22

2. BACKGROUND

1. PURPOSE

a. NIST generates a large quantity, and variety, of chemical wastes from laboratory and support activities. Chemical wastes include unwanted, spent, or expired solvents; corrosives; toxics; other hazardous liquids and solids; oils; coolants; and batteries. Some chemical wastes are considered hazardous and some non-hazardous (as defined in 40 CFR 260), but all must be managed appropriately from the initial generation to the final disposal.

This suborder defines the requirements for accumulation and disposal of chemical waste at

- 23
- b. At the NIST-Gaithersburg site, chemical wastes are regulated by: 24 25

the NIST-Gaithersburg site.²

- 26
- (1) U.S. Environmental Protection Agency (EPA) via the Code of Federal Regulations (CFR), 40 CFR Parts 260 through 279; and 27
- 28
- 29 30
- 31

¹ For revision history, see Appendix A.

(COMAR), Title 26, Subtitle 13.

(2) Maryland Department of the Environment (MDE) via the Code of Maryland Regulations

NIST S 7301.06

Approval Date: 01/12/2021

Effective Date: 104/01/2020

² Due to differing regulatory requirements for the NIST-Boulder site, a parallel suborder (NIST S 7301.07) has been prepared to define the chemical waste accumulation/disposal requirements for the Boulder site. NIST employees at the Hollings Marine Laboratory, the Institute for Bioscience and Biotechnology Research, or other facilities that are not managed by NIST shall comply with the chemical waste disposal procedures implemented by the organization managing that facility.

32	c.	The NIST-Gaithersburg site has been authorized to generate hazardous waste through the			
33		issuance of a facility-specific U.S. EPA hazardous waste generator identification number: MD5131531811 Passed on U.S. EPA and MDE aritoria, the NIST Geithersburg site is			
34		MD5131531811. Based on U.S. EPA and MDE criteria, the NIST-Gaithersburg site is			
35		designated as a "Large Quantity Generator" (LQG) of hazardous waste, and as such,			
36 37		regulations specific to LQGs apply.			
38					
39	3.	APPLICABILITY			
40		This suborder applies to all activities at the NIST-Gaithersburg site that generate chemical			
41		wastes. ³

NIST S 7101.61: Compressed Gas Safety 79 80 81 82 6. REQUIREMENTS a. General 83 84 85 (1) NIST shall maintain full and consistent compliance with all regulatory requirements (described in this suborder) regarding the generation, accumulation, and disposal of 86 chemical wastes. 87 88 (2) No chemical waste shall be released to sanitary sewer drains or storm water drains 89 90 without review and approval by the NIST Gaithersburg Safety, Health, and Environment Division, Environmental Management Group (EMG). Contact EMG at x5375, option 3 91 92 with any questions. 93 94 (3) No hazardous chemical waste shall intentionally be disposed by evaporation. In the handling and transfer of hazardous chemicals some chemical vapor is expected to be 95 released. The vapors generated from chemical reactions should be released to a chemical 96 fume hood exhaust. However, evaporation shall not be an intended means of disposal for 97 hazardous chemicals. 98 99 100 (4) NIST shall maintain the proper controls, equipment, and employee training to prevent or mitigate chemical waste incidents. 101

102 103

104

105

106

(5) NIST shall routinely assess chemical use to identify opportunities to minimize hazardous waste production through reuse, recycling, inventory control, and, as feasible, substitution of non-hazardous alternative chemicals. This shall initially be accomplished in the hazard review process (NIST S 7101.20: *Work and Worker Authorization Based on Hazard Reviews*).

109	b.	Chemi	cal Waste Accumulation - Satellite Accumula	tion Area
110 111		(1) A11	NIST work areas that routinely.4 generate che	amical wastes shall establish Satallite
112			cumulation Areas (SAA; see Section 7, Definition	
113		AC	cumulation Aleas (SAA, see Section 7, Denni	itions).
113 114		(2) A	n SAA does not need to be established for the	nick-up of non-routine wastes
115		(2) 11	in 57 17 does not need to be established for the	prek up of non fourne wastes.
116		(3) C	hemical waste generated in a work area (e.g., l	aboratory) should remain in that work
117		` '	ea and be accumulated in an SAA until picked	
118			1	1 1
119		(4) A	ll SAAs shall meet the following	CLIENICAL WACTE
120		re	quirements:	CHEMICAL WASTE
121				
122		(a)	The location of the SAA shall be identified	SATELLITE
123			by signage in the work area (available free	
124			in the NIST Gaithersburg Storeroom).	ACCUMULATION
125				
126		(b)	The SAA shall be included in an inventory	
127			of SAAs maintained by EMG (x5375, Option	n 3). ⁵ .
128				
129		(c)	The SAA shall be located (within the work as	,
130			chemical wastes (e.g., flammable wastes may	
131			cabinet; volatile wastes may need to be stored	d in a ventilated cabinet).
132		. 40		
133		(d)	Secondary containment shall be provided for	
134			control leaks or spills. The capacity of the se	
135			to contain the quantity of the largest single co	ontainer stored in the containment.
136		()		
137		(e)	Incompatible chemical wastes shall be kept s	
138			separate secondary containment bins. Ideally	•
139			maintained in separate chemical cabinets. Ch	
140			included in NIST S 7101.60: Chemical Mana	igemeni.
141		(f)	An SAA managar shall be designated for age	h SAA The SAA meneger shall be an
142 143		(1)	An SAA manager shall be designated for eac individual who generates chemical waste in t	_
143 144			located.	ne work area in which the SAA is
144			iocaica.	

