

NIST VOTING PROGRAM MARY BRADY, PROGRAM MANAGER

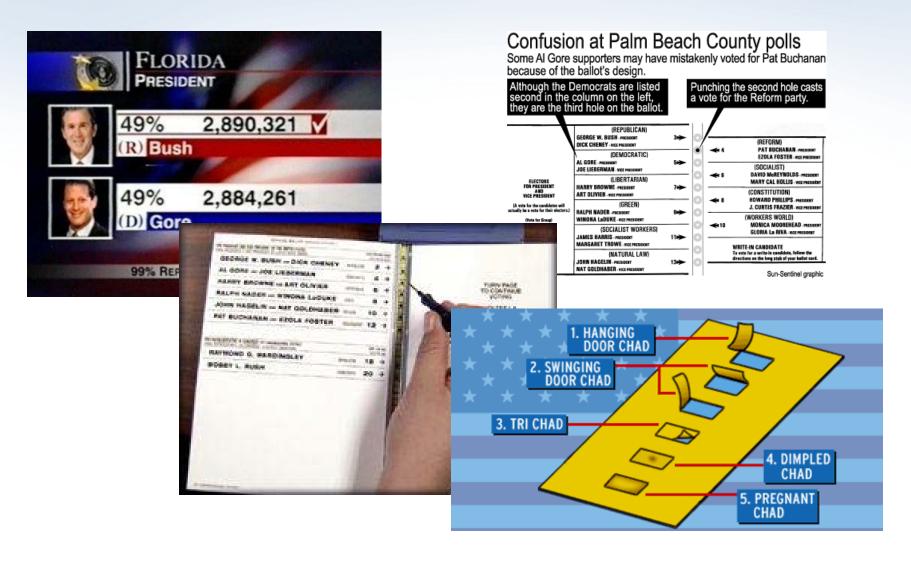

Outline

- Motivation & Congressional Mandates
- Help America Vote Act
- Current Challenges
- Engage the Broader Community
- Summary

Motivation: 2000 Presidential Election

Congressional Mandates

HAVA 2002 (Public Law 107-252): The Help America Vote Act (HAVA) requires NIST/SSD to provide technical support for the development of Voluntary Voting Standard Guidelines (VVSG). Such technical work includes computer security, methods to detect and prevent fraud, protection of voter privacy, the role of human factors, including assistive technology for voters with disabilities, and remote access voting, including voting through the internet.

MOVE 2009: The Military and Overseas Voters Empowerment Act of 2009 (MOVE) directs NIST and EAC to provide "best practices or standards in accordance with electronic absentee voting guidelines established"... to support the pilot program or programs developed by DOD as directed by the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA) of 1986 as amended.

- NIST Response: A New Paradigm
- Summary

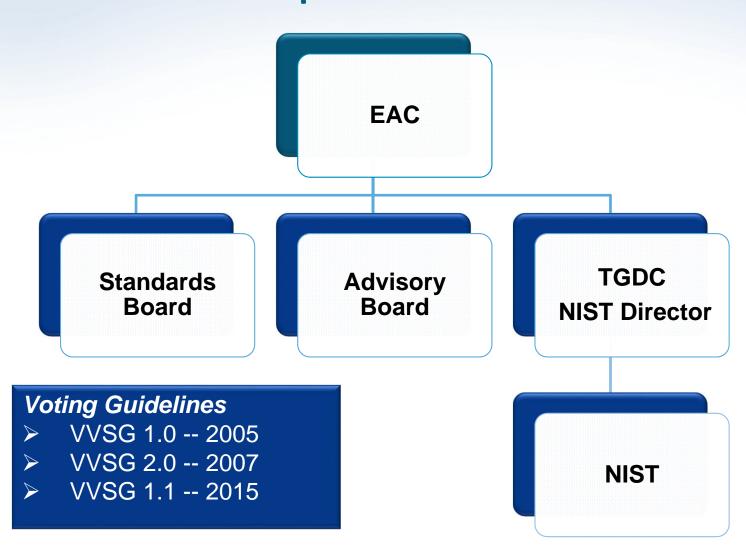

Help America Vote Act

- Standards Development
- Accreditation, Testing, and Certification
- Usage by States

VVSG Development

Lab Accreditation, Testing, Certification

VSTL's – Voting System Test Laboratories are recommended for accreditation by NIST NVLAP Program. VSTL's test voting systems and make recommendation to the EAC.

