaluated by members of the Board of Examiners, who adhere to strict rules regarding conflict of interest, in a four-stage process:

- Stage 1 - independent review and evaluation by at least six members of the board
- Stage 2 - consensus review and evaluation for applications that score well in Stage 1
- Stage 3 - site visits to applicants that score well in Stage 2
- Stage 4 - Judges’ review and recommendations of Award recipients

**Feedback to Applicants**
Each Award applicant receives a feedback report at the conclusion of the review process. The feedback report is a written assessment by an evaluation team of leading U.S. experts.

The feedback report contains an applicant-specific listing of strengths and opportunities for improvement based on the Criteria. Used by companies, education organizations, and health care organizations as part of their strategic planning processes, the feedback report helps organizations focus on their customers and improve overall performance. Feedback is one of the most important parts of the Baldrige Award process; it provides a pathway for improvement.

Feedback reports are mailed at various times during the Award cycle, based on the stage of review an application reaches in the evaluation process. Strict confidentiality is observed at all times and in every aspect of application review and feedback.

**Award Recipients**
Award recipients may publicize and advertise their Awards. Recipients are expected to share information about their successful performance strategies with other U.S. organizations.

If your organization is applying in the education or health care category, refer to the appropriate sector-specific Criteria booklet and the *Baldrige Award Application Forms*. Ordering information is on page 56.
SUMMARY OF BUSINESS ELIGIBILITY CATEGORIES AND RESTRICTIONS

Important Facts about Applying for the Award
- Criteria contained in this booklet should be used only for the business eligibility categories (manufacturing, service, and small business).
- The following is a summary of the eligibility rules for the business categories. Summaries of the eligibility rules for the education and health care categories are in their respective Criteria booklets. For-profit education or health care organizations may apply under the service or small business categories, as appropriate, using these Criteria or under the health care or education categories, using their respective Criteria. If there is a question on eligibility, check the complete eligibility rules in the Baldrige Award Application Forms or call the Baldrige National Quality Program Office at (301) 975-2036.
- Whatever your Award eligibility category, you will need to obtain a copy of the Baldrige Award Application Forms before proceeding. Ordering instructions are given on page 56.

Basic Eligibility
Public Law 100-107 establishes the three business eligibility categories for the Award: manufacturing, service, and small business. Any for-profit business and some subunits headquartered in the United States or its territories, including U.S. subunits of foreign companies, may apply for the Award. Eligibility is intended to be as open as possible. For example, publicly or privately owned organizations, domestic or foreign-owned entities, joint ventures, corporations, sole proprietorships, and holding companies may apply. Not eligible in the business category are local, state, and federal government agencies; trade associations; professional societies; and not-for-profit organizations.

Business Award Eligibility Categories
Manufacturing: Companies or some subunits (see section below on subunits) that produce and sell manufactured products or manufacturing processes and producers of agricultural, mining, or construction products.
Service: Companies or some subunits (see section below on subunits) that sell services.
Small Business: Companies or some subunits engaged in manufacturing and/or the provision of services that have 500 or fewer employees.

Eligibility of Subunits
A subunit is a unit or division of a larger (parent) company. Subunits of companies in the manufacturing or service eligibility categories might be eligible. To be eligible, the subunit must have more than 500 employees, or have more than 25 percent of the employees of the parent, or have been independent prior to being acquired by its parent. In the last case, it must continue to operate largely independently under its own identity.

The subunit must be self-sufficient enough to be examined in all seven Criteria Categories, and it must be a discrete business entity that is readily distinguishable from other parts of the parent organization. It cannot be primarily an internal supplier to other units in the parent company or be a business support function (e.g., sales, distribution, legal services).

Other Restrictions on Eligibility
Location: Although an applicant may have facilities outside the United States or its territories, or it may receive support from its parent, in the event of a site visit, the applicant must ensure that the appropriate people and information are available for examination in the United States. This information is needed to document the operational practices associated with all of its major business functions. In the event that the applicant receives the Award, it must be able to share information on the seven Criteria Categories at the Quest for Excellence Conference and at its U.S. facilities. Sharing beyond the Quest for Excellence Conference is on a voluntary basis.