⁴ "Routine" generation of chemical waste is the consistent production of chemical waste such that it will need to be turned in for disposal at least once per year.

⁵ Report new SAAs to the EMG by calling (x5373, Option 3) or emailing with the following information: the SAA location (building and room number), name of SAA manager, OU and Group.

146 147	c.	Hazardous/Non-Hazardous Waste Determination
148		(1) Chemical waste owners shall designate each chemical that is being disposed as either
149		"Hazardous" or "Non-Hazardous" waste at the time and place where the chemical waste
150		is generated.
151		
152		(2) Each waste container shall be labeled according to the requirements of Section 6.d.(5)
153		below.
154		
155		(3) The determination of "Hazardous" or "Non-Hazardous" shall be made based on the
156		following guidance:
157		
158		(a) Most general laboratory chemicals (e.g., solvents, acids, bases, reactives) are
159		considered Hazardous Wastes when disposed.
160		
161		(b) Any chemical waste that is ignitable, corrosive, reactive, or toxic as defined in $\underline{40}$
162		CFR 261.20 is considered Hazardous Waste.
163		
164		(c) Any chemical included in U.S. EPA Hazardous Waste Lists (40 CFR 261.30, F, K, I
165		and U lists) is considered a Hazardous Waste when disposed.
166		
167		(d) Any product that is considered a hazardous chemical under the Chemical Hazard
168		Communication Program should be considered a hazardous waste when disposed.
169		
170		(e) The concentration of a hazardous chemical in solution can affect the hazardous/non-
171		hazardous waste determination. However, for general disposal purposes, consider
172		any concentration of a hazardous chemical to be a hazardous waste. Indicate the
173		estimated concentration of each constituent on the waste label. Contact the EMG
174		(x5373, Option 3) to discuss exceptions.
175		
176		(f) For acids and bases, consider any solution with a pH of ≤ 2 or ≥ 12 to be hazardous.
177		Only appropriate, non-hazardous, solutions with a pH \geq 6 and \leq 10 may be disposed
178		in sink drains. The EMG must be contacted (x5375, option 3) prior to releasing any
179		chemicals to a sink drain.
180		
181		(g) Common non-hazardous chemical wastes include uncontaminated pump oils, motor
182		oils, and glycols.
183		
184		

d. Chemical Waste Containers

(1) Chemical wastes shall be placed in containers made of materials compatible with the wastes.

(2) Chemical waste containers shall be in good condition and have screw-on caps.

(3) Chemical waste containers typically must be sealed with a cap when not actively being filled.

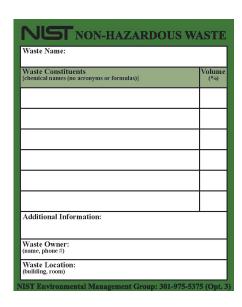

However, if the chemical wastes in a container are reacting in a manner that will cause a sealed container to over pressurize (i.e., evolving heat or vapor), the waste container shall be left open and in a fume hood until the reaction is substantially complete (i.e., no longer evolving heat or vapor). Additionally, pressure relief caps are available that can seal the container and release some pressure from the container.

(4) Chemical waste containers shall not be over-filled.

(a) Free space (head space or ullage) of 10 percent shall be left when filling waste containers.

(5) One of the following labels (available free in the NIST Gaithersburg Storeroom), or equivalent, shall be affixed to each waste container.

Waste Constituents [chemical names (no acronyms or formulas)]	Volum
TATALAN TANDAN AND AND AND AND AND AND AND AND AN	
Waste Hazards (check all that apply and describe of	
Explosive Acute Acute	ogen ductive Toxin sive

