Subject: NIST CSF 1.1 and CERT-RMM
To: cyberframework@nist.gov

Hello,

We are an SEI partner, and we use the Software Engineering Institute, Carnegie Mellon University's
CERT Resilience Management Model. I am reviewing NIST CSF 1.1's core framework, and I notice that
the elements are not mapped to CERT-RMM. Since CERT-RMM is the basis of the Cyber Resilience
Review, for instance, it seems that it would make sense to be able to show traceability from CSF to
CERT-RMM.

Are there any plans to perform this mapping? Thank you in advance for your assistance.
