Greetings,

Thank you for such a tremendous effort and achievement of the NIST Cybersecurity Framework 2.0. I am very excited to get involved and contribute to this project in any way that I can. I started to research the Cybersecurity Domain in detail this year and have grown tremendously. I find the NIST framework to be a viable solution to majority of risk that I have encountered. Reading about this enhancement to add Govern to the list is a gamechanger. It is one of the main areas that I found to be essential for a successful Security Program. Corporate Governance should be on top of the list and Security Governance should align tightly to Corporate Governance to add value to the corporation and to support the corporation's goals and objectives.

Please let me know how I can get more involved in this process..

Best regards,

Johnny Sandaire PhD, CISSP, PMP, MCAD, CC, OpenFair
SVP of Cybersecurity R&D