212 213	7	The waste labels shall include:				
213 214	(a) An indication that the container holds hazardous or non-hazardous waste;				
214	(a) An indication that the container holds hazardous of hon-hazardous waste,				
216	(b) The waste name/identifier					
217						
218	(c) A list of all constituents of the waste;				
219						
220	(d) An estimate of the percent volume of each constituent;				
221						
222	(e) For hazardous waste, a description of the hazards associated with the waste;				
223						
224	(f) Contact information for the individual generating the waste; and				
225	(a) The wests accomplation leastion				
226 227	(g) The waste accumulation location.				
228	(5) (Chemical Waste Labels shall be affixed to the waste container at the time that any waste				
229	` ′	s first added to the container.				
230	1	s first added to the container.				
231	(6)	The volume of hazardous waste accumulated at an SAA shall be limited to a maximum of				
232	` ′	55 gallons. If this maximum quantity is reached, the waste must be removed from the				
233		SAA immediately. Contact EMG (x5375, option 3) at least one week prior to reaching a				
234		maximum quantity.				
235						
236	(7) 3	The volume of acutely hazardous waste (see Appendix B) accumulated at an SAA shall				
237		be limited to a maximum of 1 quart. If this maximum quantity is reached, the waste must				
238	ł	be removed from the SAA immediately. Contact EMG (x5375, option 3) at least one				
239	V	week prior to reaching a maximum quantity.				
240						
241		Reusable waste containers, such as "Safety Cans," are acceptable for the accumulation of				
242		some chemical waste (e.g., general organic solvents). Contact EMG at x5375, Option 3				
243	V	with questions.				
244	(0)	In a 1122 of the Change of Wester Labelta according to the 11 have the small according to				
245	(9)	In addition to Chemical Waste Labels, reusable containers should have the work area				
246		location (building and room number) written in permanent marker on the container so				
247 248		the container can be returned after it has been emptied.				
248 249	(10)	Chemical storage requirements (e.g. maximum storage capacities for flammables)				
250	(10)	specified in the NIST Flammable Liquids Safe Work Practices shall also apply to				
251		chemical wastes.				

252 253	e.	e. Empty Chemical Containers. ⁶				
254 255		(1) Empty chemical containers shall be handled by the following options:				
256 257 258		(a) Empty containers that held laboratory chemicals shall be turned in as chemical waste; the caps shall be left on the empty containers, and "Empty" shall be written across the container labels using a heavy black marker; or				
259						
260		(b) Empty chemical containers shall be reused to collect chemical wastes that are				
261 262		compatible with the original contents of the container and the container material; the containers shall be labeled as "Hazardous" or "Non-hazardous Waste", per Section				
263		6.d.(5) above.				
264						
265 266		(c) Due to the residual hazards, containers that held acutely hazardous waste (Appendix B) shall be labeled and turned in as "Hazardous Waste" or reused only to contain the				
267		original chemical.				
268		original chemical.				
269		(d) Empty containers that held common commercial products (e.g. cleaners, polishes,				
270		beverages) may be disposed with regular trash. If there is any concern about a				
271		commercial container it may also be turned in as chemical waste.				
272						
273	f.	Removing Chemical Waste from NIST Gaithersburg Work Areas - Chemical Waste Pick-				
274		Ups. ⁷				
275						
276 277		(1) In Gaithersburg, chemical waste pick-up requests shall be submitted using an online form on the NIST intranet at https://nistsafety.nist.gov/CWP/PickupRequest/.				
277 278		form on the 14151 intranet at https://instsarety.mst.gov/ew1/1 lekupkequesu.				
279		(2) Pick-up requests shall include:				
280		(2) Thek up requests sharr merade.				
281		(a) The name of the chemical waste owner;				
282						
283		(b) The location of the chemical waste;				
284						
285		(c) A description of the waste and any significant hazards associated with the waste or				
286		container;				
287						
288		(d) The number of containers and total quantity of waste being disposed; and				

⁶ A chemical container is considered empty when no chemical can be removed from the container by normal physical means (e.g. pouring, aspirating, or draining).

⁷ EMG routinely picks up chemical waste from NIST Gaithersburg work areas once per week.

289		(e) Entry procedures, if any, required for EMG to enter the work space and pick-up the
290		waste.
291		
292		(3) Chemical waste owners shall schedule waste pick-ups as-needed to minimize the risks of
293		accumulating chemical wastes for extended periods of time.8
294		
295		(4) In general, chemical waste should not remain in storage at an SAA for more than one
296		year.
297		
298		(5) If chemical waste needs to be removed immediately, EMG shall be contacted at x5375,
299		option 3.
300		
301		(6) If an unlabeled container with unknown contents is found, EMG shall be contacted
302		directly (x5375, option 3) to assist with identifying and disposing of the container.
303		
304	g.	Emergency Response
305		
306		(1) Any NIST employee or covered associate. who discovers an emergency situation (e.g.,
307		significant spill or release, pressurized container) associated with chemicals or chemical
308		waste shall immediately report it to the NIST-Gaithersburg Fire Protection Group at
309		x2222.
310		
311		(2) Emergency response procedures related to chemical and chemical waste incidents are
312		described further in NIST S 7101.60: Chemical Management and the NIST-Gaithersburg
313		Hazardous Waste Contingency Plan.
314		
315	h.	Pollution Prevention
316		
317		(1) NIST employees and covered associates shall strive to minimize the chemical wastes
318		generated in the conduct of their work.
319		
320	i.	Training
321		
322		(1) Training shall be provided, documented, and recorded in accordance with the
323		requirements of the NIST S 7101.23: Safety Education and Training.
324		

⁸ The hazards of a chemical or chemical waste determine the safe storage time, e.g., some peroxide forming chemicals may require disposal after only 3 months of storage.

⁹ Any associate other than a non-research-and-development contractor. For detailed definitions of "Associate", "Covered Associate", and "Non-R&D Contractor", see NIST O 7100.01, Occupational Safety and Health Management System.

