

Comments on Cybersecurity Green Paper due 8.1.2011

We do not understand why you have involved Public Private Partnerships in areas of security.

Private means private and the public is eliminated as is the oversight of taxpayer dollars.

Information sharing is one thing, but Partnership is another. This cuts out due process issues and limits any growth outside of the entrepreneurial level to those insiders who qualify as private partners.

Intellectual property becomes insider information and limited to a few.

This negates any creativity and economic development and innovation.
