Table 1: Scenario 4 Interoperability, Matcher A

POEBVA and MIN:A. The fraction of same-image templates produced by the vendors identified in the rows and columns that fail to exceed the threshold that produced a FMR of 0.01 and 0.001 using matcher A. Cells are colored green when the value is less than 0.002.

Table 13: Scenario 4 Interoperability, Matcher N

POEBVA and MIN:A . The fraction of same-image templates produced by the vendors identified in the rows and columns that fail to exceed the threshold that produced a FMR of 0.01 and 0.001 using matcher N. Cells are colored green when the value is less than 0.002.
