Subject: AMTech Comments

To whom it may concern,

- 1) Make certain that each research project has an active commercializer with the competence and resources to take it to market. To many projects die on the vine.
- 2) Protect United States interests from foreign theft of intellectual property. This country is bankrupt.
- 3) Be an example of good stewardship for other government agencies to follow. Use my and your hard earned tax dollars for the good of the people.

I trust this will be helpful.

Thanks,

Wesley Koops
President
