
NIST is issuing this amendment (Amendment 1) to make several updates to the 2016-NIST-MSE-01 FFO as described below. This Amendment Package will be in effect for the NIST MSE Research Grant Program until the posting of the FY 2018 NIST MSE Research Grants Programs NOFO on Grants.gov. NIST anticipates the FY 2018 MSE Research Grant Program will open on Grants.gov in October 2017.

No other revisions are being made by this amendment. The full text of the Amended NOFO, including the revisions being made now, is set forth below.
Announced February 19, 2016; Amended May 22, 2017

NOTICE OF FUNDING OPPORTUNITY (NOFO)
Measurement Science and Engineering (MSE) Research Grant Programs

EXECUTIVE SUMMARY

- **Federal Agency Name:** National Institute of Standards and Technology (NIST), United States Department of Commerce (DoC)

- **Funding Opportunity Title:** Measurement Science and Engineering (MSE) Research Grant Programs for:
  1. the Material Measurement Laboratory (MML);
  2. the Physical Measurement Laboratory (PML);
  3. the Engineering Laboratory (EL);
  4. Fire Research (FR);
  5. the Information Technology Laboratory (ITL);
  6. the Communications Technology Laboratory (CTL);
  7. the NIST Center for Neutron Research (NCNR);
  8. the Center for Nanoscale Science and Technology (CNST);
  9. the Special Programs Office (SPO);
  10. the Standards Coordination Office (SCO);
  11. the International and Academic Affairs Office (IAAO);
  12. the Associate Director for Laboratory Programs (ADLP); and
  13. the Associate Director for Innovation and Industry Services (ADIIS).

- **Announcement Type:** Modification of February 19, 2016 Announcement of Funding Opportunity (see Table above)

- **Funding Opportunity Number:** 2016-NIST-MSE-01

- **Catalog of Federal Domestic Assistance (CFDA) Numbers:** 11.609: Measurement and Engineering Research and Standards, 11.619: Arrangements for Interdisciplinary Research Infrastructure, and 11.620: Science, Technology, Business and/or Education Outreach

- **Dates:** Applications will be accepted and considered on a rolling basis as they are received. See Section IV.4. in the Full Announcement Text of this NOFO.

When developing your submission timeline, please keep in mind that (1) all applicants are required to have a current registration in the System for Award Management (SAM.gov); (2) the free annual registration process in the electronic
System for Award Management (SAM.gov) (see Section IV.3. and Section IV.7.a.(2).(b). of this NOFO) may take between three and five business days, or as long as more than two weeks; (3) electronic applicants are required to have a current registration in Grants.gov; and (4) applicants will receive a series of e-mail messages from Grants.gov over a period of up to two business days before learning whether a Federal agency’s electronic system has received its application. **Please note that a federal assistance award cannot be issued if the designated recipient’s registration in the System for Award Management (SAM.gov) is not current at the time of the award.**

- **Application Submission Address:** See Section IV. in the Full Announcement Text of this NOFO.

- **Funding Opportunity Description:** NIST is soliciting applications for financial assistance for Fiscal Year 2017 (FY17) within the following NIST Laboratory grant programs:
  
  (1) the Material Measurement Laboratory (MML) Grant Program;  
  (2) the Physical Measurement Laboratory (PML) Grant Program;  
  (3) the Engineering Laboratory (EL) Grant Program;  
  (4) the Fire Research (FR) Grant Program;  
  (5) the Information Technology Laboratory (ITL) Grant Program;  
  (6) the Communications Technology Laboratory (CTL) Grant Program;  
  (7) the NIST Center for Neutron Research (NCNR) Grant Program;  
  (8) the Center for Nanoscale Science and Technology (CNST) Grant Program;  
  (9) the Special Programs Office (SPO) Grant Program;  
  (10) the Standards Coordination Office (SCO) Grant Program;  
  (11) the International and Academic Affairs Office (IAAO) Grant Program;  
  (12) the Associate Director for Laboratory Programs (ADLP) Grant Program; and  
  (13) the Associate Director for Innovation and Industry Services (ADIIIS) Grant Program.

This funding opportunity will result in the award of grants or cooperative agreements. A grant or cooperative agreement is not the correct funding vehicle if the principal purpose is to provide products or services for the direct benefit or use of the federal government.

- **Anticipated Funding Amounts:** See Section II. in the Full Announcement Text of this NOFO.

- **Funding Instrument:** Grant or cooperative agreement, as appropriate.
• **Who is Eligible:** Eligibility for all programs listed in this NOFO is open to all non-Federal entities. Eligible applicants include institutions of higher education, non-profit organizations, for-profit organizations, state and local governments, Indian tribes, hospitals, foreign public entities, and foreign governments. Applicants selected for awards are encouraged, but not required, to select underrepresented minorities for participation. In addition, NIST is not able to accept an application from an individual unaffiliated with a sponsoring applicant organization.

• **Cost Sharing Requirements:** The MSE Research Grant Programs do not require cost sharing.

**FULL ANNOUNCEMENT TEXT**

I. **Program Description**

This funding opportunity will result in the award of grants or cooperative agreements.

1. **Material Measurement Laboratory (MML) Grant Program**

The statutory authority for the MML Grant Program is 15 U.S.C. § 272(b) and (c) and 15 U.S.C. § 278g-1(e)(1) and (e)(3).

**Program Description:** The MML Grant Program provides financial assistance to support the conduct of research or a recipient’s portion of collaborative research in the following fields: materials science and engineering, materials measurement science, biosystems and biomaterials, biomolecular measurements, chemical sciences, and
applied chemicals and materials.

MML supports the NIST mission by serving as the national reference laboratory for measurements in the chemical, biological, and material sciences. MML is entrusted with developing, maintaining, advancing, and enabling measurement systems in these areas for the nation. MML activities range from fundamental and applied research on the composition, structure, and properties of industrial, biological, and environmental materials and processes to the development and dissemination of certified reference materials, critically evaluated data and other programs that help assure measurement quality. MML research and measurement services support areas of national importance, such as:

- Advanced materials, from nanomaterials to structural steels to complex fluids;
- Electronics, from semiconductors to organic electronics;
- Energy, from characterization and performance of fossil and alternative fuels to next-generation renewables;
- Environment, from the measurement of automotive exhaust emissions to contaminant monitoring to greenhouse gas monitoring of Earth’s atmosphere and the health and safety aspects of engineered nanomaterials;
- Food safety and nutrition, from contaminant monitoring to ensuring the accuracy of nutritional labels;
- Health care, from clinical diagnostics to tissue engineering and more efficient manufacturing of biologic drugs;
- Infrastructure, from the aging of the country’s bridges and pipelines to the quality of our drinking water;
- Manufacturing, from lightweight alloys for fuel-efficient automobiles to biomanufacturing and data for chemical manufacturing; and
- Safety, security and forensics, from gunshot and explosive residue detection to ensuring the performance of body armor materials and DNA-based human identity testing.

MML also coordinates the NIST-wide Standard Reference Materials® and Standard Reference Data programs, which include production, documentation, inventory, marketing, distribution, and customer service.

The research and measurement services provided by MML underpin measurements in the chemical, biological, and material sciences and support innovation in both mature and emerging industrial sectors. As examples, work to enable reliable and trustworthy measurements and data help:

- Physicians make more accurate diagnoses and better monitor the effectiveness of new drug therapies;
• Policy makers and regulatory bodies make science-based decisions about environmental quality;
• Investigators build cases based on sound DNA and other forensic evidence.
• Trading partners confidently exchange commodities such as foods, fuels, materials and structural steel;
• Manufacturers reliably develop and use advanced materials and processes;
• Industry to link the performance of materials with their structure, processing; and
• Concepts necessary for the design of products ranging from coatings and composites to magnetic devices and sensors.

MML shapes its programs based on national needs. MML’s research base provides MML with the flexibility to respond to the country’s priorities and rapid advances in science and technology. MML’s success depends upon timely dissemination of its:

• Critically evaluated measurement methods;
• Standard Reference Materials®;
• Standard Reference Data;
• Publications describing MML’s measurement science and technologies; and
• Training, education, and best practices, of which Recommended Practice Guides are one example.

Additional information about the MML and MML Programs may be obtained at www.nist.gov/mml. All applications submitted to the MML Grant Program must complement or align or accord with the program objectives set forth below. The appropriate MML Program Manager for each MML field of research described in this Section may be contacted for clarification of the program objectives. The contact person for the MML Grant Program is Bill Clark and he may be reached at (303) 497-3268 or by e-mail at william.clark@nist.gov.

a. **MML Office.** Financial support may be provided for education and outreach programs, conferences, workshops, or other technical research meetings that are relevant to the mission of the MML. Support is generally provided in increments of $5,000. The contact person for this office is Bill Clark and he may be reached at (303) 497-3268 or by e-mail at william.clark@nist.gov.

b. **Materials Science and Engineering Division.** The primary objective is to collaborate or conduct research consistent with division programs that provide the measurement science, standards, technology, instrumentation, and data required to support the Nation’s need to design, develop, manufacture, and use materials. Division programs include measurement methods, data, standards, and science that support the development of polymeric materials which minimize environmental impacts and reduce stress on natural resources; polymeric materials in energy and
electronics applications; the development of complex fluids and nanoparticle dispersions; thin films and nanostructures processing of metals and electronic materials; advanced magnetic materials and devices; the mechanical and corrosion properties of advanced materials, such as high strength steel and aluminum alloys, under extreme environmental and operating conditions; and the development of thermodynamic and kinetic models, measurements and data to predict phase transformations, microstructure evolution, and properties of advanced materials. The contact person for this division is Eric Lin and he may be reached at (301) 975-6743 or by email at eric.lin@nist.gov.

c. Materials Measurement Science Division. The primary objective is to collaborate or conduct research consistent with division programs in support of measurement science, measurement standards, and measurement technology required to enable world-leading characterization of materials in support of the nation’s needs for the determination of the composition, structure, and properties of materials. The division develops state-of-the-art instrumentation, methods, models and software to accurately and precisely measure materials over a range of length and time scales. The division provides benchmarking and validation of emerging materials analysis methods, and disseminates reference materials, standards and scientific data to foster innovation and advance a wide range of technologies, such as those for public safety, forensics, homeland security and nanomanufacturing. The contact person for this division is John Small and he may be reached at (301) 975-3900 or by email at john.small@nist.gov.

d. Biosystems and Biomaterials Division. The primary objective is to collaborate with or conduct research consistent with division projects in standards, measurement methods, and theoretical models that improve understanding and prediction of complex biological processes associated with environmental health, human health, and cell-based manufacturing. This includes analytical and bioanalytical measurements pertinent to method validation for bioassays, genome sequencing, cell identification, and quantitation of biological activity; facilitating research to support development of biomaterials with improved performance and appropriate interaction with cells and tissue; instrumentation, software, models and standards that support the understanding of complex biological phenomena at the cellular and subcellular level; and measurement science in bioimaging, proteomics, genomics, microfluidics, flow cytometry and informatics that facilitates characterization of biological state through the contemporaneous measurement of many biomolecules. The contact person for this division is Anne Plant and she may be reached at (301) 975-3124 or by e-mail at anne.plant@nist.gov.

e. Biomolecular Measurement Division. The primary objective is to collaborate with or conduct research consistent with the division activities in measurement science, standards, technology, and data required to support the nation’s needs in
determining the composition, structure, quantity, and function of biomolecules. In partnership with U.S. industry, government agencies, and scientific institutions, the division performs fundamental and applied research on the measurement of macromolecules such as proteins and nucleic acids, as well as peptides, glycans, metabolites, lipids, and natural products. Specific areas of interest include development of measurement methods, standards, reference data, and technologies for applications involving clinical diagnostics for healthcare; characterization, development, and manufacturing of biotherapeutics; proteomics, metabolomics, and drug discovery; and genetic testing in agriculture, law enforcement, and clinical diagnostics. The contact person for this division is Michael Tarlov and he may be reached at (301) 975-2058 or by email at michael.tarlov@nist.gov.

