

Why a NIST Strategic Plan?

Competition

New Business Models Aging Infrastructure

Changing Expectations

Outdated Processes

Limited Resources

NIST Strategic Planning Steps

Pre-work

- Baldrige Organizational Profile
- Environmental Scan
- SWOT Analysis with Focus Groups

Identify Goals

 Using the pre-work and in consultation with the NIST Leadership Board, NIST Director identifies Strategic Plan Goals

Develop Objectives and Strategies with Broad Staff Input

 Input sought from public forums, internal and external sources, etc.

Final Plan

- Internal and external communications plan and documents developed
- Implementation plan for tracking and reporting progress, updating plan, etc.
- Integrated with strategic priorities and programmatic plans for LP, MR, IIS

Strategic goal teams form

Deliberate Community Engagement

Open House Events in Gaithersburg and Boulder

 Workforce – career paths, development, bias, diversity

External stakeholder relations

Goal Team 1 members chat with visitors at the Gaithersburg event.

Focused outreach events on specific topics

COMMUNITY CONVERSATION ON TECH TRANSFER AT NIST

COMMUNITY CONVERSATION ON RESEARCH DATA INFRASTRUCTURE

Infrastructure – maintenance

Support for research andfacilitating technology transfer

Goal 1: Position NIST to Advance U.S. Science and Innovation

Increase agility, promote collaboration, and maintain technical excellence to strategically advance emerging technologies and address national needs.

- Identify and address institutional bottlenecks that inhibit all aspects of NIST's technical agility and excellence.
- Create an environment that allows NIST staff and associates to achieve technical excellence while minimizing impediments.
- Foster a culture that promotes cross-OU collaboration, both socially and technically, including in areas of national need.

Develop and leverage flexible approaches to attract, retain, retrain, and grow talent (both Feds and Associates) in critical areas and adapt to demographics and expectations of the changing workforce.

- Create, promote, and support growth opportunities
- Prepare (and support/improve) individuals for leadership and management positions to create a strong workforce.
- Promote an inclusive and equitable environment

Develop creative models that strategically expand our external engagement and impact, aligned with our mission to maximize the value of our technical program.

- Take a more purposeful approach to identifying and nurturing external partnerships
- Establish and implement rigorous, fair, and transparent mechanisms to assess the effectiveness and impact of existing partnerships

Goal 2: Maximize NIST's Stakeholder Impact through High-Value Service Delivery

Facilitate the transfer of NIST knowledge, inventions, and technologies from the laboratory to the marketplace.

- Cultivate a technology transfer-savvy research staff by improving communications about NIST tech transfer processes and policies
- Ensure businesses are aware of opportunities to transfer NIST knowledge, inventions, and technologies
- Pilot new efforts and policies for NIST to catalyze technology transfer improvements

Provide high quality products and services that NIST's customers and other key stakeholders value.

- Continually improve customer and other key stakeholder relationships by implementing proven practices from the Baldrige Excellence Framework and disseminating best practices internally.
- Make it easier to "Work with NIST" by providing an easy to navigate website and modern e-commerce tools.

Strategically communicate NIST's key messages so that stakeholders can readily identify and share NIST's priorities, capabilities, and value.

- Adopt organizational branding best practices to enhance NIST's reputation with key stakeholders as a leader in advancing innovation and economic impact.
- Enhance internal and external communications management and policies in ways that encourage a "One NIST" culture and support organizational branding efforts.
- Implement strategic communications planning led by Public Affairs, with participation by all NIST operating units, focused on priority messages, tactics, and metrics of success.

Goal 3: Create the Infrastructure for a 21st Century Research Institution

Facilitating Next-Gen Research Data Infrastructure. Develop and implement plans for major facility upgrades.

Upgrade NIST's IT infrastructure, develop a sustainable plan to support future growth.

Adopt and transition to modern business systems and operational practices.

- Coordinate research data infrastructure development
- Establish research driven infrastructure
- Provide a Sustainable Open Access Research framework.

