

AFIS quality requirements and implementations

NFIQ II workshop
Gaithersburg, MD

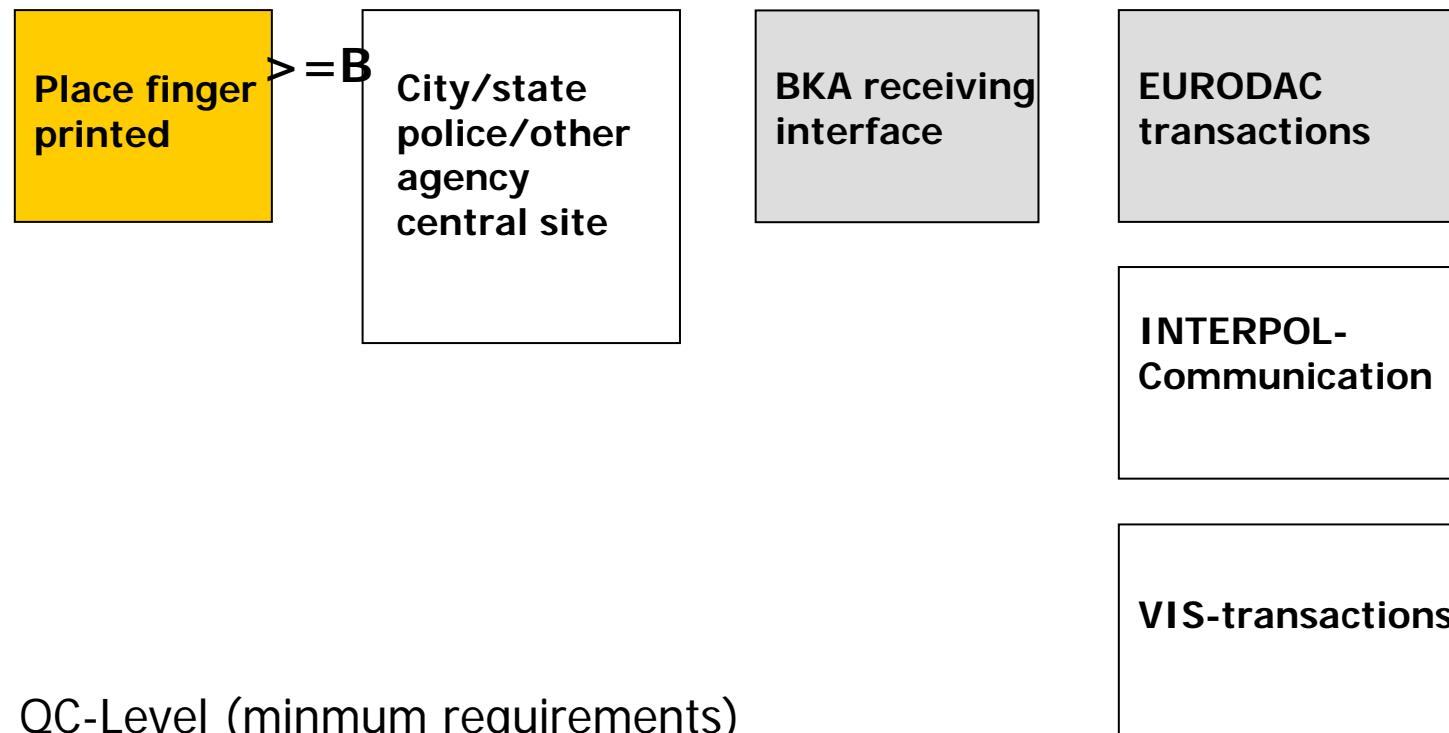

Examples we deal with

Link to QC
presentation

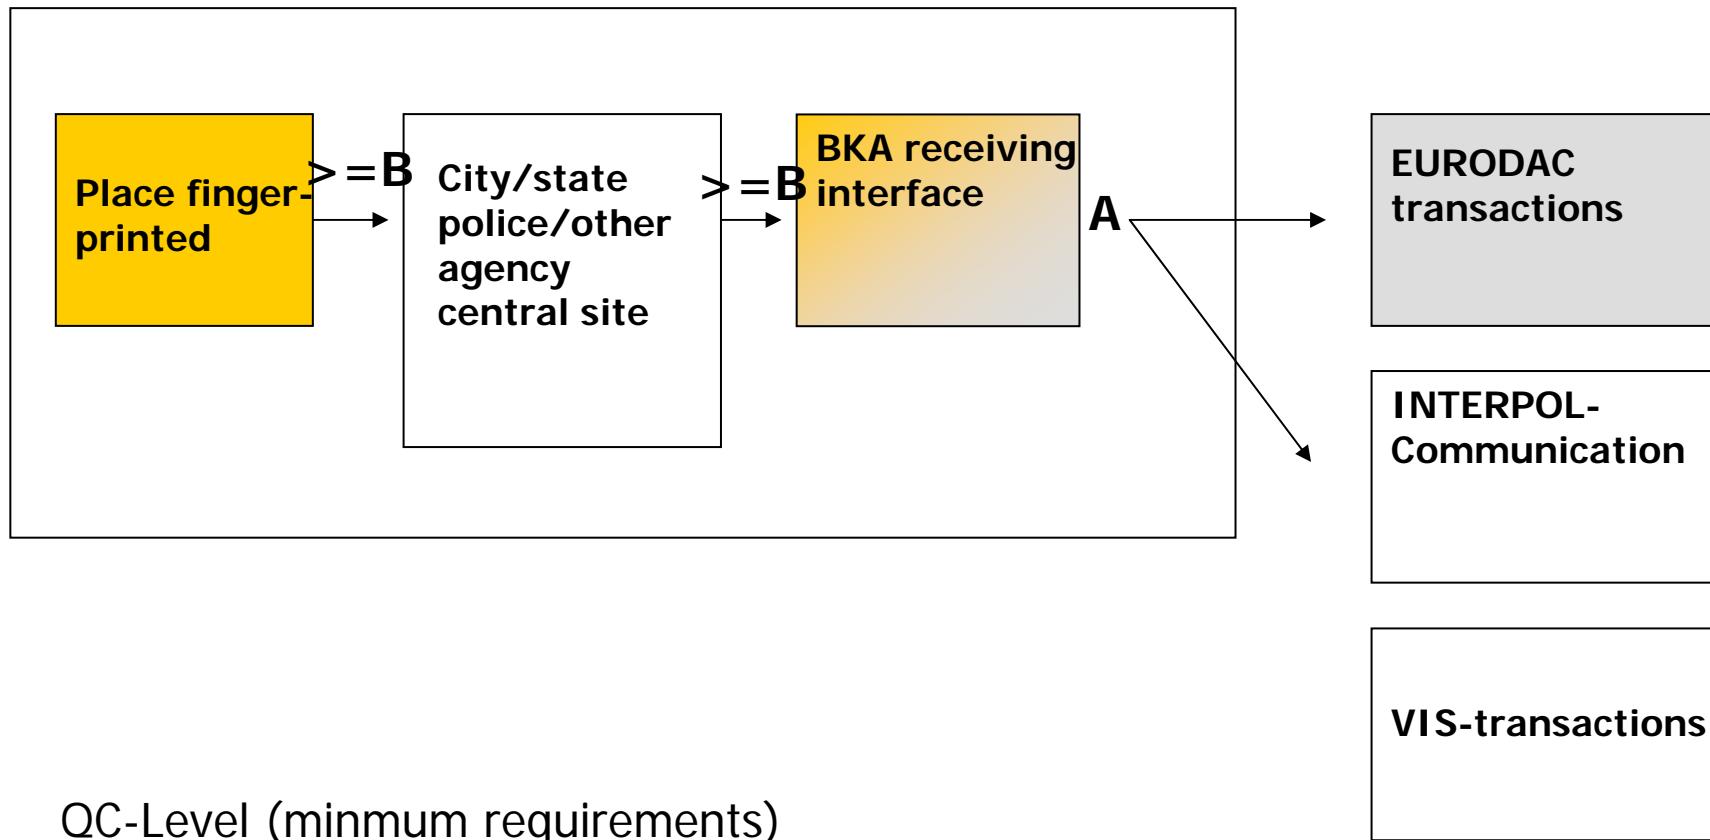

Current status of QC

A	E.g. NFIQ 1 and 2
B	NFIQ I (Various settings)
C	Other algorithm (proprietary)

QC at any step? Implementation Options

QC-Level (minimum requirements)

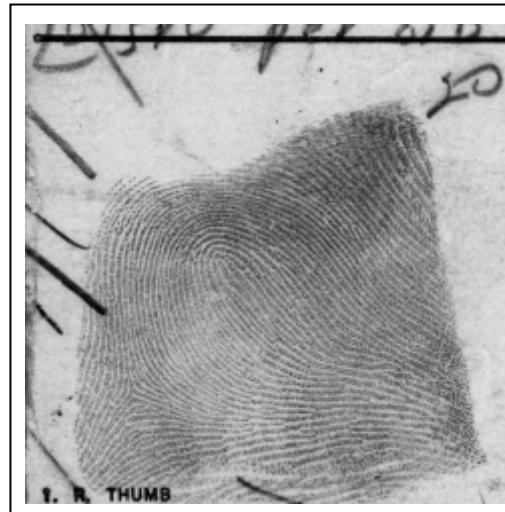

A	E.g. NFIQ II High level (analogue NFIQ I 1 and 2)
B	E.g. NFIQ II Lower level (analogue NFIQ I 1 to 3)
C	Other algorithm

Fingerprint expert perspective - Quality vs. matchability and completeness

SFin generated image

NIST SD27

Use cases for NFIQ II

- Automatic selection of the „best“ NIST-files for international correspondance

Speicherdatum	EPK-Nr.	EURODAC-Nr.	D-Nummer	HD-Nummer	PCN	Qualität	NIST-Dateiinhalt
09.12.2006 06:35:23	E [REDACTED] 1	DE [REDACTED] 8507	[REDACTED]	[REDACTED]	[REDACTED] A	gut

07.09.2007 11:37:18	E [REDACTED] D	DE [REDACTED] 0109	0 [REDACTED]	[REDACTED]	????	gut	
04.08.2011 11:38:53	E [REDACTED] Z	[REDACTED]	[REDACTED]	[REDACTED]	1 [REDACTED]	mittel	

Use cases for NFIQ II

- Automatic rejection of poor quality transactions
- Replacement of NFIQ I quality check on capture stations and other implementations

What is still missing with NFIQ II

- Algorithm for latents (finger and palm)
- Algorithm for palms
- Algorithm to detect what we deal with
- (Algorithm to detect altered fingerprints)
