SYNOPSIS:

The Middle Class Tax Relief and Job Creation Act of 2012 (Act) [5] defined responsibilities for the National Institute of Standards and Technology (NIST) [1] in regards to the Nationwide Public Safety Broadband Network (NPSBN) and the First Responder Network Authority (FN) [2]. AT&T was awarded the contract by FN to partner with FN and to build the NPSBN. One requirement of the Act is that the Director of NIST shall ensure the development of a list of certified devices that meet appropriate protocols and standards for access to, use of, or compatibility with the NPSBN that FN and AT&T build and maintain. This requirement is carried out by the Public Safety Communications Research Division (PSCR) [3] of the NIST Communications Technology Laboratory. This document lists devices that have been certified to meet appropriate protocols and standards for access to, use of, or compatibility with the NPSBN that FN and AT&T build and maintain, in accordance with the process document: "Process Document for the NIST List of Certified Devices" [4]. **NIST does not test nor certify the devices.**

NOTE: If a device does not appear in the Active List sheet of this document, then the device has not been certified to meet appropriate protocols and standards for use on the FN NPSBN. The NIST List of Certified Devices applies only to the NPSBN built and maintained by FN and AT&T, and does not apply to any other commercial network.

Note: These products may have limited or discontinued support from their manufacturer. This could affect, among other things, availability to obtain repair components and parts. These products will continue to operate on the FirstNet network but may no longer receive software updates from the manufacturer to add additional features or protection from the latest security vulnerabilities. Older devices may not meet the minimum hardware requirements to install newer applications.

Note: These products may have limited or discontinued support from their manufacturer. This could affect, among other things, availability to obtain repair components and parts. These products will continue to operate on the FirstNet network but may no longer receive software updates from the manufacturer to add additional features or protection from the latest security vulnerabilities. Older devices may not meet the minimum hardware requirements to install newer applications.

Note: These products may have limited or discontinued support from their manufacturer. This could affect, among other things, availability to obtain repair components and parts. These products will continue to operate on the FirstNet network but may no longer receive software updates from the manufacturer to add additional features or protection from the latest security vulnerabilities. Older devices may not meet the minimum hardware requirements to install newer applications.

Note: These products may have limited or discontinued support from their manufacturer. This could affect, among other things, availability to obtain repair components and parts. These products will continue to operate on the FirstNet network but may no longer receive software updates from the manufacturer to add additional features or protection from the latest security vulnerabilities. Older devices may not meet the minimum hardware requirements to install newer applications.