- Develop a sustained multi-year NIST campus and facility modernization program.
- Develop and implement an efficient space usage system
- Develop an analytical framework for prioritizing investment for major infrastructure projects and secure funding for facility

- Re-engineer network and communications infrastructure.
- Establish NIST-wide desktop support program for all major platforms.
- Build in the cost of IT infrastructure

- Streamline business system workflows.
- Establish a program to stimulate and reward internal process innovation and improvement.
- Provide default support

Goal 4: Build a One NIST Culture

Ensure NIST has accountable leaders/managers with broadly defined, recognized, and implemented competencies.

- Enhance the capability to develop and/or hire the 'right' leaders/managers.
- Set expectations for leadership/management across the organization.
- Create comprehensive tools for training leaders/managers for success.
- Create a structure of accountability for leaders/managers.

Create an engaged, empowered, and agile NIST workforce aligned with the One-NIST vision and NIST core values.

- Increase institutional support for the standardized attraction and recruitment of new talent across all career paths and aligned with NIST core values.
- Clarify the role of, better integrate, and focus more on the careers of the non-federal portion of NIST's workforce.
- Incentivize cross-collaboration between different OUs and improve the engagement and empowerment of the NIST workforce.

Strengthen the workplace environment at NIST making NIST a welcoming institution that empowers its employees and rewards innovation.

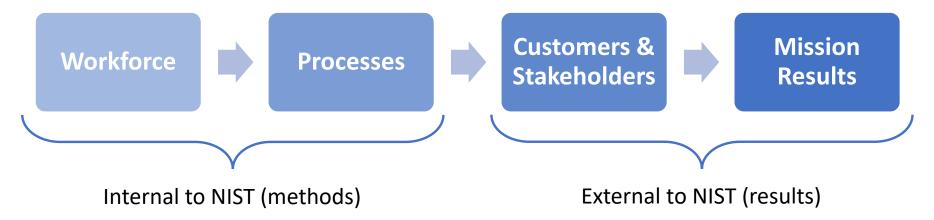

- Establish a One NIST Service Initiative where all employees will have the opportunity to engage in One NIST-building activities.
- Communicate the broad competencies/behaviors that are in line with the culture and hold all employees accountable for meeting these standards.

Diversity and Inclusion - To attract, develop and retain a diverse workforce that's representative of the nation we serve.

- There is a primary point of accountability for diversity and inclusion activities at NIST.
- Steps are taken to create a more inclusive and welcoming community environment for all NIST employees and associates.

