

David Kanaris serves as Forensic Science Laboratory Chief at the Alaska Scientific Crime Detection Laboratory (SCDL), where he provides strategic direction and executive oversight for forensic operations statewide.

David's background is in impression evidence (footwear), where he was initially trained by the Forensic Science Service in the UK. David has previously chaired the NIST OSAC Footwear & Tire Tread Subcommittee (2019–2025) and presented at numerous conferences and trainings across the world.

Beyond OSAC, he contributes nationally through memberships in the American Society of Crime Laboratory Directors (American Society of Crime Laboratory Directors) and the International Association for Identification (IAI).