f. Chemical Sciences Division. The primary objective is to collaborate with or conduct research consistent with the division activities in support of the measurement science, standards, technology, data and chemical informatics required to support the nation’s needs in the determination of chemical composition and chemical structure of gases, organic, and inorganic species and in the measurement of a wide variety of chemical properties and processes, including chemical reactivity and mechanisms, and thermochemical properties. In partnership with U.S. industry, government agencies, and academic scientific institutions, the division performs fundamental and applied research to advance and create state-of-the-art chemical measurement capabilities, theory and computational methods for quantitative measurements, and sensing of solids, liquids, gases, plasmas, transient species, and multicomponent matrices. The division also formulates and disseminates reference materials and measurement standards, and critically evaluates reference data. These activities support the chemical science, technology, and engineering enterprise with the intent of fostering innovation and confidence in measurements and technologies used in a wide range of applications, including chemical analysis, environmental and greenhouse gas emissions, clinical health assessment, food and nutritional assessment, sensing, manufacturing, and energy transformation. The contact person for this division is Carlos Gonzalez and he may be reached at (301) 975-2483 or by e-mail at carlos.gonzalez@nist.gov.

g. Applied Chemicals and Materials Division. The primary objective is to collaborate with or conduct research consistent with division programs in the measurement science, standards, technology, instrumentation, models and data required to support the nation’s needs for design, production, and assessment of chemical and material products. In partnership with U.S. industry, other government agencies and other scientific institutions, the division provides thermophysical and mechanical properties; analysis of reliability and performance of materials and structures; and information systems for chemical and materials engineering, with the intent of fostering innovation and confidence in the nation’s physical and energy infrastructures, enabling advances in chemical manufacturing and in electronics, and
promoting sustainability. The contact person for this division is Jim Fekete and he may be reached at (303) 497-5204 or by e-mail at james.fekete@nist.gov.

2. Physical Measurement Laboratory (PML) Grant Program

The statutory authority for the PML Grant Program is 15 U.S.C. § 272(b) and (c) and 15 U.S.C. § 278g-1(e)(1) and (e)(3).

Program Description: The PML Grant Program provides financial assistance to support the conduct of research or a recipient’s portion of collaborative research consistent with the PML mission to support research in the broad areas of mechanical metrology, semiconductors, ionizing radiation physics, medical physics, biophysics, neutron physics, atomic physics, optical technology, optoelectronics, electromagnetics, time and frequency, quantum physics, weights and measures, quantum electrical metrology, temperature, pressure, flow, far UV physics, and metrology with synchrotron radiation. Additional information about the PML and PML Programs may be obtained at www.nist.gov/pml.

All applications submitted to the PML Grant Program must be in accordance with the program objectives listed below. The appropriate PML Program Manager for each PML field of research that follows may be contacted for clarification of the program objectives. The contact person for the PML Grant Program is Patrick Hovis and he may be reached at (301)-975-4290 or by e-mail at patrick.hovis@nist.gov.

a. PML Office. Financial support may be provided for conferences, workshops, or other technical research meetings that are relevant to the mission of PML. Support is generally provided in increments of $5,000 per award. The contact person for this office is Patrick Hovis and he may be reached at (301) 975-4290 or by e-mail at patrick.hovis@nist.gov.

b. Office of Weights and Measures. The primary objective is to provide funding for the broad areas of documentary standards and legal metrology. Specific objectives of interest in this area include: evaluation of the impact of legal metrology on commerce, support for specific standards related activities, and the development of a national weights and measures training program. Support for legal metrology may include awards to the states for: purchase of specialized equipment required to conduct inspections and tests; purchase of specialized metrology laboratory equipment; purchase of software/hardware needed to collect data of inspection records/results; and conducting training schools for weights and measures field inspectors. Financial support may be provided for conferences, workshops, or other technical research meetings that are relevant to the mission and programs of the office. The contact person for this office is Douglas Olson and he may be reached at (301) 975-2956 or by e-mail at douglasolson@nist.gov.
c. **Radiation Physics Division.** The primary objective is to collaborate with or conduct research consistent with the division’s programs in the areas of terahertz measurements, ionizing radiation (x- and gamma-ray) dosimetry, neutron physics, and radioactivity measurements supporting the protection of workers and the general public, therapy and diagnosis, nuclear medicine and medical imaging, radiography, industrial processing, nuclear and alternative energies, national defense and security, space science, and environmental protection. The contact person for this division is Lisa Karam and she may be reached at 301-975-5561 or by e-mail at lisa.karam@nist.gov.

d. **Engineering Physics Division.** The primary objective is to collaborate with or conduct research consistent with the division’s programs in the areas of dimensional, nanometer-scale, surface, and acoustic pressure metrology; accelerometry; silicon Complementary Metal-Oxide Semiconductor (CMOS) technology; beyond CMOS future electronics; more than Moore technologies; MicroElectroMechanical Systems (MEMS); power electronics; nanoelectronics; and flexible/printed electronics. The contact person for this division is John Kramar and he may be reached at (301) 975–3447 or by e-mail at john.kramar@nist.gov.

e. **Quantum Measurement Division.** The primary objective is to collaborate with or conduct research consistent with division basic and applied research programs, including precision measurements; mass, force, and electrical metrology; electronic instrumentation; measurements of basic atomic properties including new metrology techniques in atomic spectroscopy; measuring fundamental quantum processes in ultra-cold atomic systems including Bose-Einstein condensates and Fermi degenerate gases, nanophotonic systems, quantum dots, single electron devices, single photon devices, and quantum materials relevant to these systems; and advancing quantum information science and laser cooling and their broad applications to measurement science and measurement beyond the standard quantum limit. The contact person for this division is Jon Pratt and he may be reached at (301) 975-5470 or by e-mail at jon.pratt@nist.gov.

f. **Sensor Science Division.** The primary objective is to collaborate with or conduct research consistent with the division’s programs in temperature, humidity, pressure, vacuum, flow, optical properties, and optical radiation measurement and standards and their application to addressing national needs. The contact person for this division is Gerald Fraser and he may be reached at (301) 975-3797 or by e-mail at gerald.fraser@nist.gov.

g. **Applied Physics Division.** The primary objective is to collaborate with or conduct research consistent with the division’s programs in areas including laser metrology, superconducting sensor array fabrication and application, quantum information and
computing, single photonics, medical imaging, fiber and free-space communication, radio-frequency and microwave technology, greenhouse gas measurements, terahertz imaging and metrology, laser applications, and compound semiconductor nanophotonics. The contact person for this division is Marla Dowell and she may be reached at (303) 497–7455 or by e-mail at marla.dowell@nist.gov.

h. **Quantum Electromagnetics Division.** The primary objective is to collaborate with or conduct research consistent with the division’s programs in areas including superconducting, quantum sensors, superconductive electronics, molecular and biophotonics, quantum information processing, spin electronics, nanoscale magnetodynamics, cryogenic computing, and related microfabrication. The contact person for this division is Robert Hickernell and he may be reached at (303) 497-3455 or by e-mail at robert.hickernell@nist.gov.

i. **Time and Frequency Division.** The primary objective is to collaborate with or conduct research consistent with the division’s basic and applied research programs in the areas of time and frequency standards, phase noise measurements, network synchronization, ion storage, quantum information, atomic standards and optical frequency measurements in support of future standards, chip-scale atomic clocks, magnetometers, and related devices, time and frequency dissemination services, and time and frequency applications such as navigational systems and telecommunications. The contact person for this division is Chris Oates and he may be reached at (303) 497-7654 or by e-mail at chris.oates@nist.gov.

j. **Quantum Physics Division.** The primary objective is to collaborate with or conduct research consistent with the division’s basic and applied research programs in the areas of quantum degenerate gases, ultrafast phenomena, femtosecond laser frequency comb development and applications, precision quantum measurements, chemical physics, nanotechnology, and biophysics. The contact person for this division is Thomas R. O’Brian and he may be reached at (303) 497-4570 or by e-mail at thomas.obrian@nist.gov.

3. **Engineering Laboratory (EL) Grant Program**

**Program Description:** The EL Grant Program provides financial assistance to support the conduct of research or a recipient’s portion of collaborative research consistent with the EL’s mission to support research in the following fields: advanced manufacturing; additive manufacturing; robotics; intelligent systems and information systems integration.
for applications in manufacturing; polymeric materials; heating, ventilation, air conditioning, and refrigeration (HVAC & R) equipment performance; mechanical systems and controls; heat transfer and alternative energy systems; computer integrated building processes; indoor air quality and ventilation; cyber-physical systems; smart grid; windstorm impact reduction; applied economics; and fire research. Financial support may be provided for conferences, workshops, or other technical research meetings that are relevant to the mission of EL. Additional information about the EL and EL Programs may be obtained at www.nist.gov/el.

The EL Grant Program supports the EL mission to promote U.S. innovation and industrial competitiveness by advancing measurement science, standards, and technology for engineered systems in ways that enhance economic security and improve quality of life. Typical funded activities may include measurement science research; development of performance metrics, tools, and methodologies for engineering technologies and applications; and critical technical contributions to standards and codes development.

All applications submitted must be in accordance with the program objectives listed below. The appropriate EL Program Manager for each EL field of research described in this Section may be contacted for clarification of the program objectives. The contact person for the EL Grant Program is Millie Glick and she may be reached at (301) 975-5962 or by e-mail at millie.glick@nist.gov.

a. Applied Economics Office. The primary objective is to provide standardized methods, economic models, training programs and materials and expert technical consulting in support of resource allocation decisions and uses techniques such as benefit-cost analysis, life-cycle costing, multi-criteria decision analysis and econometrics to evaluate new technologies. The contact person is David Butry and he may be reached at (301) 975-6136 or by e-mail at david.butry@nist.gov.

b. Smart Grid and Cyber-Physical Systems Program Office. The primary objective is to promote U.S. innovation and industrial competitiveness in areas of critical national priority by anticipating and meeting the measurement science and standards needs for cyber-physical systems, such as smart grid, Internet of Things, and smart cities, in ways that enhance economic prosperity and improve the quality of life. The contact person is David Wollman and he may be reached at (301) 975-2433 or by e-mail at david.wollman@nist.gov.

c. Materials and Structural Systems Division. The primary objective is to collaborate with or conduct research consistent with the division’s programs in the area of construction materials and infrastructural systems (including safety, security, and sustainability of building and physical infrastructure, service-life performance of engineered materials and nanomaterials, and construction cycle time reductions). In
particular, applications for financial assistance are sought that would address the following specific subject area:

- **Polymeric Materials**: Provide the measurement science needed to support standards used to classify and specify materials used in infrastructure, construction, and manufacturing to ensure sustainable performance. This materials program approaches the solution of this problem from the perspective of service life prediction, a crucial sustainability metric, and applies this concept to multifunctional polymers and nano-composites. These two material thrusts will support the development of measurement science composed of a combination of characterization, performance measurement, accelerated durability tests, and modeling to develop standards that will be used by industry and specified by end-users in these broad application areas to enable service life prediction and thus help to ensure sustainable materials performance.

The contact person for this division is Jason Averill and he may be reached at (301) 975-2585 or by e-mail at jason.averill@nist.gov.

**National Windstorm Impact Reduction Program.** The primary objective is to collaborate with or conduct research consistent with the laboratory programs in the areas of windstorm and coastal inundation impact reduction (including engineering for extreme winds, storm surge, and tsunami). The contact person is Marc Levitan who can be reached at (301) 975-5340 or by e-mail at marc.levitan@nist.gov.