Strategy Map – Interdependency between four perspectives

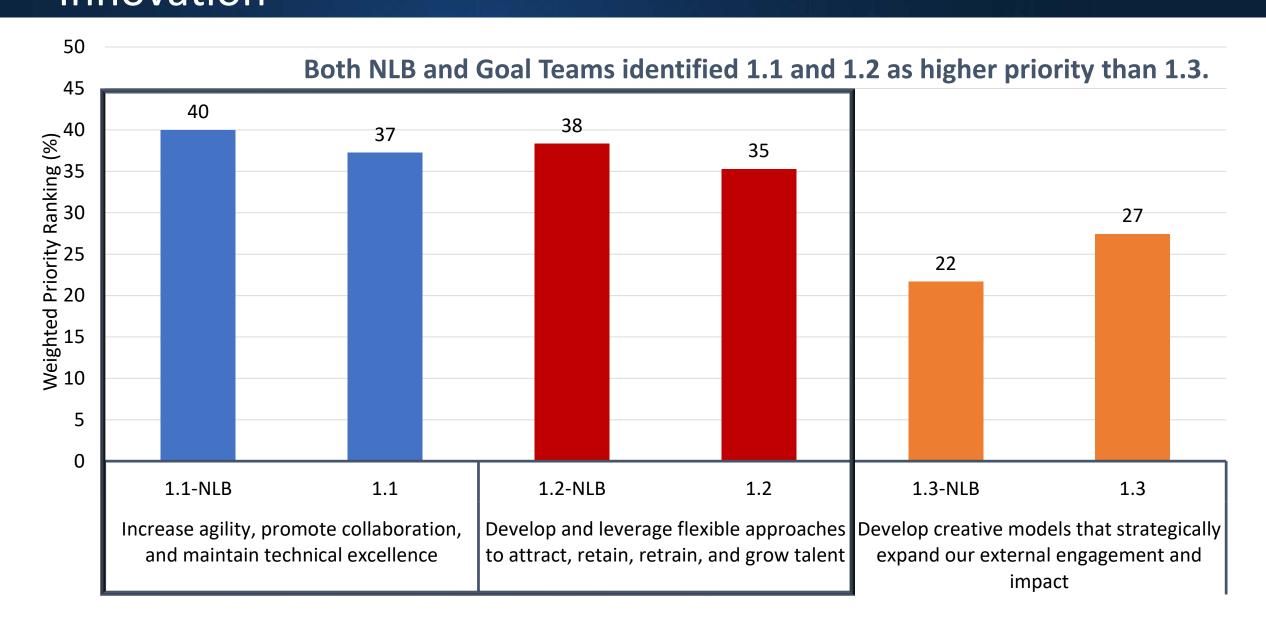

Features of a Strategy Map:

- Not hierarchical format, but rather a format that shows the logical order that connects four perspectives a series of cause-and-effect relationships:
 - Workforce operate and drive Processes
 - Processes deliver value that impacts Customers and Stakeholders
 - Customer results contribute to Mission Results
- The chart also shows how the four components are balanced between internal components and external components
- Arrows link objective in one perspective with objective in the next perspectives to the right (arrows cannot go back)
- The function of the arrow is to indicate that achieving one objective is necessary to achieving another objective

Workforce **Mission Results Processes Customers & Ensure that NIST Stakeholders** Develop and Advance emerging has accountable implement plans for technologies and leaders/managers major facility address national (4.1)upgrades (3.2) needs (1.1) Attract, retain, Improve transparency Facilitate the retrain, and grow and agility in our transfer of talent (1.2) research, service knowledge, delivery, and business Communicate key inventions, and operations (3.4) messages so that Create workforce, technologies from stakeholders can aligned with Onethe laboratory to identify and share **NIST vision and NIST** the marketplace NIST's priorities, core values (4.2) (2.1)capabilities, and value Upgrade NIST's IT (2.3)Strengthen the infrastructure (3.3) culture of the workplace environment (4.3) Expand external Provide high quality Facilitating Nextengagement and Gen Research Data products and impact to maximize Make NIST diverse the value of technical Infrastructure (3.1) services (2.2) and inclusive (4.4) program (1.3)