325 326		(2) All NIST employees and covered associates who generate chemical waste shall complete the training provided by OSHE on chemical waste accumulation and disposal.
327		
328		
329	7.	DEFINITIONS
330	a.	<u>Hazardous Waste</u> – A waste with properties that make it dangerous or capable of having a
331		harmful effect on human health or the environment. Strict regulatory criteria that define a
332		hazardous waste are included in 40 CFR 261.
333		
334	b.	Chemical Waste - A general term used for both hazardous (e.g. acids, solvents) and non-
335		hazardous (e.g., oils, coolants) wastes.
336		
337	c.	Satellite Accumulation Area – An area designated for the accumulation of hazardous waste
338		that is located at, or near, the point of the waste generation, and is under the control of an
339		individual responsible for the waste.
340		
341	d.	Satellite Accumulation Area Manager - The OU-assigned individual responsible for
342		maintaining a Satellite Accumulation Area (SAA). The SAA manager shall be an individual
343		who generates chemical waste in the work area in which the SAA is located.
344		
345		
346	8.	ACRONYMS
347	a.	<u>CFR</u> – Code of Federal Regulations
348		
349	b.	<u>COMAR</u> – Code of Maryland Regulations
350		
351	c.	<u>DOC</u> – Department of Commerce
352		
353	d.	EMG – Environmental Management Group; Gaithersburg Safety, Health, and Environment
354		Division; Office of Safety, Health, and Environment
355		
356	e.	<u>EPA</u> – U.S. Environmental Protection Agency
357		
358	f.	<u>LQG</u> – Large quantity generator of hazardous waste
359		
360	g.	MDE – Maryland Department of the Environment
361		
362	h.	SAA – Satellite Accumulation Area for chemical waste
363		
364		

365	9.	RESPONSIBILITIES			
366		Roles and responsibilities common to all NIST OSH suborders can be found in Section 8 of			
367		NIST O 7101.00: Occupational Safety and Health Management System. The roles and			
368 369		responsibilities specific to this suborder are as follows.			
370	a.	OU Directors are responsible for:			
370 371	а.	OC Directors are responsible for.			
372		(1) Establishing implementing policies and procedures, as needed, for the requirements of			
373		this suborder to be met;			
374					
375		(2) Ensuring subordinate managers have the authority, resources, and training needed to			
376		implement OU-established policies and procedures; and			
377					
378		(3) Using OU funds to pay any civil penalties identified in regulatory inspections and			
379		resulting from regulatory violations in their respective OUs.			
380					
381	b.	Division Chiefs and Group Leaders (or Equivalents) are responsible for:			
382					
383		(1) Implementing this suborder as it applies to activities involving their personnel and space			
384		in accordance with any applicable OU-established policies and procedures, and			
385					
386		(2) Ensuring that all individuals that use an SAA are properly trained.			
387					
388	c.	Satellite Accumulation Area Managers are responsible for:			
389		(1) Encouring that about all received we their CAA most the requirements of this cub and an			
390		(1) Ensuring that chemical wastes in their SAA meet the requirements of this suborder.			
391 392	d.	NIST Employees and Covered Associates Who Generate Chemical Waste are responsible			
393	u.	for:			
394		101.			
395		(1) Completing the training required by this program and their OUs/divisions and working in			
396		accordance with that training;			
397		5,			
398		(2) Handling chemical wastes produced in their work areas in accordance with their training			
399		and the requirements of this suborder;			
100					
101		(3) Knowing the hazards of the chemical waste in their work area; and			
102					
103		(4) Directing any questions regarding the hazards of a waste or proper handling of a chemical			
104		waste during the generation and accumulation to EMG at x5375, Option 3.			

405	e.	EMG Leader is responsible for:		
406		(1) Maintaining a comment Hamadaya Wasta Managamant Plan in shaking hamadaya wasta		
407	(1) Maintaining a current Hazardous Waste Management Plan, including hazardous waste			
408		disposal procedures, and a Hazardous Waste Contingency Plan for the NIST Gaithersburg site;		
409		Gaitnersburg site;		
410		(2) Engaging that		
411		(2) Ensuring that:		
412		(a) EMG staff members maintain their training in Hazardous Wests Operations (20 CER		
413		(a) EMG staff members maintain their training in Hazardous Waste Operations (29 CFR		
414		1910), Hazardous Waste Management (40 CFR 265), and Hazardous Materials (49		
415		CFR 172);		
416		(b) Here adone were a more consent annual contracts one modulation of and annually		
417		(b) Hazardous waste management support contracts are maintained and properly		
418		managed;		
419		(A) A = 1 1 4 1 1 6 NIGT 1 1.4 1.4 1.5		
420		(c) As chemical waste is picked up from NIST work areas, determinations are made of		
421		required waste codes and packaging for each specific waste in accordance with 40		
422		CFR 260 and COMAR 26.13;		
423		(d) After heine mighted year all absorbing tweets in the property discretizate Dividing 212 for		
424 425		(d) After being picked up, all chemical waste is transported directly to Building 312 for		
425		processing, consolidation, and packaging;		
426		(a) Chamical waste manaing in temmoners stance at Duilding 212 for no longer than 00		
427		(e) Chemical waste remains in temporary storage at Building 312 for no longer than 90		
428		days; and		
429		(A) All showing weets is shipped from Duilding 212 to lineared homeodous weets		
430		(f) All chemical waste is shipped from Building 312 to licensed hazardous waste		
431		treatment, storage, or disposal facilities, or, as appropriate, recycling facilities.		
432		(2) Maintaining on inventory of NIST Caith ambayer CAA.		
433		(3) Maintaining an inventory of NIST Gaithersburg SAAs;		
434		(4) A sting of the NIST point of contact with more latery against for the minel wests issues.		
435		(4) Acting as the NIST point of contact with regulatory agencies for chemical waste issues;		
436		(5) Engaging that training on this exhaults is excitable and mosts the mode of NICT.		
437		(5) Ensuring that training on this suborder is available and meets the needs of NIST;		
438		(6) Drawiding consultation to NIST annel average and covered associates in record to chemical		
439		(6) Providing consultation to NIST employees and covered associates in regard to chemical		
440		waste issues;		
441		(7) Can dusting amount and its of this management a suggest a suggest and its asset is a suggest of the suggest		
442 443		(7) Conducting annual audits of this program to ensure regulatory compliance;		
444				

