

Blandine Trouille

Blandine Trouille is a senior international trade specialist, within the International Trade Administration, at the Department of Commerce. She is the lead on matters related to international chemicals management, and was introduced to Green Chemistry more than five years ago through the EPA program, as well as the members of the Green Chemistry Institute. Ms. Trouille was born on a farm in Northern France. She graduated as an engineer in Agronomy (Rennes, France), obtained a Master in Agricultural Economics (Athens, GA), and a Master in Environmental Law (South Royalton Vermont). When out of the office, Ms. Trouille delights in the practice and teaching of yoga. She cherishes the outdoors.