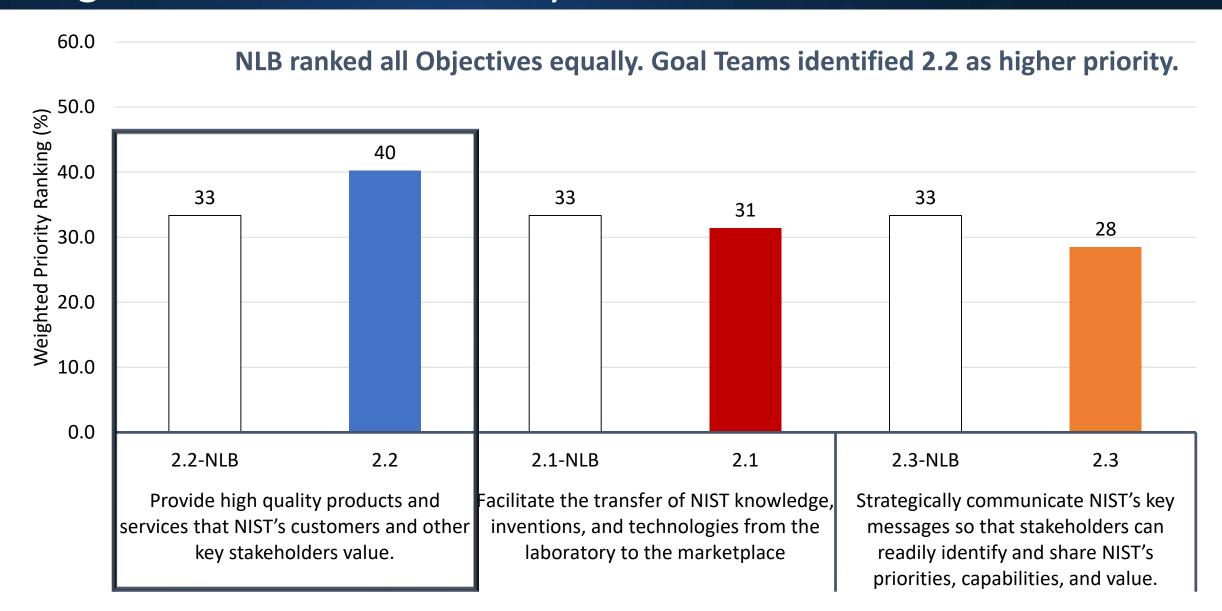

Goal 1: Position NIST to Advance U.S. Science and Innovation

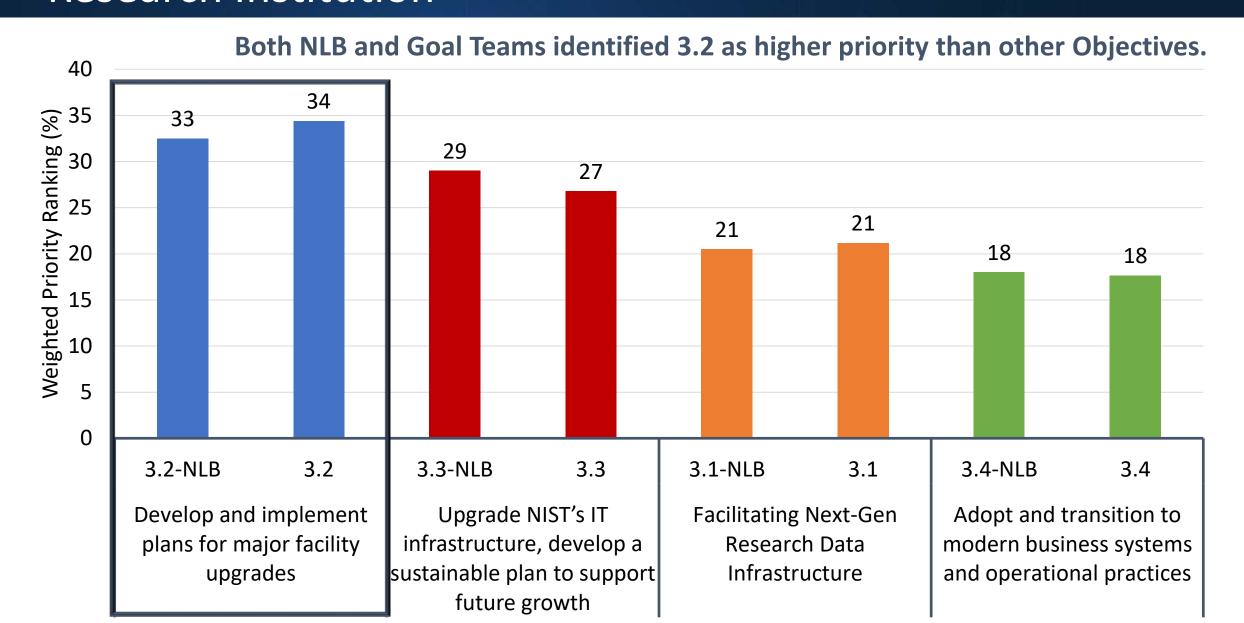

Goal 2: Maximize NIST's Stakeholder Impact through High-Value Service Delivery

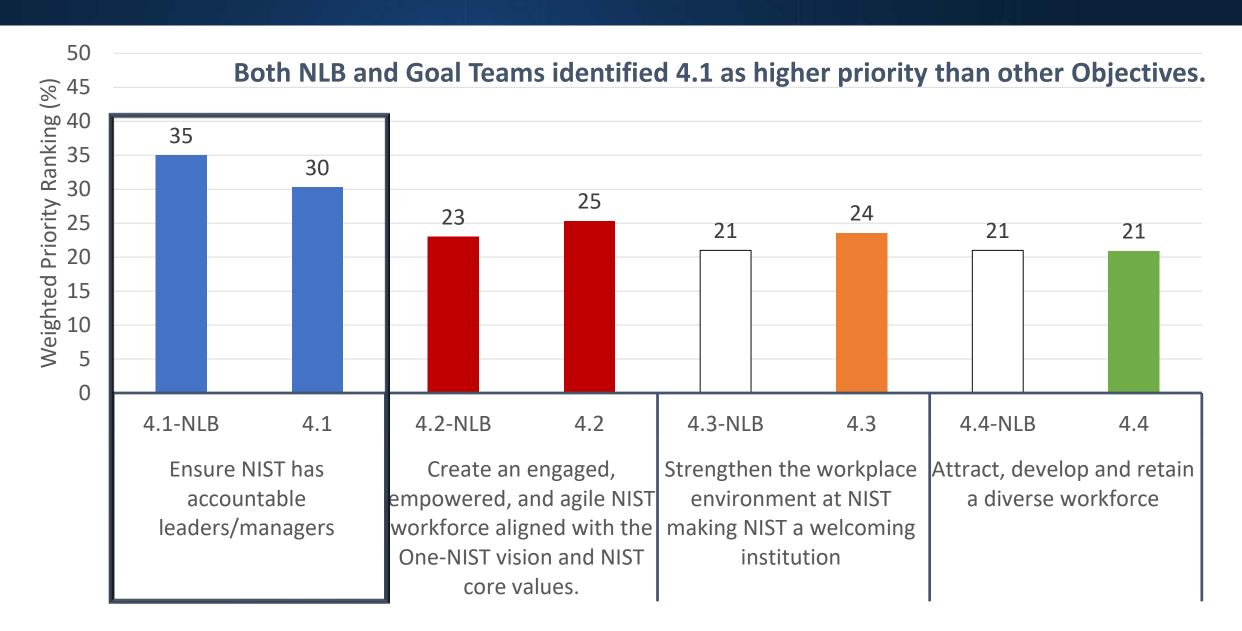

Goal 3: Create the Infrastructure for a 21st Century Research Institution

Goal 4: Build a One NIST Culture

Cost Considerations

Given that these are all worthy problems to address, but we have limited fiscal resources, if new funding is required for implementation what Objectives would you most want to see that funding go towards?

Results: IT infrastructure (NLB) and facility upgrades (Goal Teams) got the most votes; all agree that growing talent is the third most important Objective.

	NLB (% of votes)	Goal Teams (% of votes)		
3.3. Upgrade NIST's IT infrastructure , develop a sustainable plan to support future growth	70	59		
3.2. Develop and implement plans for major facility upgrades	60	79		
1.2. Develop and leverage flexible approaches to attract, retain, retrain, and grow talent	55	44		

Culture Considerations

Given that these are all worthy problems to address, but we have limited leadership and management capital, if successful achievement of an Objective would require driving significant cultural change what Objectives do you want to ensure management focuses their attention on?

Results: NLB and Goal Teams agree on the importance of accountable leaders and managers.

		NLB (% of votes)	Goal Teams (% of votes)
Q	1.1. Increase agility, promote collaboration, and maintain technical excellence	70	*
Ö	1.2. Develop and leverage flexible approaches to attract, retain, retrain, and grow talent	*	56
