Subject: Developing a Framework to Improve Critical Infrastructure Cybersecurity

Hello,

I work for the US Dept of the interior, Bureau of Land Management. Part of my job is to perform security assessments on major applications run by the bureau. DOI is attempting to use the CSC in its initial implementation of the Continuous Monitoring Requirement, since we
cannot continuous monitor everything, the top twenty seems to be a logical choice. I would also like to see the corresponding controls that map to CSC be listed as the base Assurance controls in 800-53.

Thanks

Pete Hitchcock
