

UNITED STATES DEPARTMENT OF COMMERCE
National Institute of Standards and Technology
Gaithersburg, Maryland 20899

August 5, 2026

Dear NIST SRM Customer,

Standard Reference Materials are proprietary products of NIST. The term "Standard Reference Materials" (SRM) and the SRM logo "<SRM>" are federally registered trademarks of the National Institute of Standards and Technology (NIST), and the Federal Government, who retain exclusive rights in the term. Permission to use the term and/or logo is controlled by NIST.

NIST distributes SRMs developed and certified in the NIST laboratories. There can be no substitute for NIST SRMs as they legally constitute part of the national measurement infrastructure of the United States and as such, are an essential transfer mechanism for national (and international) measurement traceability.

As global commerce and trade have become more integrated, many customers are increasingly using SRMs to achieve conformance with process requirements and measurement quality that address international as well as national needs for commerce and trade.

NIST distributes SRMs developed and certified in the NIST laboratories as well as select reference materials produced by partner organizations when availability is to be in the public interest or when an alternate means of national distribution does not exist. Customers wishing to purchase NIST SRMs, but unable to comply with US Federal Government [Terms and Conditions](#) (prepayment), may find that our licensed distributors provide alternative payment terms. For assistance in identifying a NIST SRM Licensed Distributor, visit <https://www.nist.gov/srm/ordering-policies-and-pricing/licensed-distributors>.

If additional information is needed to explain the uniqueness of NIST SRMs, please contact srminfo@nist.gov.

Sincerely,

Steven Choquette, Director
Office of Reference Materials
100 Bureau Drive, Stop 2300 Gaithersburg, MD 20899-2300
