Highlights of Resolved Issues

- Missing shake & bake tests: no longer missing
- Benchmarking test method: rewrote explanation
- Frequently misconstrued terms: replaced with more explanatory wording
- Software engineering practices: fixed nits
- Volume test: more parameters for op-scan

- Many requirements clarified through wording changes or defined terms

Technical Guidelines Development Committee

To do

- Open: “define token” (wants STS input)
- Pending: nits in text rendering of process model
 - Typo
 - Harmonize with Activity Diagram Linear Form
- Revisit *de minimis* and confirmed issues
