# INAUGURAL SPACE CYBERSECURITY SYMPOSIUM: Access for Start-ups

## **Inaugural Space Cybersecurity Symposium: Access for Start-ups**

Department of Commerce | Department of Homeland Security

Wednesday, May 5, 2021

10:00 am – 4:00 pm EDT

Cybersecurity measures and policies are ubiquitous in the design, development, delivery, and operation of components supporting American space activities.

Join us on May 5 for a Department of Commerce (DOC) and Department of Homeland Security (DHS) jointly hosted symposium to learn about the latest cyber threats to space infrastructure, existing space cybersecurity policies, and industry cybersecurity experience and mitigation strategies. Information will be tailored to emerging companies, however all companies are welcome to participate.

This will be the first in an ongoing series of events to connect commercial space companies of all sizes with the Departments regarding cybersecurity measures and policies.

Registration is now open for this virtual symposium at the following
