IPsec OSPF for IPv6

I9-Interoperability: Routing Protocol R1v1.1

Applicable Profile: NIST SP 500-267B Revision 1 USGv6 Profile – November 2020.

Test Specification Id:

- [[OSPFv3-Interoperability](#)] OSPFv3 Interoperability Test Plan, [editor: [UNH InterOperability Laboratory](#)].

Interoperability Partner Requirements:

- Any host or router claiming compliance with the USGv6 profile MUST demonstrate evidence of interoperability with one **or more** independent implementations of IPv6. Routers must demonstrate evidence of interoperability with at least one independent implementation of OSPF-IPsec in order to claim support for this capability.
- Target nodes must not change once testing has begun.

Interoperability Partners:

- DUT = TR1 for all tests.
- TAR-Router1 = Independent Implementation Device B
- TAR-Router2 = Independent Implementation Device C
- H1 and H2 = Any devices which can execute ping6 function

The objective of this test selection sheet is to provide a reference for available test specifications that identifies tests applicable to the USGv6 Profile.
