

# Report Out Slides

Presented To: Community Resilience Panel

Date: November 9, 2015

## Gaps and Needs in Sector

- What are the largest gaps and needs within your sector that need to be addressed in resilience planning and guidance products?
  - Specific guidance needed based on future conditions and scenarios
  - Need to deal with uncertainty
  - Need to address risk communication
  - Capacity of technical expertise for smaller communities
  
- Identify significant interdependencies and gaps with other sectors that impact resilience.
  - We see ourselves as an integrating group that will engage with other groups (e.g., economic) to make sure the cross-coordinating occurs

## How do we Solve the Problems?

- How do we address the needs and gaps we identified?
  - Need to define what data is needed and in what format to use cross-sector
  - Develop list of prioritized questions for this group to address and vet those with other committees
  
- Are there others we need to engage to help us address these needs? Others may include SMEs/groups not at the meeting in your sector or SMEs/groups from other sectors.
  - Yes! Insurance and legal perspectives. State and local representation. Tribal and territories. Federal gov'ts and agencies working in resilience. Associations. Private industry.

# Existing Guidance/Ongoing Efforts for Resilience in Sector

- What are existing codes, standards, guidance, goals, and/or protocol that have been published, or are in-process, in your respective sectors?