444		(8) Providing support to the Fire Protection Group in responding to chemical/chemical waste
445		incidents; and
446 447		(9) Purchasing and maintaining the appropriate spill response equipment and supplies for
447 448		chemicals/chemical wastes accumulated at the NIST Gaithersburg site
449		enerments, enerment wastes accumulated at the 1415 I Guithersoung site
450	f.	Fire Protection Group Leader, Emergency Services Office is responsible for:
451		
452		(1) Ensuring that Fire Protection Group staff members maintain their training in Hazardous
453		Waste Operations (29 CFR 1910) and as Hazardous Materials Technicians certified by
454		the Maryland Fire Services Personnel Qualifications Board;
455		
456		(2) Ensuring that the Fire Protection Group is prepared for and effectively responds to
457		chemical incidents; and
458		
459		(3) Maintaining a sufficient inventory of emergency response equipment and supplies to
460		address all potential chemical incidents at the NIST-Gaithersburg site.
461 462		
463	10.	AUTHORITIES
464		There are no authorities specific to this suborder alone.

472	A.	Revision History
473	B.	List of Acutely Hazardous Wastes
171		

Revision	Approval	Responsible	Effective	Brief Description of Change; Rationale
No.	Date	Person	Date	Brief Description of Change, Rationale
0	12/21/16		12/21/16	None – Initial document
1	07/31/19	TBD	04/01/20	 Clarification regarding disposal of hazardous waste through evaporation. Updated procedures on hazardous waste determination (hazardous/non-hazardous) and labelling. Minor edits updating the document.
2	1/12/2021	April Camenisch	1/12/21	Updated Suborder links.

U.S. EPA Hazardous Waste No.	Chemical Abstracts No.	Substance
P023	107-20-0	Acetaldehyde, chloro-
P002	591-08-2	Acetamide, N-(aminothioxomethyl)-
P057	640-19-7	Acetamide, 2-fluoro-
P058	62-74-8	Acetic acid, fluoro-, sodium salt
P002	591-08-2	1-Acetyl-2-thiourea
P003	107-02-8	Acrolein
P070	116-06-3	Aldicarb
P203	1646-88-4	Aldicarb sulfone.
P004	309-00-2	Aldrin
P005	107-18-6	Allyl alcohol
P006	20859-73-8	Aluminum phosphide (R,T)
P007	2763-96-4	5-(Aminomethyl)-3-isoxazolol
P008	504-24-5	4-Aminopyridine
P009	131-74-8	Ammonium picrate (R)
P119	7803-55-6	Ammonium vanadate
P099	506-61-6	Argentate(1-), bis(cyano-C)-, potassium
P010	7778-39-4	Arsenic acid H ₃ AsO ₄
P012	1327-53-3	Arsenic oxide As ₂ O ₃
P011	1303-28-2	Arsenic oxide As ₂ O ₅
P011	1303-28-2	Arsenic pentoxide
P012	1327-53-3	Arsenic trioxide
P038	692-42-2	Arsine, diethyl-
P036	696-28-6	Arsonous dichloride, phenyl-
P054	151-56-4	Aziridine
P067	75-55-8	Aziridine, 2-methyl-
P013	542-62-1	Barium cyanide
P024	106-47-8	Benzenamine, 4-chloro-
P077	100-01-6	Benzenamine, 4-nitro-
P028	100-44-7	Benzene, (chloromethyl)-
P042	51-43-4	1,2-Benzenediol, 4-[1-hydroxy-2-(methylamino)ethyl]-, (R)-
P046	122-09-8	Benzeneethanamine, alpha,alpha-dimethyl-
P014	108-98-5	Benzenethiol

