Subject: Inclusion of 800-171 References
To: "cyberframework@nist.gov" <cyberframework@nist.gov>

Hi there,

Good luck as you folks wrap up the comments!

I'm working with more and more of our clients who are interested in mapping CSF requirements against NIST 800-171, and thus I'd like to suggest that the informative references section of the core Excel docs include references to 800-171, if possible. I understand that cross-correlation is providing within 800-171—but the smaller businesses that seek compliance with this document can be aided by the framework references.

Kind regards,

Tom