Multiple-Application Restrictions: A subunit and its parent may not both apply for Awards in the same year. In some cases, more than one subunit of a parent may apply. If the size of the parent, including all of its subunits, is
- 0–1000 employees, 1 applicant per parent per eligibility category may apply
- 1001–20,000 employees, 2 applicants per parent per eligibility category may apply
- over 20,000 employees, 2 applicants per parent per eligibility category for the first 20,000, plus 1 per 20,000 or fraction thereof above 20,000 per eligibility category, may apply

Future Eligibility Restrictions: If an organization or a subunit that has more than 50 percent of the total employees of the parent receives an Award, the organization and all its subunits are ineligible to apply for another Award for a period of five years. If a subunit receives an Award, that subunit and all its subunits are ineligible to apply for another Award for a period of five years. After five years, Award recipients are eligible to reapply for the Award or to reapply “for feedback only.”

Eligibility Forms
Potential applicants must certify their eligibility prior to applying for the Award. Potential applicants for the 2002 Award are encouraged to submit their Eligibility Forms as early as possible after they are available but no later than April 16, 2002. This form is contained in the Baldrige Award Application Forms.
Note: If you are planning to apply for the Award, you will need the Baldrige Award Application Forms in addition to the Criteria booklet.

Individual Orders
Individual copies of the Criteria booklets and the Baldrige Award Application Forms can be obtained free of charge from Baldrige National Quality Program National Institute of Standards and Technology Administration Building, Room A600 100 Bureau Drive, Stop 1020 Gaithersburg, MD 20899-1020 Telephone: (301) 975-2036 Fax: (301) 948-3716 E-mail: nqp@nist.gov Web site: www.quality.nist.gov

Bulk Orders
Multiple copies of the 2002 Criteria for Performance Excellence booklets may be ordered in packets of 10 for $29.95 plus shipping and handling from the American Society for Quality (ASQ). 2002 Business Criteria—Item Number T1108 2002 Education Criteria—Item Number T1109 2002 Health Care Criteria—Item Number T1110

How to Order
ASQ offers four convenient ways to order:

- For fastest service, call toll free (800) 248-1946 in the United States and Canada (in Mexico, dial toll free 95-800-248-1946). Have item numbers, your credit card or purchase order number, and (if applicable) ASQ member number ready.

- Or fax your completed order form to ASQ at (414) 272-1734.

- Or mail your order to ASQ Customer Service Department, P.O. Box 3066, Milwaukee, WI 53201-3066.

Payment
Your payment options include check, money order, U.S. purchase order, VISA, MasterCard, or American Express. Payment must be made in U.S. currency; checks and money orders must be drawn on a U.S. financial institution. All international orders must be prepaid. Please make checks payable to ASQ.

Shipping Fees
The following shipping and processing schedule applies to all orders within the United States and Canada.

<table>
<thead>
<tr>
<th>Order Amount</th>
<th>U.S. Charges</th>
<th>Canadian Charges</th>
</tr>
</thead>
<tbody>
<tr>
<td>0–$34.99</td>
<td>$ 4.25</td>
<td>$ 9.25</td>
</tr>
<tr>
<td>$35.00–$99.99</td>
<td>6.50</td>
<td>11.50</td>
</tr>
<tr>
<td>Over $100.00</td>

<td>17.50*</td>
</tr>
</tbody>
</table>

- There is a shipping and processing charge of 25 percent of the total order amount for shipments outside the United States and Canada.

- Orders shipped within the continental United States and Canada where UPS service is available will be shipped UPS.

- Please allow one to two weeks for delivery. International customers, please allow six to eight weeks for delivery.

- Your credit card will not be charged until your items are shipped. Shipping and processing are charged one time, up front, for the entire order.

*If actual shipping charges exceed $12.50 ($17.50 Canadian), ASQ will invoice the customer for the additional expense.

Baldrige Educational Materials
Each year, the Baldrige National Quality Program develops materials for training members of the Board of Examiners and for sharing information on the successful performance excellence strategies of the Award recipients. The following items are a sample of the educational materials that may be ordered from ASQ.