**Disaster and Failure Studies Program.** The primary objective is to collaborate with or conduct research consistent with the laboratory programs in the areas of disaster and failure studies. The contact person is Judith Mitrani-Reiser who can be reached at (301) 975-0684 or by e-mail at judith.mitrani-reiser@nist.gov. More information about the Disaster and Failure Studies Program can be found at https://www.nist.gov/topics/disaster-failure-studies/about-disaster-and-failure-studies-program.

d. **Energy and Environment Division.** The primary objective is to collaborate with or conduct research consistent with the laboratory programs in areas related to measurement science needed to enable net zero energy high performance green buildings. The breadth of this area includes measurement science associated with the building envelope, HVAC equipment, renewable energy systems, building controls/building automation systems, and strategies to improve indoor air quality. In particular, applications for financial assistance are sought that would:

1. **Provide measurement science for net-zero energy, high-performance buildings.** Measurement systems, approaches, and predictive models are required that can help to enable net-zero energy, high-performance buildings.
primary objective is to develop measurement methods and approaches, data, and predictive models to assess the effectiveness of building enclosures from a thermal and airtightness perspective, the performance of indoor space conditioning systems, the performance of photovoltaics and other renewable energy systems, and indoor air quality. Additionally, an objective is to develop techniques to assess buildings on a whole-building scale. These techniques could involve standards, system interactions, and factors beyond energy use. The contact person is William Healy and he may be reached at (301) 975-4922 or by e-mail at william.healy@nist.gov.

(2) Enable energy-use reduction through embedded intelligence in building controls. Next-generation metrics and tools are needed that enable the development and deployment of building automation and control systems with embedded intelligence that reduce energy consumption through improvements to building system operation. A primary objective is to develop measurement methods, models, and algorithms/tools suitable for embedding in building control system products that enable better or more automated system commissioning, automated fault detection and diagnostics, improved system-level optimization, and integration of building systems with a smart electrical grid. Additionally, an objective is to conduct research that provides a basis for new industry standards for embedded intelligence systems. The contact person is Steven Bushby and he may be reached at (301) 975-5873 or by e-mail at steven.bushby@nist.gov.

(3) Develop metrics/tools for building sustainability evaluation. Next-generation metrics and tools enabling rigorous sustainability assessment over the building service life are needed to link sustainable building technology innovation to environmental/economic benefits. A primary objective is the development of databases and/or models for estimating component and system costs for existing and emerging energy-related technologies in new buildings. Additionally, an objective is to develop techniques for performing life-cycle impact assessments of emerging technologies for achieving low energy and/or net zero energy performance in new buildings. The contact person is David Butry and he may be reached at (301) 975-6136 or by e-mail at david.butry@nist.gov.

e. Systems Integration Division. Measurement science and standards are important to facilitate smart manufacturing solutions to systems integration problems. A primary objective is the development of mathematically sound, model-based, integration standards and new science-based methods and tools for validating compliance to those standards. Topical areas supporting this objective include system architectures; systems engineering; production network integration; service-based manufacturing; distributed manufacturing simulation; methods and tools for assessing material and energy efficiency; data analytics; uncertainty quantification;
systems assurance methods and tools; model-based engineering, including multi-physics modeling, process modeling, requirements modeling, information modeling, material modeling, assembly modeling, sustainability modeling, and model composability and compositionality. The contact person is Vijay Srinivasan and he may be reached at (301) 975-3508 or by e-mail at vijay.srinivasan@nist.gov.

f. **Intelligent Systems Division.** The primary objective is to collaborate with or conduct research consistent with Division programs and research in measurement science for intelligent systems. Areas of particular interest include:

1. Robotic systems for smart manufacturing (including measurement science for perception, dexterous manipulation, mobility, human-robot and robot-robot collaboration, agility, and robot system integration);
2. Additive manufacturing (including characterization of additive manufacturing; materials, modeling and real-time control of additive manufacturing processes, and measurement science supporting the qualification of additive manufacturing materials, processes, and parts);
3. Sensing, prognostics, health management, and control for smart manufacturing;
4. Industrial wireless networking;
5. Industrial control system cybersecurity; and

Additional information regarding Intelligent Systems Division research programs and projects can be found at [www.nist.gov/el/isd](http://www.nist.gov/el/isd). The contact person for this division is Albert Wavering and he may be reached at (301) 975-3418 or by e-mail at albert.wavering@nist.gov.

4. **Fire Research (FR) Grant Program**

**Program Description:** The FR Grant Program provides financial assistance to support the conduct of research or a recipient’s portion of collaborative research in areas of current interest to the Fire Research Division. The Fire Research Division develops, verifies, and utilizes measurements and predictive methods to quantify the behavior of fire and means to reduce the impact of fire on people, property, and the environment. This work involves integration of laboratory measurements, verified methods of prediction, and large-scale fire experiments to demonstrate the use and value of the research products. Details on current Division research activities are available at [http://www.nist.gov/el/fire_research/index.cfm](http://www.nist.gov/el/fire_research/index.cfm). Also, NIST SP 1130 “Reducing the Risk of Fire in Buildings and Communities: A Strategic Roadmap to Guide and Prioritize Research” provides an overview of current research interests:
All applications submitted must be in accordance with the program objectives listed below. The appropriate FR Program Manager for each FR field of research described in this Section may be contacted for clarification of the program objectives.

a. **Fire Fighting Technology Group.** Develops, advances, and deploys measurement science to improve fire fighting safety and effectiveness, and provide a science-based understanding of fire phenomena. Carries out mission-related measurement science research and services to advance cyber-physically-based (smart) fire fighting, technology integration into fire-fighting equipment, and physics-based training tools that predict fire phenomena and their effects on structures and occupants, and conducts disaster and failure studies to reduce the risk of fire hazard to buildings and fire fighters. The contact person for this group is Jiann Yang and he may be reached at (301) 975-6662 or by e-mail at jiann.yang@nist.gov.

b. **Engineered Fire Safety Group.** Develops, advances, and deploys measurement science for cost-effective fire protection of structures. Carries out mission-related measurement science research and services to predict the fire performance of structures with respect to ignition fire growth and spread, detection, suppression, toxicity, and egress; develops cost-effective performance-based codes, standards, and practices used for fire prevention and control; and conducts disaster and failure studies to reduce the risk of fire hazard to buildings and occupants. The contact person for this group is Tom Cleary and he may be reached at (301) 975-6858 or by e-mail at thomas.cleary@nist.gov.

c. **Flammability Reduction Group.** Develops, advances, and deploys measurement science to reduce the fire hazard of building contents and construction materials. Carries out mission-related measurement science research and services to reduce material ignition probability, fire growth and spread, and environmental impacts; and supports development of codes and standards for cost-effective, fire-safe building contents and construction materials. The contact person for this group is Mauro Zammarano and he may be reached at (301) 975-5244 or by email at mauro.zammarano@nist.gov.

d. **Wildland Urban Interface Fire Group.** Develops, advances, and deploys measurement science to reduce the risk of fire spread in wildland-urban interface (WUI) communities. Carries out mission-related measurement science research and services to develop risk exposure metrics, predict the spread of fires in WUI communities, assess fire performance of structures and communities, mitigate the impact of WUI fires on structures and communities, and conduct disaster and failure studies to reduce the risk of fire hazard to buildings and occupants. The contact person for this group is Tom Cleary and he may be reached at (301) 975-6858 or by e-mail at thomas.cleary@nist.gov.
studies to reduce the risk of fire hazard in WUI communities. The contact person for this group is Erica Kuligowski and she may be reached at (301) 975-2309 or by email at erica.kuligowski@nist.gov.

e. **The National Fire Research Laboratory.** Develops, advances, and deploys measurement science to characterize the real-scale fire behavior of combustibles, and the fire performance of structures under realistic fire and structural loading. Carries out mission-related measurement science research and services to improve the fire performance of communities, structures and building contents; develops physics-based models that predict fire behavior and structural performance; and conducts disaster and failure studies to reduce the risk of fire hazards to structures and fire fighters. The contact person for this group is Matthew Bundy and he may be reached at (301) 975-6880 or by email at matthew.bundy@nist.gov.

5. **Information Technology Laboratory (ITL) Grant Program**

The statutory authority for the ITL Grant Program is 15 U.S.C. § 272(b) and (c), 15 U.S.C. § 278g-1(e)(1) and (e)(3), and 15 U.S.C. § 278n-1.

Specific objectives of interest in these areas of research include: Internet Inter-Domain Routing Robustness; Secure Domain Name System Technologies; Network Anomaly Detection / Evaluation; Network Function Virtualization / Software Defined Networking; Measurement Science for Complex Networked Information Systems; Advanced Distributed Denial of Service Detection and Mitigation Techniques; Next Generation Internet Architectures; Systems Interoperability; Uncertainty Quantification for Scientific Computing; Quantum Information Theory; Quantum Communications; Scientific Visualization; Computational Materials Science; Computational Biology; Systems Biology; Image Analysis; Semantics; Medical Device Interoperability; Software Assurance for Small Applications and Devices; Data Analytics; Search and Retrieval Algorithms; Biometrics for Search, Verification and Clustering of Identity; Human Language Technology; Voting Systems Standards; Grid Computing; Service Oriented Architecture; Post Quantum Cryptography; Light Weight Cryptography; Mobility and Mobile App Security; Secure Distributed Computation; Cryptography and Cryptographic
Test Methods; Mobile Platform and Application Security; Trusted Ad Hoc Networks; Device Identity and Authentication; Cybersecurity Awareness, Training, and Education; Security Testing Tools and Metrics; Data Storage, Preservation, Query, Indexing, and Access Technology; Secure Communications for Cloud; Identity Management Support for Clouds; and Device Mobility among Heterogeneous Networks. Additional information about the ITL and ITL Programs may be obtained at www.nist.gov/itl. Financial support may be provided for conferences, workshops, or other technical research meetings that are relevant to the mission of ITL. All applications submitted to the ITL Grant Program must be in accordance with the program objectives listed above. The contact person for the ITL Grant Program, who may be contacted for clarification of program objectives, is Carol Clark and she may be reached at (301) 975-2239 or by e-mail at carol.clark@nist.gov.

6. Communications Technology Laboratory (CTL) Grant Program

The statutory authority for the CTL Grant Program is 15 U.S.C. § 272(b) and (c), 15 U.S.C. § 278g-1(e)(1) and (e)(3) and 15 U.S.C. § 278n-1.

Program Description: The CTL Grant Program provides financial assistance to support the conduct of research or a recipient’s portion of collaborative research consistent with the CTL mission in broad areas that support the accelerated development, testing, and deployment of advanced communications technologies in support of both commercial and government applications including: high-speed electronics, wireless systems metrology, antenna and RF capabilities, high-speed and high frequency measurement capabilities, advanced optics, quantum communications, network design and optimization, network modeling, and public safety network communications.

Additional information about the CTL and CTL Programs may be obtained at www.nist.gov/ctl. All applications submitted must be in accordance with the program objectives listed below for the CTL Office and the three CTL divisions. The contact person for the CTL Grant Program, who may be contacted for clarification of program objectives, is Jim Harriman and he may be reached at (303) 497-5312 or by e-mail at james.harriman@nist.gov.

a. CTL Office. Financial support may be provided for conferences, workshops, or other technical research meetings that are relevant to the mission of CTL, as well as the development and deployment of spectrum-efficient and spectrum-sharing technologies including support of the National Advanced Spectrum and Communications Test Network (NASCTN). Applications for other purposes may be considered.

b. RF Technologies Division. Specific objectives of interest include but are not
limited to researching, developing, promoting, measuring, and deploying emerging technologies and standards in fundamental microwave quantities, high-speed microelectronics, electromagnetic compatibility, electromagnetic field characterization, antenna metrology, electromagnetic properties of materials, and radio-frequency communications systems.

c. **Wireless Networks Division.** Specific objectives of interest include but are not limited to researching, developing, promoting, measuring, and deploying emerging technologies and standards that revolutionize how wireless networks are operated and used; conducting theoretical and experimental research in communication networks, protocols, digital communication systems, and components; utilizing analytical and empirical approaches, developing simulation models, experimental test beds, and building proof of concept prototypes to evaluate new technologies and refine standard specifications for wireless networks and systems; and developing metrics and measurement methods to assess the performance of wireless systems.

