## Deep Dive Sessions

- 1 Indoor Mapping, Location Tracking, and Data Security in Support of Pre-Incident Planning
- 2 It's Any O'clock! Do You Know Where Your First Responders Are? A Deep Dive into Location-Based Services (LBS) for Public Safety Operations
- 3 Transition of LMR to Broadband: Evaluating Mission Critical D2D and V2X Communications for Public Safety
- 4 What's Stopping You? A Deep Dive into Current Blockers and Obstacles to Adopting MCPTT Solutions
- 5 Leveraging User Interface / User Experience Technology from an Operational Perspective
- 6 Agency-deployed Mobile Applications
- 7 What's with Wearables for Public Safety?
- 8 Security Impacts on Public Safety Operations
- 9 How can FirstNet Make it Easy for the Ecosystem to Innovate for Public Safety?
- 10 Integrating Uncrewed Aircraft Systems into Tomorrow's First Responder Toolbox
- 11 FirstNet Coverage for Public Safety incidents and events: Ad-hoc Solutions for on-scene coverage
- 12 Multi-access Edge Computing (MEC) and the Potential Impact on Public Safety Operations

## Mass Casualty Incident Table Top Exercise

4

Concurrent Sessions

PHASE 1

Incident Notification to Public Safety

PHASE 2

Initial Response and Assessment

PHASE 3

On-Scene Tactics

PHASE 4

Mutual Aid Response and Integration

PHASE 5

Transition to Investigation and Follow-up

## What Attendees Are Saying

*"What did you like best about 5x5?"*

“ ”

The networking opportunities with both public safety officials as well as technical officials.

I was able to spend time digging into what is out there and available, ask questions, learn how others are using the tech/what they're thinking about for the future.

The excitement generated by the ongoing research and innovation in the public safety space.

Networking with academia and industry innovators on solutions for actual problems we're currently facing.

Opportunities to think about future applications for solving real-world problems.

I liked how FirstNet [Authority] and PSCR have come together to talk about what there is today, tomorrow, and the future. Combining today with the research was beneficial.

The fresh energy and vibe that came with everyone there [had] an attitude of "we are going to make things better." [It was] very refreshing and exciting.

Really excellent crowd, very well organized, high quality content and speakers.