Case Studies
The case studies are used to prepare Examiners for the interpretation of the Criteria and the Scoring System. The case studies, when used with the Criteria, illustrate the Award application and review process. The case study packet contains the case study and six additional documents: an executive summary, the related Criteria for Performance Excellence booklet, the case study scorebook, the case study feedback report, the Handbook for the Board of Examiners, and the Scorebook for Business, Education, and Health Care. These documents provide information related to scoring, Criteria responses, examination processes, and site visit procedures, as well as illustrate the format for an application. A variety of case study packets are available, including the following:

   Item Number T1091: $49.95 plus shipping and handling

2000 Education Case Study Packet: Coyote Community College (based on the 2000 Education Criteria for Performance Excellence)

   Item Number T1090: $49.95 plus shipping and handling

1999 Business Case Study Packet: Collin Technologies (based on the 1999 Criteria for Performance Excellence)

   Item Number T1079: $49.95 plus shipping and handling

   Item Number T1083: $49.95 plus shipping and handling

Award Recipients’ Videos
The Award recipients’ videos are a valuable resource for gaining a better understanding of performance excellence and quality achievement. The videos provide background information on the Baldrige National Quality Program, highlights from the annual Award ceremony, and interviews with representatives from the Award recipients’ organizations. Information on the 2001 Award recipients’ video is provided below. Videos about Award recipients from other years also are available from ASQ.

2001—Item Number TA998 $ 20.00
(Available May 2002)

How to Order Educational Materials
To order a Case Study Packet (TriView National Bank, Coyote Community College, Collin Technologies, Gemini Home Health Services, or others), bulk orders of the 2002 Criteria booklet, or the Award recipients’ videos, contact ASQ Customer Service Department

Fees for the 2002 Award Cycle

Eligibility Certification Fees
The eligibility certification fee is $150 for all potential business applicants. This fee is nonrefundable.

Application Fees
- manufacturing business category—$5000
- service business category—$5000
- small business category—$2000
- supplemental sections—$2000

Detailed information on fees is given in the Baldrige Award Application Forms.

Site Visit Review Fees
Site visit review fees will be set when the visits are scheduled. Fees depend on the number of Examiners assigned and the duration of the visit. Site visit review fees for applicants in the small business category will be charged at one-half of the rate charged for applicants in the manufacturing and service categories. These fees are paid only by those applicants reaching the site visit stage.

Eligibility Forms due—April 16, 2002
Award Applications due—May 30, 2002
The Findings and Purposes Section of Public Law 100-107 states that

1. the leadership of the United States in product and process quality has been challenged strongly (and sometimes successfully) by foreign competition, and our Nation’s productivity growth has improved less than our competitors’ over the last two decades.

2. American business and industry are beginning to understand that poor quality costs companies as much as 20 percent of sales revenues nationally and that improved quality of goods and services goes hand in hand with improved productivity, lower costs, and increased profitability.

3. strategic planning for quality and quality improvement programs, through a commitment to excellence in manufacturing and services, are becoming more and more essential to the well-being of our Nation’s economy and our ability to compete effectively in the global marketplace.

4. improved management understanding of the factory floor, worker involvement in quality, and greater emphasis on statistical process control can lead to dramatic improvements in the cost and quality of manufactured products.

5. the concept of quality improvement is directly applicable to small companies as well as large, to service industries as well as manufacturing, and to the public sector as well as private enterprise.

6. in order to be successful, quality improvement programs must be management-led and customer-oriented, and this may require fundamental changes in the way companies and agencies do business.

7. several major industrial nations have successfully coupled rigorous private-sector quality audits with national awards giving special recognition to those enterprises the audits identify as the very best; and

8. a national quality award program of this kind in the United States would help improve quality and productivity by

   A. helping to stimulate American companies to improve quality and productivity for the pride of recognition while obtaining a competitive edge through increased profits;

   B. recognizing the achievements of those companies that improve the quality of their goods and services and providing an example to others;

   C. establishing guidelines and criteria that can be used by business, industrial, governmental, and other organizations in evaluating their own quality improvement efforts; and

   D. providing specific guidance for other American organizations that wish to learn how to manage for high quality by making available detailed information on how winning organizations were able to change their cultures and achieve eminence.”
The National Institute of Standards and Technology (NIST) is a nonregulatory federal agency within the Commerce Department’s Technology Administration. NIST’s primary mission is to develop and promote measurement, standards, and technology to enhance productivity, facilitate trade, and improve the quality of life. The Baldrige National Quality Program (BNQP) at NIST is a customer-focused federal change agent that enhances the competitiveness, quality, and productivity of U.S. organizations for the benefit of all citizens. BNQP develops and disseminates evaluation criteria and manages the Malcolm Baldrige National Quality Award. It also provides global leadership in promoting performance excellence and in the learning and sharing of successful performance practices, principles, and strategies.

Call BNQP for