7. **NIST Center for Neutron Research (NCNR) Grant Program**

The statutory authority for the NCNR Grant Program is 15 U.S.C. § 272(b) and (c) and 15 U.S.C. § 278g-1(e)(1) and (e)(3).

**Program Description:** The NCNR Grant Program provides financial assistance to support the conduct of research or a recipient’s portion of collaborative research involving neutron scattering and the development of innovative technologies that advance the state-of-the-art in neutron research. Financial assistance may be provided for conferences, workshops, or other technical research meetings that are relevant to the mission of NCNR. Additional information about the NCNR and NCNR Programs may be obtained at [www.nist.gov/ncnr](http://www.nist.gov/ncnr).

All applications submitted to the NCNR Grant Program must be in accordance with the program objectives: to create novel approaches to advance high resolution cold and thermal neutron scattering research; to develop new applications of neutron scattering to physics, chemistry, and macromolecular and materials research; and to support the development of innovative technologies relevant to neutron research, including, for example, high resolution two-dimensional neutron detectors, neutron monochromators, and neutron focusing and polarizing devices. The contact person for the NCNR Grant Program, who may be contacted for clarification of the program objectives, is Dan Neumann and he may be reached at (301) 975-5252 or by e-mail at dan.neumann@nist.gov.

8. **Center for Nanoscale Science and Technology (CNST) Grant Program**
The statutory authorities for the CNST Grant Program are 15 U.S.C. § 272(b) and (c), 15 U.S.C. § 278g-1(e)(1) and (e)(3) and 15 U.S.C. § 7501 et seq.

The NIST Center for Nanoscale Science and Technology is a national user facility, located in Gaithersburg Maryland that provides easy access to advanced nanotechnology fabrication and measurement methods to industry, academia, and government agencies.

**Program Description:** The CNST Grant Program provides financial assistance to support the conduct of research or a recipient’s portion of collaborative research in the field of nanotechnology specifically aimed at developing essential measurement and fabrication methods and technology in support of all phases of nanotechnology development, from discovery to production; conducting collaborative research with CNST staff scientists and engineers; and supporting researchers visiting CNST to conduct such collaborative research. Financial assistance may be provided for conferences, workshops, or other technical research meetings, or fellowships that are relevant to the mission of the CNST. Applications involving fellowships are intended to support scientists and engineers with the education, experience, training, and demonstrated record of excellence to effectively pursue and advance the proposed field of nanotechnology research. In some cases one or more scientific staff members, including undergraduate and/or graduate students, and/or postdoctoral fellows, may be stationed at NIST in order to work in collaboration with CNST staff and/or other visiting scientists.

The primary program objectives of the CNST Grant Program are to develop new measurement and fabrication methods and instrumentation that support the development of nanotechnology and that will be made available to facility users. Broad areas of interest include new methods and instrumentation needed to advance nanoscience and technology, including nanophotonics; nanofabrication and nanomanufacturing; energy transport, storage, and conversion; nanobiomedical technology (including nanoparticle tracking and characterization and organ/body-on-a-chip); and post-CMOS electronics. Specific areas of interest include measurement and fabrication methods and instrumentation needed by current and future users for atomic-scale characterization and manipulation; scanning and transmission electron microscopy; focused ion beams; laser-atom manipulation; nanophotonics; nanoplasmics; optical micro- and nanoelectromechanical systems (MEMS and NEMS); nanomagnetic imaging and dynamics; nanolithography; nanofabrication process development; directed self-assembly; nanoscale properties of soft matter; nanoscale electronic and ionic transport; light-matter interactions, charge and energy transfer processes, catalytic activity, and interfacial structure in energy-related devices (including photovoltaics, thermoelectrics, photoanodes, fuel cells, batteries, supercapacitors, and field emitters); nanobiosensors; nanofluidics; nanobiomedicine; and theory, modeling, and simulation of nanostructures. Additional objectives of this
program are to assist and train CNST collaborators and users in their research; and to conduct other outreach and educational activities that advance the development of nanotechnology by U.S. academic and industrial scientists. These objectives will entail collaborative research between the selected financial assistance recipients and the CNST technical staff. Additional information about CNST may be obtained at www.nist.gov/cnst. All applications submitted to the CNST Grant Program must be in accordance with the program objectives listed above. The contact person for the CNST Grant Program, who may be contacted for clarification of the program objectives, is Donna Lauren and she may be reached at (301) 975-3729 or by e-mail at donna.lauren@nist.gov.

9. Special Programs Office (SPO) Grant Program

The statutory authority for the SPO Grant Program is 15 U.S.C. § 272(b) and (c), 15 U.S.C. § 278g-1(e)(1) and (e)(3) and 15 U.S.C. 278n-1.

Program Description: The SPO Grant Program provides financial assistance to support the conduct of research or a recipient’s portion of collaborative research consistent with the SPO mission in the broad areas of greenhouse gas measurements, forensic science, and national security standards, in accordance with the three program descriptions below. Additional information about SPO and SPO Programs may be obtained at http://www.nist.gov/director/spo/index.cfm.

All applications submitted to the SPO Grant Program must be in accordance with the program objectives listed below. The appropriate SPO Program Manager for each SPO field of research that follows may be contacted for clarification of the program objectives. The contact person for the SPO Grant Program is Darlene Hamilton and she may be reached at (301)-975-2227 or by e-mail at darlene.hamilton@nist.gov.

a. Greenhouse Gas (GHG) Measurements Grant Program. The GHG Measurements Grant Program provides financial assistance consistent with program objectives of supporting measurement science research to develop or extend internationally-recognized greenhouse gas measurement standards, methodologies, and technologies. Such capabilities enhance science-based GHG emissions data to advance both GHG emissions quantification and Earth system radiometric observing capability. Specific areas of interest include advances that increase accuracy and confidence in flux quantification for both GHG sources and sinks. Areas of interest include: 1) stationary GHG emission sources, 2) measurement tools to better characterize GHG emissions and uptake fluxes in metropolitan and urban areas, 3) remote sensing of Earth systems and GHG concentrations, 4) reconciliation of GHG inventory data derived from both atmospheric observing and emission process-oriented methodologies at local and regional scales, and 5) measurement capabilities that further understanding of GHG transport in the lower atmosphere.
Additional information about the SPO GHG Program may be obtained at http://www.nist.gov/greenhouse-gas/index.cfm. The contact person for the GHG Measurements Grant Program is James Whetstone and he may be reached at (301) 975-2738 or by e-mail at james.whetstone@nist.gov.

b. National Security Standards (NSS) Program. The NSS Program’s mission is to address the equipment needs of first responders, law enforcement, fire fighters, and emergency medical services (EMS) through standards-focused research and development projects based on chemical, biological, radiological, nuclear and explosive (CBRNE) and security requirements. Specific objectives of interest include test methods, guidance, training packages and performance standards in the following areas: human augmentation robots; CBRNE technology including nontraditional threats and food safety; cargo security technology; personal and vehicle safety; and unmanned robotic platforms. Additional information about the SPO NSS Program may be obtained at http://www.nist.gov/national-security-standards/index.cfm. The contact person for the NSS Program is Timothy Brennan and he may be reached at (301) 975-8573 or by e-mail at timothy.brennan@nist.gov.

c. Forensic Sciences Program (FSP). FSP conducts and coordinates research and provides technical services to address the needs of the forensic science community. FSP focuses on creating new material standards; initiating research to verify methodology; and evaluating new technologies primarily for the following forensic science disciplines: computer and digital forensics; DNA; impression and pattern evidence, such as fingerprints and toolmarks; controlled and dangerous substances; and trace analysis. FSP also seeks to facilitate knowledge exchange and identify best practices for the forensic science community. Additional information about the SPO Forensic Science Program is available at http://www.nist.gov/forensics. The contact person for FSP is Susan Ballou and she may be reached at (301) 975-8750 or by e-mail at susan.ballou@nist.gov.

10. Standards Coordination Office (SCO) Grant Program

The statutory authority for the SCO Grant Program is 15 U.S.C. § 272(b) and (c) and 15 U.S.C. § 278g-1(e)(1) and (e)(3).

Program Description: The SCO conducts standards-related programs, and provides knowledge and services that strengthen the U.S. economy and improve the quality of life. The SCO goals include enhancing coordination of the U.S. standards system with government and private sector organizations and supporting U.S. industry with the standards-related tools and information necessary to effectively compete in the global marketplace.
The SCO manages NIST's responsibilities assigned under the National Technology Transfer and Advancement Act (NTTAA) to coordinate federal, state, and local technical standards and conformity assessment activities, as well as coordinating with those in the private sector.

The SCO Grant Program provides financial assistance to support the conduct of research or a recipient’s portion of collaborative research consistent with the NIST mission in the broad areas of standards-related activities, coordination activities with the private sector and with other federal agencies on standards activities and programs, and standards development and conformity assessment activities tailored to equip U.S. industry with the standards-related tools and information necessary to effectively compete in the global marketplace. Financial support may be provided for the development of standards-related training materials, publications, policy analysis, and research and information services. Financial support may also be provided for conferences, workshops, or other standards related activities meetings that are relevant to the mission of the SCO. Additional information about the SCO and SCO Programs may be obtained at http://nist.gov/director/sco/index.cfm.

All applications submitted to the SCO Grant Program must be in accordance with the program objectives listed above. The contact person for the SCO Grant Program, who may be contacted for clarification of the program objectives, is Kerry Miles and she may be reached at (301) 975-5571 or by e-mail at kerry.miles@nist.gov.

11. International and Academic Affairs Office (IAAO) Grant Program

The statutory authority for the IAAO Grant Program is 15 U.S.C. § 272(b) and (c).

**Program Description:** The IAAO Grant Program has been designed to support activities that strengthen and enhance the international metrology community, and promote U.S. innovation and industrial competitiveness in support of the NIST Mission. NIST seeks to promote the efforts of the Regional Metrology Organizations, National Metrology Institutes and Designated Institutes to bolster the global metrology system and quality infrastructure. The IAAO Grant Program will support metrology and related endeavors in the following fields: bioscience, chemistry, materials, physics, engineering, infrastructure, information technology, neutron research and nanotechnology, with an emphasis on the Western Hemisphere and Africa. Financial support may be provided for conferences, workshops, or other technical meetings that are relevant to the mission of the IAAO. Additional information about the IAAO and IAAO Programs may be obtained at http://nist.gov/iaao/.

All applications submitted to the IAAO Grant Program must be in accordance with the program objectives listed above. The contact person for the IAAO Grant Program, who may be contacted for clarification of the program objectives, is Claire Saundry and she
12. Associate Director for Laboratory Programs (ADLP) Grant Program

The statutory authority for the ADLP Grant Program is 15 U.S.C. § 272(b) and (c) and 15 U.S.C. § 278g-1(e)(1) and (e)(3).

Program Description: The ADLP Grant Program provides financial assistance to support the conduct of research or a recipient’s portion of collaborative research consistent with the NIST mission in the following fields: bioscience, chemistry, materials, physics, engineering, infrastructure, information technology, neutron research and nanotechnology. Financial support may be provided for education and outreach programs, conferences, workshops, or other technical research meetings that are relevant to the mission of the ADLP. Additional information about the ADLP and ADLP Programs may be obtained at http://www.nist.gov/director/adlp.cfm.

