

# USGv6 Test Selection Tables

## Authentication Trailer OSPF for IPv6

**I9-Interoperability:** Routing Protocol R1v1.0

**Applicable Profile:** NIST SP 500-267B Revision 1 USGv6 Profile – November 2020.

**Test Specification Id:**

- [[OSPFv3-Interoperability](#)] OSPFv3 Interoperability Test Plan, Version 2.0, July, 2021, [editor: [UNH InterOperability Laboratory](#)].

**Interoperability Partner Requirements:**

- Any host or router claiming compliance with the USGv6 profile MUST demonstrate evidence of interoperability with one **or more** independent implementations of IPv6. Three implementations are recommended to be used when support for RFC 7166 is more widely adopted.
- Target nodes must not change once testing has begun.

**Interoperability Partners:**

- DUT = TR1 for all tests.
- TAR-Router1 = Independent Implementation Device B
- TAR-Router2 = Independent Implementation Device C
- TAR-Router3 = Independent Implementation Device D
- H1, H2 and H3 = Any devices which can execute ping6 function

OSPF for IPv6 Test Check List			
Reference	Test Specification Id	Test Number	Device Type
RFC 5340 RFC 7166	OSPFv3-Interoperability	OSPFv3.IO.6.1 Authentication Trailer with HMAC-SHA-256 (A)	Router
RFC 5340 RFC 7166	OSPFv3-Interoperability	OSPFv3.IO.6.2 Key Changes (A)(B)(C)(D)	Router
RFC 5340 RFC 7166	OSPFv3-Interoperability	OSPFv3.IO.6.3 Sequence Number Across Reboot	Router