P127	1563-66-2	7-Benzofuranol, 2,3-dihydro-2,2-dimethyl-, methylcarbamate.
P188	57-64-7	Benzoic acid, 2-hydroxy-, compd. with (3aS-cis)-1,2,3,3a,8,8a-hexahydro-1,3a,8-trimethylpyrrolo[2,3-b]indol-5-yl methylcarbamate ester (1:1).
P001	181-81-2	2H-1-Benzopyran-2-one, 4-hydroxy-3-(3-oxo-1-phenylbutyl)-, & salts, when present at concentrations greater than 0.3%
P028	100-44-7	Benzyl chloride
P015	7440-41-7	Beryllium powder
P017	598-31-2	Bromoacetone
P018	357-57-3	Brucine
P045	39196-18-4	2-Butanone, 3,3-dimethyl-1-(methylthio)-, O-[(methylamino)carbonyl] oxime
P021	592-01-8	Calcium cyanide
P021	592-01-8	Calcium cyanide Ca(CN) ₂
P189	55285-14-8	Carbamic acid, [(dibutylamino)- thio]methyl-, 2,3-dihydro-2,2-dimethyl- 7-benzofuranyl ester.
P191	644-64-4	Carbamic acid, dimethyl-, 1-[(dimethyl-amino)carbonyl]- 5-methyl-1H- pyrazol-3-yl ester.
P192	119-38-0	Carbamic acid, dimethyl-, 3-methyl-1- (1-methylethyl)-1H- pyrazol-5-yl ester.
P190	1129-41-5	Carbamic acid, methyl-, 3-methylphenyl ester.
P127	1563-66-2	Carbofuran.
P022	75-15-0	Carbon disulfide
P095	75-44-5	Carbonic dichloride
P189	55285-14-8	Carbosulfan.
P023	107-20-0	Chloroacetaldehyde
P024	106-47-8	p-Chloroaniline
P026	5344-82-1	1-(o-Chlorophenyl)thiourea
P027	542-76-7	3-Chloropropionitrile
P029	544-92-3	Copper cyanide
P029	544-92-3	Copper cyanide Cu(CN)
P202	64-00-6	m-Cumenyl methylcarbamate.
P030		Cyanides (soluble cyanide salts), not otherwise specified
P031	460-19-5	Cyanogen
P033	506-77-4	Cyanogen chloride
P033	506-77-4	Cyanogen chloride (CN)Cl
P034	131-89-5	2-Cyclohexyl-4,6-dinitrophenol
P016	542-88-1	Dichloromethyl ether

P036	696-28-6	Dichlorophenylarsine
P037	60-57-1	Dieldrin
P038	692-42-2	Diethylarsine
P041	311-45-5	Diethyl-p-nitrophenyl phosphate
P040	297-97-2	O,O-Diethyl O-pyrazinyl phosphorothioate
P043	55-91-4	Diisopropylfluorophosphate (DFP)
P004	309-00-2	1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-hexa- chloro-1,4,4a,5,8,8a,-hexahydro-, (1alpha,4alpha,4abeta,5alpha,8alpha,8abeta)-
P060	465-73-6	1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-hexa- chloro-1,4,4a,5,8,8a-hexahydro-, (1alpha,4alpha,4abeta,5beta,8beta,8abeta)-
P037	60-57-1	2,7:3,6-Dimethanonaphth[2,3-b]oxirene, 3,4,5,6,9,9-hexachloro-1a,2,2a,3,6,6a,7,7a-octahydro-, (1aalpha,2beta,2aalpha,3beta,6beta,6aalpha,7beta,7aalpha)-
P051	¹ 72-20-8	2,7:3,6-Dimethanonaphth [2,3-b]oxirene, 3,4,5,6,9,9-hexachloro-la,2,2a,3,6,6a,7,7a-octahydro-, (1aalpha,2beta,2abeta,3alpha,6alpha,6abeta,7beta,7aalpha)-, & metabolites
P044	60-51-5	Dimethoate
P046	122-09-8	alpha,alpha-Dimethylphenethylamine
P191	644-64-4	Dimetilan.
P047	1534-52-1	4,6-Dinitro-o-cresol, & salts
P048	51-28-5	2,4-Dinitrophenol
P020	88-85-7	Dinoseb
P085	152-16-9	Diphosphoramide, octamethyl-
P111	107-49-3	Diphosphoric acid, tetraethyl ester
P039	298-04-4	Disulfoton
P049	541-53-7	Dithiobiuret
P185	26419-73-8	1,3-Dithiolane-2-carboxaldehyde, 2,4-dimethyl-, O- [(methylamino)-carbonyl]oxime.
P050	115-29-7	Endosulfan
P088	145-73-3	Endothall
P051	72-20-8	Endrin
P051	72-20-8	Endrin, & metabolites
P042	51-43-4	Epinephrine
P031	460-19-5	Ethanedinitrile
P194	23135-22-0	Ethanimidothioic acid, 2-(dimethylamino)-N-[[(methylamino) carbonyl]oxy]-2-oxo-, methyl ester.

