General Comment

I went to early voting and could not vote because there was no accessible machine setup. My county only had one early voting location. I specifically went in the middle of the week, a week into early voting, not at the beginning of the day, nor close to the end of the day to avoid all of the usual reasons for not having the machine setup. My county clerk was on site and I did complain directly to her and she had someone call to make arrangements to provide transportation. This meant that I had to arrange another day and that I would have to ride in a strangers car during covid. If she is replaced, will I have to endure this again. After several years, my local polling place on election day had finally been trained to have the machine setup because he knew I would be voting. I provide care for a family member and plan to use early voting in the future so that I can go on a day that they are in good health.