All applications submitted to the ADLP Grant Program must be in accordance with the program objectives listed above. The contact person for the ADLP Grant Program, who may be contacted for clarification of the program objectives, is Donna Kimball and she may be reached at (301) 975-8362 or by e-mail at donna.kimball@nist.gov.

13. Associate Director for Innovation and Industry Services (ADIIS) Grant Program

The statutory authority for the ADIIS Grant Program is 15 U.S.C. § 272(b) and (c) and 15 U.S.C. § 278g-1(e)(1) and (e)(3).

Program Description: The ADIIS Grant Program has been designed to support activities that strengthen and enhance the NIST suite of external partnership programs, including the Hollings Manufacturing Extension Partnership, the Baldrige Performance Excellence Program, the Advanced Manufacturing National Program Office, NIST technology transfer and small business innovation research awards, economic analysis, and technology innovation. The ADIIS Grant Program will support measurements, standards, data and technology research and development programs in the following fields: bioscience, chemistry, materials, physics, engineering, infrastructure, information technology, neutron research and nanotechnology, with an emphasis in advancing the NIST existing or new external partnership programs. Financial support may be provided for education and outreach programs, technical assistance with the engagement of NIST in various activities with other government agencies, industry, academia or non-profit organizations, and conferences, workshops, or other technical meetings that are relevant to the mission of the ADIIS. Additional information about the ADIIS Programs may be obtained at https://www.nist.gov/adiis.

All applications submitted to the ADIIS Grant Program must be in accordance with the program objectives listed above. The contact person for the ADIIS Grant Program, who
may be contacted for clarification of the program objectives, is Dianne Poster and she may be reached at (301) 975-8941 or by e-mail at dianne.poster@nist.gov.

II. Federal Award Information

1. Funding Instrument. The funding instruments used in these programs will be grants or cooperative agreements, as appropriate. Where cooperative agreements are used, the nature of NIST’s “substantial involvement” will generally be collaboration with the recipients in the scope of work. Additional forms of substantial involvement that may arise are described in Chapter 5.C of the Department of Commerce Grants and Cooperative Agreements Manual, as may be periodically amended, which is available at https://go.usa.gov/x5grC.

2. Multi-Year Funding Policy. When an application for a multi-year award is approved, funding will usually be provided for only the first year of the project. If a project is selected for funding, NIST has no obligation to provide any additional funding in connection with that award. Continuation of an award to increase funding or extend the period of performance is at the sole discretion of NIST. Continued funding will be contingent upon satisfactory performance, continued relevance to the mission and priorities of the individual MSE research grant programs, and the availability of funds.

3. Funding Availability. The availability of funds depends upon actual authorization of funds, programmatic needs, and other costs expected to be incurred by individual divisions within each laboratory, center, or office. If funds are identified as available for financial assistance, those funds may be awarded to highly ranked applications as determined by the applicable program’s review and selection process (see Section V.2. of this NOFO).

a. Material Measurement Laboratory (MML) Grant Program. In 2017, MML anticipates funding individual projects in the $5,000 - $1,000,000 range and with project performance periods of up to five (5) years, consistent with the multi-year funding policy (see Section II.2. of this NOFO). In FY2016, the MML Grant Program funded eighteen (18) new awards totaling $4,000,000.

b. Physical Measurement Laboratory (PML) Grant Program. In FY 2017, PML anticipates funding individual projects in the $5,000 - $250,000 range and with project performance periods of up to five (5) years, consistent with the multi-year funding policy (see Section II.2. of this NOFO). In FY 2016, the PML Grant Program funded forty (40) new awards totaling $2,218,610.

c. Engineering Laboratory (EL) Grant Program. In FY 2017, EL anticipates funding
individual projects in the $5,000 - $500,000 range and with project performance periods of up to five (5) years, consistent with the multi-year funding policy (see Section II.2. of this NOFO). In FY 2016, the EL Grant Program funded fourteen (14) new awards totaling $1,909,403.

d. **Fire Research (FR) Grant Program.** In FY 2017, the FR Grant Program anticipates funding individual projects in the $25,000 - $200,000 per year range and with project performance periods of up to five (5) years, consistent with the multi-year funding policies (see Section II.2. of this NOFO). In FY 2016, the FR Grant Program funded eight (8) new awards, totaling $813,647.

e. **Information Technology Laboratory (ITL) Grant Program.** In FY 2017, ITL anticipates funding individual projects in the $10,000 - $500,000 range and with project performance periods of up to five (5) years, consistent with the multi-year funding policy (see Section II.2. of this NOFO). In FY 2016, the ITL Grant Program funded forty-four (44) new awards totaling $6,179,898.

f. **Communications Technology Laboratory (CTL) Grant Program.** In FY 2017, CTL anticipates funding individual projects in the $10,000 to $2,000,000 range and with project performance periods for up to five (5) years, consistent with the multi-year funding policy (see Section II.2. of this NOFO). In FY 2016, the CTL Grant Program funded three (3) awards totaling $365,422.

g. **NIST Center for Neutron Research (NCNR) Grant Program.** In FY 2017, NCNR anticipates funding new, individual projects in the $25,000 - $100,000 per year range and with project performance periods of up to five (5) years, consistent with the multi-year funding policy (see Section II.2. of this NOFO). In FY 2016, the NCNR Grant Program funded three (3) new awards totaling $95,000.

h. **Center for Nanoscale and Science and Technology (CNST) Grant Program.** Although funding may be available to support continuation projects under the CNST Grant Program, at this time CNST does not anticipate funding becoming available for new awards in FY 2017. If funds become available in FY 2017, a typical project may be in the $15,000 - $100,000 per year range and with project performance periods of up to five (5) years, consistent with the multi-year funding policy (see Section II.2. of this NOFO). In FY 2016, the CNST Grant Program funded no new awards.

i. **Special Programs Office (SPO) Grant Program.** In FY 2017, SPO anticipates funding individual projects under the Greenhouse Gas (GHG) Measurements Grant Program in the $25,000 - $1,800,000 range, under the National Security Standards (NSS) Grant Program in the $25,000 - $1,000,000, under the Forensic Science Grant Program in the $25,000 - $2,000,000 range, with project performance periods
of up to five (5) years, consistent with the multi-year funding policy (see Section II.2. of this NOFO). In FY 2016, NIST funded eleven (9) awards totaling $4,568,309 under the GHG Measurements Grant Program, zero (0) awards under the National Security Standards Grant Program, and nine (9) awards totaling $807,110 under the Forensic Science Grant Program. In FY 2016, NIST did not fund any awards under the Measurement Science for Energy Research Grant Program.

j. Standards Coordination Office (SCO) Grant Program. In FY 2017, SCO anticipates funding individual projects in the $5,000 - $100,000 range and with project performance periods of up to three (3) years, consistent with the multi-year funding policy (see Section II.2. of this NOFO). In FY 2016, the SCO Grant Program funded one (1) award totaling $246,000.

k. International and Academic Affairs Office (IAAO) Grant Program. In FY 2017, IAAO anticipates funding individual projects in the $5,000 - $200,000 range and with project performance periods of up to five (5) years, consistent with the multi-year funding policy (see Section II.2. of this NOFO). In FY 2016, the IAAO Grant Program funded two (2) awards totaling $80,000.

l. Associate Director for Laboratory Programs (ADLP) Grant Program. In FY 2017, ADLP anticipates funding individual projects in the $5,000 - $3,000,000 range and with project performance periods of up to five (5) years, consistent with the multi-year funding policy (see Section II.2. of this NOFO). In FY 2016, the ADLP Grant Program funded one (1) new award totaling $153,123.

m. Associate Director for Innovation and Industry Services (ADIIS) Grant Program. In 2017, ADIIS anticipates funding individual projects in the $5,000 - $1,500,000 range and with project performance periods of up to five (5) years, consistent with the multi-year funding policy (see Section II.2. of the NOFO). In FY 2016, the ADIIS Grant Program did not fund any awards.

III. Eligibility Information

1. Eligible Applicants. Eligibility for all programs listed in this NOFO is open to all non-Federal entities. Eligible applicants include institutions of higher education, non-profit organizations, for-profit organizations, state and local governments, Indian tribes, hospitals, foreign public entities, and foreign governments. Applicants selected for awards under 15 U.S.C. § 278g-1(e)(1) and (e)(3) are encouraged, but not required, to select underrepresented minorities for participation. In addition, NIST is not able to accept an application from an individual unaffiliated with a sponsoring applicant organization.
2. **Cost Sharing or Matching.** The MSE research grant programs do not require cost sharing.

**IV. Application and Submission Information**

1. **Address to Request Application Package.** The standard application package, consisting of the standard forms, i.e., SF-424, SF-424A, SF-424B, SF-LLL, and the CD-511, is available at [www.grants.gov](http://www.grants.gov). The standard application package may also be requested by contacting the appropriate MSE research grant program office personnel listed below.

   a. **Material Measurement Laboratory (MML) Grant Program.** Bill Clark, Material Measurement Laboratory, National Institute of Standards and Technology, 325 Broadway, Mail Stop 647.00, Boulder, CO 80305 (Phone: (303) 497-3268; e-mail: william.clark@nist.gov).

   b. **Physical Measurement Laboratory (PML) Grant Program.** Patrick Hovis, Physical Measurement Laboratory, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8400, Gaithersburg, MD 20899-8400 (Phone: (301) 975-4290; e-mail: patrick.hovis@nist.gov).

   c. **Engineering Laboratory (EL) Grant Program.** Millie Glick, Engineering Laboratory, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8600, Gaithersburg, MD 20899-8602 (Phone: (301) 975-5962; e-mail: millie.glick@nist.gov).

   d. **Fire Research Grant Program.** Millie Glick, Engineering Laboratory, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8600, Gaithersburg, MD 20899-8602 (Phone: (301) 975-5962; e-mail: millie.glick@nist.gov).

   e. **Information Technology Laboratory (ITL) Grant Program.** Carol Clark, Information Technology Laboratory, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8900, Gaithersburg, Maryland 20899-8900 (Phone: (301) 975-2239; e-mail: carol.clark@nist.gov).

   f. **Communications Technology Laboratory (CTL) Grant Program.** Jim Harriman, Communications Technology Laboratory, National Institute of Standards and Technology, 325 Broadway, MS 670.00, Boulder, Colorado 80305 (Phone: (303) 497-5312; e-mail: james.harriman@nist.gov).

   g. **NIST Center for Neutron Research (NCNR) Grant Program.** Tanya Burke, NIST Center for Neutron Research, National Institute of Standards and Technology, 100
h. **Center for Nanoscale and Science and Technology (CNST) Grant Program.** Donna Lauren, Center for Nanoscale Science and Technology, National Institute of Standards and Technology, 100 Bureau Drive, Stop 6200, Gaithersburg, Maryland 20899-6200 (Phone: (301) 975-3729; e-mail: donna.lauren@nist.gov).

i. **Special Programs Office (SPO) Grant Program.** Darlene Hamilton, Office of Special Programs, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8102, Gaithersburg, MD 20899-8102 (Phone: (301) 975-2227; e-mail: darlene.hamilton@nist.gov).

j. **Standards Coordination Office (SCO) Grant Program.** Kerry Miles, National Institute of Standards and Technology, Associate Director for Laboratory Programs, 100 Bureau Drive, Stop 2100, Gaithersburg, MD 20899-2100. Phone: 975-557. Email: kerry.miles@nist.gov.

k. **International and Academic Affairs Office (IAAO) Grant Program.** Claire Saundry, International and Academic Affairs Office, National Institute of Standards and Technology, 100 Bureau Drive, Stop 1090, Gaithersburg, Maryland 20899-1090 (Phone: (301) 975-2386; e-mail: claire.saundry@nist.gov).

l. **Associate Director for Laboratory Programs (ADLP) Grant Program.** Donna Kimball, National Institute of Standards and Technology, Associate Director for Laboratory Programs, 100 Bureau Drive, Stop 6000, Gaithersburg, MD 20899-6000 (Phone: (301) 975-8362; e-mail: donna.kimball@nist.gov).

m. **Associate Director for Innovation and Industry Services (ADIIS) Grant Program.** Dianne Poster, National Institute of Standards and Technology, Associate Director for Innovation and Industry Services, 100 Bureau Drive, Stop 6000, Gaithersburg, MD 20899-6000 (Phone: (301) 975-8941; e-mail: dianne.poster@nist.gov).