P066	16752-77-5	Ethanimidothioic acid, N-[[(methylamino)carbonyl]oxy]-, methyl ester
P101	107-12-0	Ethyl cyanide
P054	151-56-4	Ethyleneimine
P097	52-85-7	Famphur
P056	7782-41-4	Fluorine
P057	640-19-7	Fluoroacetamide
P058	62-74-8	Fluoroacetic acid, sodium salt
P198	23422-53-9	Formetanate hydrochloride.
P197	17702-57-7	Formparanate.
P065	628-86-4	Fulminic acid, mercury(2 +) salt (R,T)
P059	76-44-8	Heptachlor
P062	757-58-4	Hexaethyl tetraphosphate
P116	79-19-6	Hydrazinecarbothioamide
P068	60-34-4	Hydrazine, methyl-
P063	74-90-8	Hydrocyanic acid
P063	74-90-8	Hydrogen cyanide
P096	7803-51-2	Hydrogen phosphide
P060	465-73-6	Isodrin
P192	119-38-0	Isolan.
P202	64-00-6	3-Isopropylphenyl N-methylcarbamate.
P007	2763-96-4	3(2H)-Isoxazolone, 5-(aminomethyl)-
P196	15339-36-3	Manganese, bis(dimethylcarbamodithioato-S,S')-,
P196	15339-36-3	Manganese dimethyldithiocarbamate.
P092	62-38-4	Mercury, (acetato-O)phenyl-
P065	628-86-4	Mercury fulminate (R,T)
P082	62-75-9	Methanamine, N-methyl-N-nitroso-
P064	624-83-9	Methane, isocyanato-
P016	542-88-1	Methane, oxybis[chloro-
P112	509-14-8	Methane, tetranitro- (R)
P118	75-70-7	Methanethiol, trichloro-
P198	23422-53-9	Methanimidamide, N,N-dimethyl-N'-[3-[[(methylamino)-carbonyl]oxy]phenyl]-, monohydrochloride.
P197	17702-57-7	Methanimidamide, N,N-dimethyl-N'-[2-methyl-4- [[(methylamino)carbonyl]oxy]phenyl]-

P050	115-29-7	6,9-Methano-2,4,3-benzodioxathiepin, 6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-, 3-oxide
P059	76-44-8	4,7-Methano-1H-indene, 1,4,5,6,7,8,8-heptachloro-3a,4,7,7a-tetrahydro-
P199	2032-65-7	Methiocarb.
P066	16752-77-5	Methomyl
P068	60-34-4	Methyl hydrazine
P064	624-83-9	Methyl isocyanate
P069	75-86-5	2-Methyllactonitrile
P071	298-00-0	Methyl parathion
P190	1129-41-5	Metolcarb.
P128	315-8-4	Mexacarbate.
P072	86-88-4	alpha-Naphthylthiourea
P073	13463-39-3	Nickel carbonyl
P073	13463-39-3	Nickel carbonyl Ni(CO) ₄ , (T-4)-
P074	557-19-7	Nickel cyanide
P074	557-19-7	Nickel cyanide Ni(CN) ₂
P075	¹ 54-11-5	Nicotine, & salts
P076	10102-43-9	Nitric oxide
P077	100-01-6	p-Nitroaniline
P078	10102-44-0	Nitrogen dioxide
P076	10102-43-9	Nitrogen oxide NO
P078	10102-44-0	Nitrogen oxide NO ₂
P081	55-63-0	Nitroglycerine (R)
P082	62-75-9	N-Nitrosodimethylamine
P084	4549-40-0	N-Nitrosomethylvinylamine
P085	152-16-9	Octamethylpyrophosphoramide
P087	20816-12-0	Osmium oxide OsO4, (T-4)-
P087	20816-12-0	Osmium tetroxide
P088	145-73-3	7-Oxabicyclo[2.2.1]heptane-2,3-dicarboxylic acid
P194	23135-22-0	Oxamyl.
P089	56-38-2	Parathion
P034	131-89-5	Phenol, 2-cyclohexyl-4,6-dinitro-
P048	51-28-5	Phenol, 2,4-dinitro-
P047	¹ 534-52-1	Phenol, 2-methyl-4,6-dinitro-, & salts

