General Comment

The AI RFM is important for comment so that underrepresented populations such as mine, Black, are able to voice how advancements need help in this AI arena concerning minirities and people of color while developing the science. Credentialed and curated scientists have created documentaries about their scientifuc work in the AI field of practice needing extreme diversification considerations to be equitable. Many socities are holding back becasue the AI science is not clear nor equitably curated and researched. Please uste the framework to help in these areas. I am a Black female MLIS graduate student and I know of which I speak; learning and practice has to advance through the framework process and growth.