Ö	4.1. Ensure NIST has accountable leaders/managers	65	62
	4.4. Attract, develop and retain a diverse workforce	60	*
	Designates the Objective that was ranked first priority	*Received ≤4	10% of votes

Key Strategies for Immediate Action

Workforce

- Improve collaboration and agility across NIST programs
- Strengthen NIST's ability to attract, retain, and retrain a diverse and inclusive talent base
- Provide support for a strong and accountable leadership corps

Infrastructure

• Implement a multifaceted facility renovation and upgrade strategy

Operations and Processes

- Make it easier to work with NIST
- Strategically communicate NIST's key messages

Next Steps

- October 2019 through November 2019
 Appointment of strategy leads and formation of implementation teams
- November 2019 Alignment of OUs with Strategic Plan
- November 2019 through January 2020
 - Inventory of all strategies underway
 - Development of milestones and performance measures and reporting process and a strategy for monitoring and managing implementation and performance
- January 2020 Formal launch of plan implementation
- February 2020 Launch of integrated planning cycle combining Lab, IIS, and MR processes.

Questions for the VCAT

- 1. What methods have been useful in driving cultural change in your organizations?
- 2. What best practices do your organizations follow with respect to implementation of strategic planning?

Plan Structure

Goal

Objective

Strategy

Outcome oriented long-term goal for major function of the agency

Objectives describe the outcome or impact NIST is trying to achieve

Strategies reflect the actions, processes changes, practices, that will be implemented to achieve objective
