Subject: NIST-2021-003 Request for Information Regarding Promoting Access to Voting

=======

First, I want to strongly endorse the comments and suggestions from Verified Voting.

I also want to add three sets of suggestions of my own (please see attached MS Word file) for

·   research about different kinds of barriers voters with disabilities encounter;

·   specific research and development that could be helpful for voters with disabilities; and

·   development of a set of Principles for Accessible Participation in Elections

Thank you for your consideration,

John L. McCarthy
retired computer scientist (from Lawrence Berkeley National Laboratory)
1521 Campus Drive, Berkeley CA 94708
