

Heather Sanders joined Southern California Edison in August 2015. Within electric system planning, her team is focused on planning the subtransmission system, environmental licensing, and strategic engagement to promote grid modernization.

Before joining SCE, Ms. Sanders held multiple roles at the California Independent System Operator (ISO) in regulatory policy and smart grid technology and strategy. While at the ISO, she jointly led several road mapping efforts with the California Public Utilities Commission and California Energy Commission. These roadmaps outline needed actions to advance California energy and

environment objectives with publications focused on Energy Storage, Demand Response and Energy Efficiency, and Vehicle Grid Integration.

Prior to the ISO, she delivered software and consulting solutions aimed at facilitating wholesale energy market participation serving a wide variety of industry players including utilities, independent power producers, retail service providers and power marketers.

Ms. Sanders was appointed to the DOE Electricity Advisory Committee in 2014 and also serves on the GridWise Architecture Council. She is also a committee member for DistribuTech.

Ms. Sanders holds a BS in Electrical Engineering from South Dakota School of Mines & Technology and a MBA from the University of Utah. She is also a member of IEEE.