2. **Content and Format of Application Submission for all programs listed in this NOFO**

a. **Required Forms and Documents**

   (1) **SF-424, Application for Federal Assistance.** The SF-424 must be signed by an authorized representative of the applicant organization.
• “SF-424, Item 8.d. Zip/Postal Code field, should reflect the Zip code + 4
(#####-####) format.”

• SF-424, Item 12, should list the NOFO number 2016-NIST-MSE-01.

• SF-424, Item 18, should list the total budget information for the duration of
the project.

• The list of certifications and assurances referenced in Item 21 of the SF-
424 is contained in the SF-424B.

(2) SF-424A, Budget Information – Non-Construction Programs. The budget
should reflect anticipated expenses for each year of the project, considering all
potential cost increases, including cost of living adjustments. The applicant
should reflect all expenses for the full term of the project on the SF-424A form.
The SF-424A form accommodates up to five (5) years of budget information.

These sections of the SF-424A should reflect funds for the first year of the award:
Section A; Section B; Section C; and Section D. The budget estimate for the
second year through fifth year of the award should be entered in Section E, field
16, column (b) through column (e), respectively. Please carefully follow the
directions found at http://www.grants.gov/web/grants/form-instructions/sf-424a-
instructions.html when filling out this form.

Do not enter the Grant Program Function or Activity on Line 1 under Column (a),
and do not enter the Catalog of Federal Domestic Assistance Number on Line 1
under Column (b).

(3) SF-424B, Assurances – Non-Construction Programs

(4) CD-511, Certification Regarding Lobbying. Enter “2016-NIST-MSE-01” in the
Award Number field. Enter the title of the application used in field 15 of the SF-
424, or an abbreviation of that title, in the Project Name field.

(5) SF-LLL, Disclosure of Lobbying Activities (if applicable)

(6) Technical Proposal. The Technical Proposal is a word-processed document
responsive to the applicable program description(s) (see Section I. of this NOFO)
and the evaluation criteria (see Section V.1. of this NOFO).

This document must consist of two parts: the Cover Page and the Technical
Proposal itself.
The **Cover Page** must consist of three (3) elements:

(a) The name and address of the applicant institution, and the name, address, and contact information for the application’s Principal Investigator;

(b) The specific component MSE research grant program to which the application is being submitted, using the following choices:

1) the Material Measurement Laboratory (MML) Grant Program;
2) the Physical Measurement Laboratory (PML) Grant Program;
3) the Engineering Laboratory (EL) Grant Program;
4) the Fire Research (FR) Grant Program;
5) the Information Technology Laboratory (ITL) Grant Program;
6) the Communications Technology Laboratory (CTL) Grant Program;
7) the NIST Center for Neutron Research (NCNR) Grant Program;
8) the Center for Nanoscale Science and Technology (CNST) Grant Program;
9) the Special Programs Office (SPO) Grant Program;
10) the Standards Coordination Office (SCO) Grant Program;
11) the International and Academic Affairs Office (IAAO) Grant Program;
12) the Associate Director for Laboratory Programs (ADLP) Grant Program; and
13) the Associate Director for Innovation and Industry Services (ADIIS) Grant Program.

(c) Statement of Relevance and of Benefit to the General Public

Using no more than two or three sentences, describe the relevance of the research proposed in this application to the public, and the benefit of the proposed research to the public. This statement should be succinct, and use plain language that can be understood by a general, lay audience.

The **Technical Proposal** should describe in depth the scope of the proposal, its goals, the methods and equipment to be used, its schedule, the personnel working on the project and their qualifications, and the institutional capabilities of the applicant.

(7) **Budget Narrative.** There is no set format for the Budget Narrative; however, it should provide a detailed breakdown of each of the object class categories as reflected on the SF-424A. The budget justification should address all of the budget categories (personnel, fringe benefits, equipment, travel, supplies, other direct costs and indirect costs). The written justification should include the necessity and the basis for the cost. Proposed funding levels must be consistent
with the project scope, and only allowable costs should be included in the budget. Information on cost allowability is available in the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards at 2 C.F.R. Part 200 (http://go.usa.gov/SBYh), which apply to awards in this program. Information needed for each category is as follows:

(a) **Personnel** – At a minimum, the budget justification for all personnel should include the following: name, job title, commitment of effort on the proposed project in terms of average number of hours per week or percentage of time, salary rate, total direct charges on the proposed project, description of the role of the individual on the proposed project and the work to be performed.

(b) **Fringe Benefits** – Fringe benefits should be identified separately from salaries and wages and based on rates determined by organizational policy. The items included in the fringe benefit rate (e.g., health insurance, parking, etc.) should not be charged under another cost category.

(c) **Equipment** – Equipment is defined as an item of property that has an acquisition cost of $5,000 or more (unless the organization has established lower levels) and an expected service life of more than one year. Any items that do not meet the threshold for equipment can be included under the supplies line item. The budget justification should list each piece of equipment, the cost, and a description of how it will be used and why it is necessary to the successful completion of the proposed project. Please note that any general use equipment (computers, etc.) charged directly to the award should be allocated to the award according to expected usage on the project.

(d) **Travel** – For all travel costs, the budget justification for travel should include the following: destination; names or number of people traveling; dates and/or duration; mode of transportation, lodging and subsistence rates; and description of how the travel is directly related to the proposed project. For travel that is yet to be determined, please provide best estimates based on prior experience. If a destination is not known, an approximate amount may be used with the assumptions given for the location of the meeting.

(e) **Supplies** – Provide a list of each supply, and the breakdown of the total costs by quantity or unit of cost. Include the necessity of the cost for the completion of the proposed project.

(f) **Contractual (i.e. ContractsSubawards)** – Each contract or subaward should be treated as a separate item. Identify the cost, and describe the services to be provided and the necessity of the subaward or contract to the successful
performance of the proposed project. Contracts are for obtaining normal
goods and services. Subawardees perform part of the project scope of work.

(g) Construction – Not an allowable cost under the MSE NOFO.

(h) Other Direct Costs – For costs that do not easily fit into the other cost
categories, please list the cost, and the breakdown of the total costs by
quantity or unit of cost. Include the necessity of the cost for the completion of
the proposed project. Only allowable costs can be charged to the award.

(8) Indirect Cost Rate Agreement. If indirect costs are included in the proposed
budget, provide a copy of the approved negotiated agreement if this rate was
negotiated with a cognizant Federal audit agency. If the rate was not established by
a cognizant Federal audit agency, provide a statement to this effect in the Budget
Narrative. If the successful applicant includes indirect costs in the budget and has
not established an indirect cost rate with a cognizant Federal audit agency, the
applicant will be required to obtain such a rate in accordance with the Department of
Commerce Financial Assistance Standard Terms and Conditions available at
https://go.usa.gov/xXRxK.

Alternatively, in accordance with 2 C.F.R. § 200.414(f), applicants that have never
received a negotiated indirect cost rate may elect to charge indirect costs to an
award pursuant to a de minimis rate of 10 percent of modified total direct costs
(MTDC), in which case a negotiated indirect cost rate agreement is not required.
Applicants proposing a 10 percent de minimis rate pursuant to 2 C.F.R. § 200.414(f)
should note this election as part of the budget portion of the application.

(9) Data Management Plan. Consistent with the NIST Policy 5700.001, Managing
Public Access to Results of Federally Funded Research, and NIST Order 5701.002,
Managing Public Access to Results of Federally Funded Research", applicants must
include a Data Management Plan (DMP).

The DMP is a supplementary document of not more than two pages that must
include, at a minimum, a summary of proposed activities that are expected to
generate data, a summary of the types of data expected to be generated by the
identified activities, a plan for storage and maintenance of the data expected to
be generated by the identified activities, and a plan describing whether and how
data generated by the identified activities will be reviewed and made available to
the public. As long as the DMP meets these NIST requirements, it may take the

1 https://www.nist.gov/sites/default/files/documents/2017/05/09/Final-P-5700.pdf
2 https://www.nist.gov/sites/default/files/documents/2017/05/09/Final-O-5701_0.pdf
form specified by the applicant’s institution or some other entity (e.g., the National Science Foundation\(^3\) or the National Institutes of Health\(^4\)).

All applications for activities that will generate scientific data using NIST funding are required to adhere to a DMP or explain why data sharing and/or preservation are not within the scope of the project.

For the purposes of the DMP, NIST adopted the definition of “research data” at 2 C.F.R. § 200.315(e)(3) (available at http://go.usa.gov/3sZvQ).

Reasonable costs for data preservation and access may be included in the application.

The inclusion of the DMP will be considered as part of the administrative review (see Section V.2.a. of this NOFO); however, the DMP will not be evaluated against any evaluation criteria.

If submitting the application electronically via Grants.gov, items IV.2.a.(1) through IV.2.a.(5) above are part of the standard application package in Grants.gov and can be completed through the download application process. Items IV.2.a.(6) through IV.2.a.(9) must be completed and attached by clicking on “Add Attachments” found in item 15 of the SF-424, Application for Federal Assistance. This will create a zip file that allows for transmittal of the documents electronically via Grants.gov. Applicants should carefully follow specific Grants.gov instructions at www.grants.gov to ensure the attachments will be accepted by the Grants.gov system. A receipt from Grants.gov indicating that an application is received does not provide information about whether attachments have been received.

If submitting an application by paper, all of the required application documents should be submitted in the order listed above.

b. Application Format

(1) **Double-sided.** For paper submissions, print on both sides of the paper for original and copies.

(2) **E-mail and facsimile (fax) submissions.** Will not be accepted.

(3) **Figures, Graphs, Images, and Pictures.** Should be of a size that is easily readable or viewable and may be landscape orientation.

\(^3\) http://www.nsf.gov/bfa/dias/policy/dmp.jsp
\(^4\) http://grants.nih.gov/grants/policy/data_sharing/data_sharing_guidance.htm
(4) **Font.** Easy to read font (10-point minimum). Smaller type may be used in figures and tables but must be clearly legible.

(5) **Page Limit.** The Technical Proposal for Applications is limited to twenty-five (25) pages:

**Page limit includes:** Cover Page, Table of contents (if included), Technical Proposal with all required information, including figures, graphs, tables, images, and pictures.

**Page limit excludes:** SF-424, Application for Federal Assistance; SF-424A, Budget Information – Non-Construction Programs; SF-424B, Assurances – Non-Construction Programs; SF-LLL, Disclosure of Lobbying Activities; CD-511, Certification Regarding Lobbying; Budget Narrative; Indirect Cost Rate Agreement; and Data Management Plan.

(6) **Number of paper copies.** For paper submissions, one (1) signed stapled original and two (2) stapled copies. If the original proposal is in color, the two (2) copies must also be in color. If submitting electronically via Grants.gov, paper copies are not required.

(7) **Page layout.** The Technical Proposal must be in portrait orientation.

(8) **Page size.** 21.6 centimeters by 27.9 centimeters (8 ½ inches by 11 inches).

(9) **Page numbering.** Number pages sequentially.

(10) **Application language.** English.

(11) **Staple paper submission.** For paper submissions, staple the original signed application and each of the two (2) copies securely with one (1) staple in the upper left-hand corner.