P020	88-85-7	Phenol, 2-(1-methylpropyl)-4,6-dinitro-
P009	131-74-8	Phenol, 2,4,6-trinitro-, ammonium salt (R)
P128	315-18-4	Phenol, 4-(dimethylamino)-3,5-dimethyl-, methylcarbamate (ester).
P199	2032-65-7	Phenol, (3,5-dimethyl-4-(methylthio)-, methylcarbamate
P202	64-00-6	Phenol, 3-(1-methylethyl)-, methyl carbamate.
P201	2631-37-0	Phenol, 3-methyl-5-(1-methylethyl)-, methyl carbamate.
P092	62-38-4	Phenylmercury acetate
P093	103-85-5	Phenylthiourea
P094	298-02-2	Phorate
P095	75-44-5	Phosgene
P096	7803-51-2	Phosphine
P041	311-45-5	Phosphoric acid, diethyl 4-nitrophenyl ester
P039	298-04-4	Phosphorodithioic acid, O,O-diethyl S-[2-(ethylthio)ethyl] ester
P094	298-02-2	Phosphorodithioic acid, O,O-diethyl S-[(ethylthio)methyl] ester
P044	60-51-5	Phosphorodithioic acid, O,O-dimethyl S-[2-(methylamino)-2-oxoethyl] ester
P043	55-91-4	Phosphorofluoridic acid, bis(1-methylethyl) ester
P089	56-38-2	Phosphorothioic acid, O,O-diethyl O-(4-nitrophenyl) ester
P040	297-97-2	Phosphorothioic acid, O,O-diethyl O-pyrazinyl ester
P097	52-85-7	Phosphorothioic acid, O-[4-[(dimethylamino)sulfonyl]phenyl] O,O-dimethyl ester
P071	298-00-0	Phosphorothioic acid, O,O,-dimethyl O-(4-nitrophenyl) ester
P204	57-47-6	Physostigmine.
P188	57-64-7	Physostigmine salicylate.
P110	78-00-2	Plumbane, tetraethyl-
P098	151-50-8	Potassium cyanide
P098	151-50-8	Potassium cyanide K(CN)
P099	506-61-6	Potassium silver cyanide
P201	2631-37-0	Promecarb
P070	116-06-3	Propanal, 2-methyl-2-(methylthio)-, O-[(methylamino)carbonyl]oxime
P203	1646-88-4	Propanal, 2-methyl-2-(methyl-sulfonyl)-, O-[(methylamino)carbonyl] oxime.
P101	107-12-0	Propanenitrile
P027	542-76-7	Propanenitrile, 3-chloro-

P069	75-86-5	Propanenitrile, 2-hydroxy-2-methyl-
P081	55-63-0	1,2,3-Propanetriol, trinitrate (R)
P017	598-31-2	2-Propanone, 1-bromo-
P102	107-19-7	Propargyl alcohol
P003	107-02-8	2-Propenal
P005	107-18-6	2-Propen-1-ol
P067	75-55-8	1,2-Propylenimine
P102	107-19-7	2-Propyn-1-ol
P008	504-24-5	4-Pyridinamine
P075	¹ 54-11-5	Pyridine, 3-(1-methyl-2-pyrrolidinyl)-, (S)-, & salts
P204	57-47-6	Pyrrolo[2,3-b]indol-5-ol, 1,2,3,3a,8,8a-hexahydro-1,3a,8-trimethyl-, methylcarbamate (ester), (3aS-cis)
P114	12039-52-0	Selenious acid, dithallium(1 +) salt
P103	630-10-4	Selenourea
P104	506-64-9	Silver cyanide
P104	506-64-9	Silver cyanide Ag(CN)
P105	26628-22-8	Sodium azide
P106	143-33-9	Sodium cyanide
P106	143-33-9	Sodium cyanide Na(CN)
P108	¹ 57-24-9	Strychnidin-10-one, & salts
P018	357-57-3	Strychnidin-10-one, 2,3-dimethoxy-
P108	¹ 57-24-9	Strychnine, & salts
P115	7446-18-6	Sulfuric acid, dithallium(1 +) salt
P109	3689-24-5	Tetraethyldithiopyrophosphate
P110	78-00-2	Tetraethyl lead
P111	107-49-3	Tetraethyl pyrophosphate
P112	509-14-8	Tetranitromethane (R)
P062	757-58-4	Tetraphosphoric acid, hexaethyl ester
P113	1314-32-5	Thallic oxide
P113	1314-32-5	Thallium oxide Tl ₂ O ₃
P114	12039-52-0	Thallium(I) selenite
P115	7446-18-6	Thallium(I) sulfate
P109	3689-24-5	Thiodiphosphoric acid, tetraethyl ester
P045	39196-18-4	Thiofanox

P049	541-53-7	Thioimidodicarbonic diamide [(H ₂ N)C(S)] ₂ NH
P014	108-98-5	Thiophenol
P116	79-19-6	Thiosemicarbazide
P026	5344-82-1	Thiourea, (2-chlorophenyl)-
P072	86-88-4	Thiourea, 1-naphthalenyl-
P093	103-85-5	Thiourea, phenyl-
P185	26419-73-8	Tirpate.
P123	8001-35-2	Toxaphene
P118	75-70-7	Trichloromethanethiol
P119	7803-55-6	Vanadic acid, ammonium salt
P120	1314-62-1	Vanadium oxide V ₂ O ₅
P120	1314-62-1	Vanadium pentoxide
P084	4549-40-0	Vinylamine, N-methyl-N-nitroso-
P001	¹ 81-81-2	Warfarin, & salts, when present at concentrations greater than 0.3%
P205	137-30-4	Zinc, bis(dimethylcarbamodithioato-S,S')-,
P121	557-21-1	Zinc cyanide
P121	557-21-1	Zinc cyanide Zn(CN) ₂
P122	1314-84-7	Zinc phosphide Zn ₃ P ₂ , when present at concentrations greater than 10% (R,T)
P205	137-30-4	Ziram.
