

UNITED STEELWORKERS

UNITY AND STRENGTH FOR WORKERS

**Worker-Wearable / Worker-Attachable
Industrial Robotics Technical Interchange Meeting**

Washington, D.C.

June 28 and 29, 2017

Presented by

**Jim Key, President of the national Atomic
Energy Workers Council, United
Steelworkers**

United Steelworkers

Represent over 850,000 workers across the US and Canada across various sectors. Just a few examples of our industries:

Atomic

Chemical

Health Care

Manufacturing

Metals (Steel, Aluminum, etc.)

Oil

Paper and Forestry

Public Employees

Rubber

Science of Safety Initiative

- Improve safety, quality, efficiency and productivity of facility operations
- Ensure that technology will assist workers to perform tasks
- Contribute in the development of safe worker friendly equipment

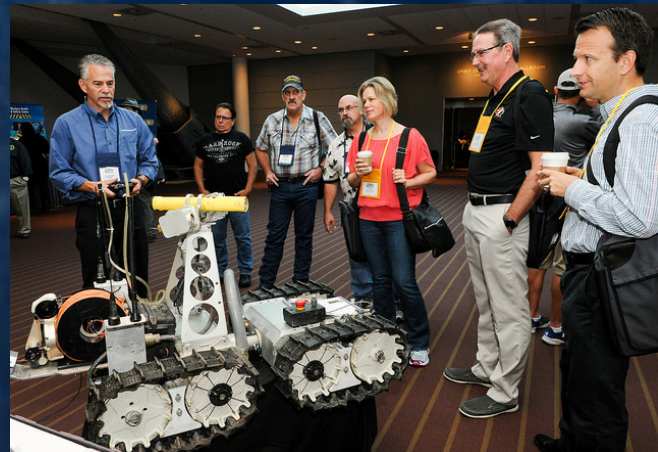

Exoskeleton Robotics Challenge

Safety of Science Tour

2016 Health, Safety and Environment Conference

Moving Forward

Work in joint partnerships with developing agencies to develop robotic and exoskeleton technology to improve workplace health and safety at DOE facilities that “assist workers and contribute to the development of worker friendly equipment”.