Certification - procedure by which a **third party** gives written assurance that a product, process or service conforms to specified **requirements**.

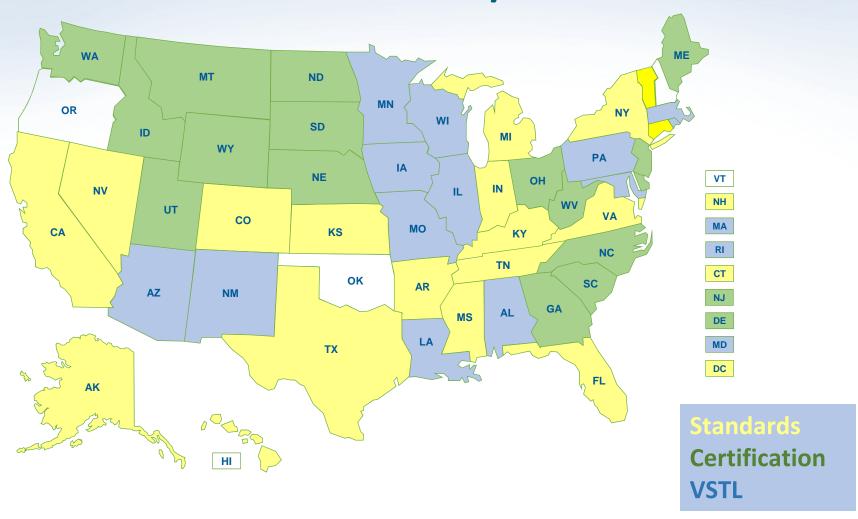

EAC – Reviews testing information provided by the VSTL's and certifies a system. Also responsible for decertifying a system if necessary.

EAC – In consultation with NIST, may provide a request for interpretation.

VVSG: In use in 47/50 States

Outline

- Motivation & Congressional Mandates
- Help America Vote Act
- Current Challenges
- Engage the Broader Community
- Summary

Current Challenges

- Presidential Commission on Election Administration
- Jurisdictions: Large and Small
- Equipment Changes
- Increasing Use of Information Technology in Elections

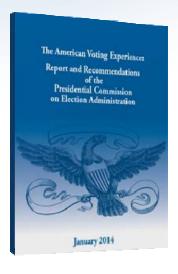

In Recent Years...

- No EAC Commissioners from 2011 until January 2015
- TGDC has been on a hiatus
- Presidential Commission on Election Administration
- Voting Equipment is Changing
- Election officials looking to capitalize on advances in IT to gain efficiencies and lower cost
- Increasingly complex IT application
- Interconnected devices
- New paradigms for voting systems
- Voter Registration
- Ballot marking devices
- E-pollbooks
- Election Night Reporting

Presidential Commission on Election Administration (PCEA)

The Commission's key recommendations call for:

Modernization of the registration process through continued expansion of online voter registration and expanded state collaboration in improving the accuracy of voter lists

Measures to improve access to the polls through multiple opportunities to vote before the traditional Election Day and the selection of suitable, well-equipped polling place facilities, such as schools

State-of-the-art techniques to assure efficient management of polling places, including tools the Commission is publicizing and recommending for the efficient allocation of polling place resources

