Preface

This bibliography historically began as the Bibliography Project generated by the Scientific Working Group on Bloodstain Pattern Analysis (SWGSTAIN) Research Subcommittee. This list has been updated and will continue to be updated periodically.

Literature related to bloodstain pattern analysis (BPA) was located in scientific journals, newsletters, technical reports, books, web pages, theses, conference papers, law reports and magazines. This is not considered a complete list on the topic of BPA.

The BPA Research Task Group would like to acknowledge Trent University for their ongoing support with this bibliography and acknowledge the contributions from the SWGSTAIN membership, the Midwest Forensics Resource Center, the Federal Bureau of Investigation, the Institute for Environmental Science and Research, Trent University and the Ontario Provincial Police for their initial support.
