

Karen Reczek is a Social Scientist within the Standards Coordination Office (SCO) at the National Institute of Standards and Technology (NIST). Karen provides strategic and tactical support to the NIST-administered, Organization of Scientific Area Committees for Forensic Science and its next iteration. Karen works with high level Federal, State, Local & private sector officials to coordinate standards development to identify and support development of standard activities and programs to meet Federal needs. Karen also advises on the design and development of electronic information products, database applications and internal and external web sites, including system functionality, record and/or site design, and user interface. She is responsible for management and promotion of the “Standards Information Center” and its services, including authoring the US Compliance Guides and providing research services on standards for NIST staff.

Karen is a member of ASTM International’s E30 Forensic Science Executive Committee serving as Membership Secretary and a member of ISO Technical Committee (TC) 272 Forensic Science and the US Technical Advisory Group. Karen serves as the NIST Ex-Officio on the Organization of Scientific Area Committee for Forensic Science (OSAC) Forensic Science Standards Board. She is the Vice President of the SES: The Society for Standards Professionals Board of Directors.

Previously Karen worked at Bureau Veritas as Senior Manager, Information Resources Center for 14 years and prior to that at Bristol-Myers Squibb in Scientific and Information Resources and Services. Karen has over 22 years’ experience in standards and conformity assessment activities and research. Karen holds a master’s degree in Library and Information Science from the State University of NY at Buffalo and a BS Double Major in Social Sciences and Humanities from Clarkson University.

She assumed the NIST Ex Officio role in 2019.