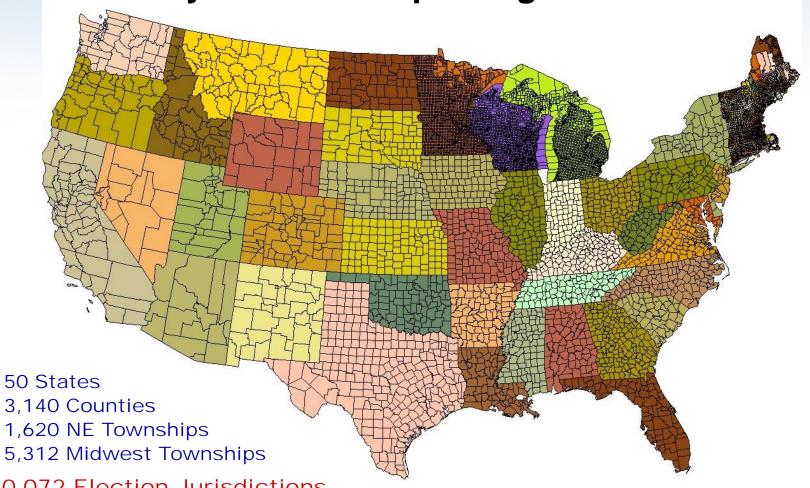

Reforms of the standard-setting and certification process for new voting technology to address soon-to-be antiquated voting machines and to encourage innovation and the adoption of widely available off-the-shelf technologies

Basic Election Administration Facts

Diversity is the underpinning of Elections.

10,072 Election Jurisdictions

NIST Roadmap

- Partnered with Center for Civic Design
- Convened 2 Workshops
- Draft Report Available at:
 - http://civicdesign.org/wp-content/uploads/Roadmap-V1-FINAL-15-0205a.pdf
- Identified Six Priority Areas:
 - Support the design process
 - Engage voters effectively
 - Address the entire voter journey
 - Support evolving technology
 - Provide useful guidance and standards
 - Improve testing in design and certification

Test Assertions: Low-level details

Draft from VVSG

In-Depth Review

Feedback

Usability/Accessibility (U/A) assertions

- *Covered 19 sections*: 3.1.1-3.2.8, 7.9.5-7.9.7
- **546 TAs** = (204 usability, 287 acc., 55 VVPAT

Security assertions

- Covered Chapter 8, 9
- 404 TAs

U&A: An Example

- Principle: No interference
- VVSG 1.0 Requirement 3.2.2.2c-iii: No voting equipment shall cause electromagnetic interference with assistive hearing devices that would substantially degrade the performance of those devices. The voting equipment, considered as a wireless device, shall achieve at least a category T4 rating as defined by American National Standard for Methods of Measurement of Compatibility between Devices and Hearing Aids, ANSI C63.19.
 - TA3222ciii-1: Voting equipment, when used with assistive hearing devices, SHALL achieve at least a category T4 rating as defined by American National Standard for Methods of Measurement of Compatibility between Wireless Communications Devices and Hearing Aids, ANSI C63.19.
 - TA3222ciii-1-1: Voting equipment, when used with cochlear implants, SHALL achieve at least
 a category T4 rating as defined by American National Standard for Methods of Measurement of
 Compatibility between Wireless Communications Devices and Hearing Aids, ANSI C63.19.
 - TA3222ciii-1-2: Voting equipment, when used with hearing aids, SHALL achieve at least a
 category T4 rating as defined by American National Standard for Methods of Measurement of
 Compatibility between Wireless Communications Devices and Hearing Aids, ANSI C63.19.

Outline

- Motivation & Congressional Mandates
- Help America Vote Act
- Current Challenges
- Engage the Broader Community
- Summary

Summary

- Elections are complex and the elections community is very diverse
- Wider engagement of state and local election officials, manufacturers, test laboratories, academics, and a number of advocacy groups
- Working with the broader elections community on laying the foundation for the next version of the VVSG
- Restarting the TGDC with recently appointed Commissioners
- Let's get to work!