(12) **Typed document.** All applications, including forms, must be typed; handwritten applications and forms will not be accepted.

(13) **Application language.** English.

c. **Application Replacement Pages.** Applicants may not submit replacement pages and/or missing documents once an application has been submitted. Any revisions must be made by submission of a new application that must be received by NIST by the submission deadline.
d. **Pre-Applications.** NIST is not accepting pre-applications or white papers under this NOFO.

e. **Certifications Regarding Federal Felony and Federal Criminal Tax Convictions, Unpaid Federal Tax Assessments and Delinquent Federal Tax Returns.** In accordance with Federal appropriations law, an authorized representative of the selected applicant(s) may be required to provide certain pre-award certifications regarding federal felony and federal criminal tax convictions, unpaid federal tax assessments, and delinquent federal tax returns.

3. **Unique Entity Identifier and System for Award Management (SAM).** Pursuant to 2 C.F.R. part 25, applicants and recipients (as the case may be) are required to: (i) be registered in SAM before submitting its application; (ii) provide a valid unique entity identifier in its application; and (iii) continue to maintain an active SAM registration with current information at all times during which it has an active Federal award or an application or plan under consideration by a Federal awarding agency, unless otherwise excepted from these requirements pursuant to 2 C.F.R. § 25.110. NIST will not make a Federal award to an applicant until the applicant has complied with all applicable unique entity identifier and SAM requirements and, if an applicant has not fully complied with the requirements by the time that NIST is ready to make a Federal award pursuant to this NOFO, NIST may determine that the applicant is not qualified to receive a Federal award and use that determination as a basis for making a Federal award to another applicant.

4. **Submission Dates and Times**

When developing your submission timeline, please keep in mind that (1) all applicants are required to have a current registration in the System for Award Management (SAM.gov); (2) the free annual registration process in the electronic System for Award Management (SAM.gov) (see Sections IV.3. and IV.7.a.(2).(b). of this NOFO) often takes between three and five business days and may take as long as two weeks; (3) applicants are required to have a current registration in Grants.gov; and (4) applicants using Grants.gov will receive email notifications over a period of up to two business days as the application moves through intermediate systems before the applicant learns via a validation or rejection notification whether NIST has received the application. (See [http://www.grants.gov](http://www.grants.gov) for full information on application and notification through Grants.gov.). Please note that a federal assistance award cannot be issued if the designated recipient’s registration in the System for Award Management (SAM.gov) is not current at the time of the award.

Paper applicants will find instructions on registering with SAM.gov by going to www.sam.gov and choosing “Create User Account”. Carefully read Section IV.3. of this NOFO to understand the steps involved.

All NIST MSE Research Grant Programs. Applications will be considered on a continuing/rolling basis as they are received. To ensure consideration in the current fiscal year, applications should be received by 5:00 p.m. Eastern Time on June 13, 2017. Applications received after this deadline may be processed and considered for funding in the current fiscal year or in the next fiscal year, subject to the availability of funds.

All applications submitted to the MSE Research Grants programs, paper and electronic, must be received prior to the posting of the FY 2018 NIST MSE Research Grants Programs NOFO on Grants.gov in order to be processed under this NOFO.

5. Intergovernmental Review. Applications under all Programs in this NOFO are not subject to Executive Order 12372.

6. Funding Restrictions. Applications for product development and/or commercialization are not considered responsive to this NOFO.

7. Other Submission Requirements for all programs listed in this NOFO

a. Applications may be submitted by paper or electronically.

   (1) Applications submitted by paper must be submitted in triplicate (an original and two copies) and submitted to the appropriate MSE research grant program office personnel listed in Section IV.1. of this NOFO.

   (2) Applications submitted electronically must be sent through Grants.gov at www.grants.gov, under announcement 2016-NIST-MSE-01.

   Cover Page. In an effort to route an application to the appropriate program official, applicants should reference on the Technical Proposal cover page the applicable MSE research grant program that the application is being submitted under using the choices provided in Section IV.2.b.(1). of this NOFO.
(a) Applicants submitting applications through Grants.gov should carefully follow specific Grants.gov instructions to ensure the attachments will be accepted by the Grants.gov system. A receipt from Grants.gov indicating an application is received does not provide information about whether attachments have been received. For further information or questions regarding applying electronically for the 2016-NIST-MSE-01 announcement, contact Christopher Hunton by phone at 301-975-5718 or by e-mail at grants@nist.gov.

(b) Applicants are strongly encouraged to start early and not wait until the approaching due date before logging on and reviewing the instructions for submitting an application through Grants.gov. The Grants.gov registration process must be completed before a new registrant can apply electronically. If all goes well, the registration process takes three (3) to five (5) business days. If problems are encountered, the registration process can take up to two (2) weeks or more. Applicants must have a unique entity identifier number and must maintain a current registration in the Federal government’s primary registrant database, the System for Award Management (https://www.sam.gov), as explained on the Grants.gov Web site. See also Section IV.3. of this NOFO. After registering, it may take several days or longer from the initial log-on before a new Grants.gov system user can submit an application. Only authorized individual(s) will be able to submit the application, and the system may need time to process a submitted application. Applicants should save and print the proof of submission they receive from Grants.gov. If problems occur while using Grants.gov, the applicant is advised to (a) print any error message received and (b) call Grants.gov directly for immediate assistance. If calling from within the United States or from a U. S. territory, please call 800-518-4726. If calling from a place other than the United States or a U. S. territory, please call 606-545-5035. Assistance from the Grants.gov Help Desk will be available around the clock every day, with the exception of Federal holidays. Help Desk service will resume at 7:00 a.m. Eastern Time the day after Federal holidays. For assistance using Grants.gov, you may also contact support@grants.gov.

(c) To find instructions on submitting an application on Grants.gov, Applicants should refer to the “Applicants” tab in the banner just below the top of the www.grants.gov home page. Clicking on the “Applicants” tab produces two exceptionally useful sources of information, Applicant Actions and Applicant Resources, which applicants are advised to review.

Applicants will receive a series of e-mail messages over a period of up to two business days before learning whether a Federal agency’s electronic system has
received its application. Closely following the detailed information in these subcategories will increase the likelihood of acceptance of the application by the Federal agency’s electronic system.

Applicants should pay close attention to the guidance under “Applicant FAQs,” as it contains information important to successful submission on Grants.gov, including essential details on the naming conventions for attachments to Grants.gov applications.

The application must be both received and validated by Grants.gov. The application is “received” when Grants.gov provides the applicant a confirmation of receipt and an application tracking number. If an applicant does not see this confirmation and tracking number, the application has not been received. After the application has been received, it must still be validated. During this process, it may be “validated” or “rejected with errors.” To know whether the application was rejected with errors and the reasons why, the applicant must log in to Grants.gov, select “Applicants” from the top navigation, and select “Track my application” from the drop-down list. If the status is “rejected with errors,” the applicant may still seek to correct the errors and resubmit your application before the deadline. If the applicant does not correct the errors, the application will not be forwarded to NIST by Grants.gov.

All applicants, both electronic and paper submitters, should be aware that adequate time must be factored into applicants’ schedules for delivery of their application. Applicants submitting applications through Grant.gov are advised that volume on Grants.gov may be extremely heavy on the deadline date, and if Grants.gov is unable to accept applications electronically in a timely fashion, applicants are encouraged to exercise their option to submit applications in paper format. Submitters of paper applications should allow adequate time to ensure a paper application will be received on time, taking into account that Federal Government security screening for U.S. Postal Service mail may delay receipt of mail for up to two (2) weeks and that guaranteed express mailings and/or couriers are not always able to fulfill their guarantees.

Refer to important information in Section IV.4. Submission Dates and Times, to help ensure your application is received on time.

b. Amendments. Any amendments to this NOFO will be announced through Grants.gov. Applicants may sign up for Grants.gov NOFO amendments or may request copies from the programmatic and technical questions contact for the appropriate program (see Section VII. of this NOFO).

V. Application Review Information
1. Evaluation Criteria

a. Material Measurement Laboratory (MML) Grant Program. The evaluation criteria that will be used in evaluating applications considered by the MML Grant Program are as follows:

(1) Rationality. The coherence of the applicant’s approach and the extent to which the application effectively addresses scientific and technical issues that are relevant to MML programs (see Section I.1. of this NOFO). (0 – 25 points)

(2) Qualifications of Technical Personnel. The professional accomplishments, skills, and training of the proposed personnel to perform the work proposed in the application. (0 – 25 points)

(3) Resources. The extent to which the applicant has access to the necessary facilities and overall support to accomplish project objectives, and assessment of the budget against the proposed work to ascertain the reasonableness of the request. (0 – 25 points)

(4) Technical Merit of Contribution. The potential technical effectiveness of the proposed work and the value it would contribute to the field of measurement science and engineering, especially as it pertains to reference methods, reference materials and reference data in Material Measurements. (0 – 25 points)

   Each of these factors will be given equal weight in the evaluation process.

b. Physical Measurement Laboratory (PML) Grant Program.

(1) The evaluation criteria that will be used in evaluating applications considered by the PML Grant Program, except for applications to the Office of Weights and Measures (see Section V.1.b.(2) of this NOFO) are as follows:

i. Rationality. The coherence of the applicant’s approach and the extent to which the application effectively addresses scientific and technical issues that are relevant to PML programs (see Sections I.2.a. and I.2.c. through I.2.j. of this NOFO).

ii. Qualifications of Technical Personnel. The professional accomplishments, skills, and training of the proposed personnel to perform the work proposed in the application.
iii. **Resources.** The extent to which the applicant has access to the necessary facilities and overall support to accomplish project objectives, and assessment of the budget against the proposed work to ascertain the reasonableness of the request.

iv. **Technical Merit of Contribution.** The potential technical effectiveness of the proposed work and the value it would contribute to the field of measurement science. Applications must be relevant to current PML research programs and have a relation to the objectives of ongoing PML programs and activities.

Each of these factors will be given equal weight in the evaluation process.

(2) The evaluation criteria that will be used in evaluating applications considered by the **Office of Weights and Measures** and assigned weights are as follows:

i. **Technical Quality of the Research.** The rationality, innovation and imagination of the application and the fit to NIST’s documentary standards and legal metrology programs (see Section I.2.b. of this NOFO). **(0 – 35 points)**

ii. **Potential Impact of the Results.** The potential impact and the technical application of the results to NIST’s in-house programs and the documentary standards and legal metrology communities. **(0 – 25 points)**

iii. **Staff and Institution Capability to Perform the Work.** The quality of the facilities and experience of the staff to assess the likelihood of achieving the objective of the application. **(0 – 20 points)**

iv. **Match of Budget to Proposed Work.** Assessment of the budget against the proposed work to ascertain the reasonableness of the request. **(0 – 20 points)**

c. **Engineering Laboratory (EL) Grant Program.** The evaluation criteria that will be used in evaluating applications considered by the EL Grant Program and assigned weights are as follows:

(1) **Technical Quality of the Research.** The clarity, rationality, organization, innovation and imagination of the application. **(0 – 35 points)**

(2) **Potential Impact of the Results.** The potential impact and the likelihood of achieving technical application of the results, and the degree of alignment with NIST’s EL programs (see Section I.3. of this NOFO). **(0 – 35 points)**
(3) **Staff and Institution Capability to Perform the Work.** The quality of the facilities and experience of the staff to assess and overcome barriers to successfully achieve the objective of the application. (0 – 15 points)

(4) **Match of Budget to Proposed Work.** Assessment of the budget compared to the proposed work to ascertain the reasonableness of the request. (0 – 15 points)

d. **Fire Research (FR) Grant Program.** The evaluation criteria that will be used in evaluating applications considered by the FR Grant Program and assigned weights are as follows:

(1) **Technical Quality of the Research.** The clarity, rationality, organization, innovation, and imagination of the proposed work. (0 - 35 points)

(2) **Potential Impact of the Results.** The potential impact and the likelihood of the technical application of the results and the degree of alignment with NIST EL’s Fire Research Program (see Section I.4 of this NOFO). (0 - 35 points)

(3) **Staff and Institution Capability to Perform the Work.** The quality of the facilities and experience of the staff to assess and overcome barriers to successfully achieve the objective of the application. (0 - 15 points)

(4) **Match of Budget to Proposed Work.** Assessment of the budget compared to the proposed work to ascertain the reasonableness of the request. (0 - 15 points)

e. **Information Technology Laboratory (ITL) Grant Program.** The evaluation criteria that will be used in evaluating applications considered by the ITL Grant Program are as follows:

(1) **Rationality.** The coherence of the applicant’s approach and the extent to which the application effectively addresses scientific and technical issues relevant to ITL programs (see Section I.5. of this NOFO).

(2) **Technical Merit of Contribution.** The potential technical effectiveness of the proposed work and the value it would contribute to the field of information technology research.

(3) **Qualifications of Technical Personnel.** The professional accomplishments, skills, and training of the proposed personnel to perform the proposed work.
(4) **Resources.** The extent to which the applicant has access to the necessary facilities and overall support to accomplish project objectives, and assessment of the budget against the proposed work to ascertain the reasonableness of the request.

Each of these factors will be given equal weight in the evaluation process.

f. **Communications Technology Laboratory (CTL) Grant Program.** The evaluation criteria that will be used in evaluating applications considered by the CTL Grant Program and assigned weights are as follows:

(1) **Rationality.** The coherence of the applicant’s approach and the extent to which the application effectively addresses scientific and technical issues that are relevant to CTL programs (see Section I.6. of this NOFO). **(0 – 25 points)**

(2) **Technical Merit of Contribution.** The potential technical effectiveness of the proposed work and the value it would contribute to the field of measurement science and engineering, especially as it pertains to reference methods, reference materials and reference data in communications technology. **(0 – 25 points)**

(3) **Qualifications of Technical Personnel.** The professional accomplishments, skills, and training of the proposed personnel to perform the work proposed in the application. **(0 – 25 points)**

(4) **Resources.** The extent to which the applicant has access to the necessary facilities and overall support to accomplish project objectives, and assessment of the budget against the proposed work to ascertain the reasonableness of the request. **(0 – 25 points)**

g. **NIST Center for Neutron Research (NCNR) Grant Program.** The evaluation criteria that will be used in evaluating applications considered by the NCNR Grant Program and assigned weights are as follows:

(1) **Rationality.** The innovation, rationality, and coherence of the applicant’s approach and the extent to which the application effectively addresses important scientific and technical issues using neutron methods and/or the development of innovative devices for neutron research (see Section I.7. of this NOFO). **(0 to 35 points)**

(2) **Qualifications of Technical Personnel.** The professional accomplishments, skills, and training of the proposed personnel to perform the work proposed in the application. **(0 to 20 points)**
(3) **Resources.** The extent to which the applicant has access to the necessary resources, facilities, and overall support to accomplish project objectives, and assessment of the budget against the proposed work to ascertain the reasonableness of the request. **(0 to 20 points)**

(4) **Technical Merit of Contribution.** The potential technical effectiveness of the proposed work and the value it would contribute to neutron research. **(0 to 25 points)**

**h. Center for Nanoscale Science and Technology (CNST) Grant Program.** The evaluation criteria that will be used in evaluating applications considered by the CNST Grant Program are as follows:

(1) **Rationality.** The coherence of the applicant's approach and the extent to which the application effectively addresses scientific and technical issues relevant to CNST (see Section I.8. of this NOFO).

(2) **Qualifications of Technical Personnel.** The professional accomplishments, skills, and training of the proposed personnel to perform the work proposed in the application.

(3) **Resources.** The extent to which the applicant has access to the necessary facilities and overall support to accomplish project objectives, and assessment of the budget against the proposed work to ascertain the reasonableness of the request.

(4) **Technical Merit of Contribution.** The potential technical effectiveness of the proposed work and the value it would contribute to the field of nanotechnology.

Each of these factors will be given equal weight in the evaluation process.

**i. Special Programs Office (SPO) Grant Program.** The evaluation criteria that will be used in evaluating applications considered by the SPO Grant Program are as follows:

(1) **Rationality.** The logic and soundness of the applicant's approach and the extent to which the successful completion of the proposed work addresses scientific and technical issues relevant to SPO programs (see Section I.9. of this NOFO).

(2) **Technical Merit of Contribution.** The potential technical effectiveness of the proposed work and the value it would contribute to the fields of science relevant to SPO (see Section I.9. of this NOFO).
(3) **Qualifications of Technical Personnel.** The professional accomplishments, skills, and training of the proposed personnel to perform the work proposed in the application.

(4) **Resources.** The extent to which the applicant has access to the necessary equipment and facilities and overall support to accomplish project objectives, and assessment of the budget against the proposed work to ascertain the reasonableness of the request.

Each of these factors will be given equal weight in the evaluation process.

j. **Standards Coordination Office (SCO) Grant Program.** The evaluation criteria that will be used in evaluating applications considered by the SCO Grant Program and assigned weights are as follows:

(1) **Rationality.** The coherence of the applicant’s approach and the extent to which the application effectively addresses scientific and technical issues relevant to the SCO mission (see Section I.10. of this NOFO). (0 – 30 points)

(2) **Technical Merit of Contribution.** The potential technical effectiveness of the proposed work and the value it would contribute to the field of standardization. (0 – 30 points)

(3) **Qualifications of Technical Personnel.** The professional accomplishments, skills, and training of the proposed personnel to perform the proposed work. (0 – 20 points)

(4) **Use of Funds and Cost-effectiveness.** An assessment of the budget against the proposed activities will be conducted to determine the reasonableness of the request. (0 – 20 points)

k. **International and Academic Affairs Office (IAAO) Grant Program.** The evaluation criteria that will be used in evaluating applications considered by the IAAO Grant Program are as follows:

(1) **Rationality.** The rationality, innovation and creativity of the application and the fit of the proposed work to the objectives of the IAAO Grant Program (see Section I.11. of this NOFO).

(2) **Technical Merit of Contribution.** The potential effectiveness of the proposed activity, its value to global metrology and quality infrastructure, and the likelihood and potential impact of the applicant's technical application of the proposed
(3) **Staff and Institutional Capability to perform the Work.** The quality of facilities and experience of the staff to assess the likelihood of achieving the objective of the proposed work.

(4) **Match of Budget to Proposed Work.** Assessment of the budget compared to the proposed work to ascertain the reasonableness of the request.

Each of these factors will be given equal weight in the evaluation process.

I. **Associate Director for Laboratory Programs (ADLP) Grant Program.** The evaluation criteria that will be used in evaluating applications considered by the ADLP Grant Program and assigned weights are as follows:

   (1) **Technical Quality of the Research.** The rationality, innovation and imagination of the application, and the fit to ADLP programs (see Section 1.12. of this NOFO). (0 – 35 points)

   (2) **Potential Impact of the Results.** The potential impact and the likelihood of the technical application of the results. (0 – 25 points)

   (3) **Staff and Institution Capability to Perform the Work.** The quality of the facilities and experience of the staff to assess the likelihood of achieving the objective of the application. (0 – 20 points)

   (4) **Match of Budget to Proposed Work.** Assessment of the budget against the proposed work to ascertain the reasonableness of the request. (0 – 20 points)

m. **Associate Director for Innovation and Industry Services (ADIIS) Grant Program.** The evaluation criteria that will be used in evaluating applications considered by the ADIIS Grant Program and assigned weights are as follows:

   (1) **Rationality.** The rationality, innovation and creativity of the application and the fit of the proposed work to the objectives of the ADIIS Grant Program (see Section 1.13. of this NOFO).

   (2) **Technical Merit of Contribution.** The potential effectiveness of the proposed activity, and the likelihood and potential impact of the applicant's approach to strengthen and enhance the mission of the ADIIS Grant Program.

   (3) **Staff and Institutional Capability to perform the Work.** The quality of facilities and experience of the staff to assess the likelihood of achieving the objective of
(4) **Match of Budget to Proposed Work.** Assessment of the budget compared to the proposed work to ascertain the reasonableness of the request.

2. **Review and Selection Process**

Proposals, reports, documents and other information related to applications submitted to NIST and/or relating to financial assistance awards issued by NIST will be reviewed and considered by Federal employees, Federal agents and contractors, and/or by non-Federal personnel who have entered into nondisclosure agreements covering such information, when applicable.

**a. Initial Screening of all NIST MSE Research Grant Program Applications.** All applications received in response to this NOFO will be assigned to the program designated on the cover page of the Technical Proposal and reviewed as received on a rolling basis to determine whether they are eligible, complete, and responsive to this NOFO and aligned with the respective program objectives and research grant areas as described in the Program Description (see Section I. of this NOFO).

Applications determined to be ineligible, incomplete, and/or non-responsive based on the initial screening will be eliminated from further review. However, NIST, in its sole discretion, may continue the review process for an application that is missing non-substantive information that can easily be rectified or cured.

**b. Full Review of Eligible, Complete, and Responsive Applications for all NIST MSE Research Grant Applications.** All applications that are determined to be eligible, complete, and responsive will proceed for full reviews in accordance with the review and selection processes set forth below for each of the respective programs.

NIST reserves the right to negotiate the budget costs with the applicants that have been selected to receive awards, which may include requesting that the applicant remove certain costs. Additionally, NIST may request that the applicant modify objectives or work plans and provide supplemental information. For international applications, NIST will follow applicable U.S. laws and policies. NIST also reserves the right to reject an application where information is uncovered that raises a reasonable doubt as to the responsibility of the applicant. NIST may select some, all, or none of the applications, or part(s) of any particular application. In some cases, NIST may ask applicants to consider combining projects. The final approval of selected applications and issuance of awards will be by the NIST Grants Officer. The award decisions of the NIST Grants Officer are final.
(1) Material Measurement Laboratory (MML) Grant Program

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.a. of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, who is the MML Executive Officer, or designee, will make final application selections taking into consideration the results of the reviewers’ evaluations, consultations with the appropriate MML Division Chief, relevance to the objectives described in the MML Grant Program Description (see Section I.1. of this NOFO), and the availability of funds.

(2) Physical Measurement Laboratory (PML) Grant Program

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the appropriate evaluation criteria (see Sections V.1.b.(1) and Section V.1.b.(2) of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, who is the PML Director, or designee, will make final application selections, taking into consideration the results of the reviewers’ evaluations, relevance to the objectives described in the PML Grant Program Description (see Section I.2. of this NOFO), and the availability of funds.

(3) Engineering Laboratory (EL) Grant Program

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.c. of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, who is the EL Director, or designee, will make final application selections, taking into consideration the results of the reviewers’ evaluations, relevance to the objectives described in the EL Grant Program Description (see Section I.3. of this NOFO), program balance, and the availability of funds.

(4) Fire Research (FR) Grant Program
Prospective applicants are encouraged to contact the group leaders listed in the FR Grant Program Description (see Section I.4. of this NOFO) to determine the responsiveness of the application and compliance with program objectives prior to preparation of an application to the FR Grant Program.

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.d. of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, who is the EL Director, or designee, will make final application selections, taking into consideration the results of the reviewers’ evaluations, relevance to the objectives described in the EL Fire Research Program Description (see Section I.4. of this NOFO), program balance, and the availability of funds.

(5) Information Technology Laboratory (ITL) Grant Program

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.e. of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, who is the appropriate ITL Division Chief, or designee will make final application selections, taking into consideration the results of the reviewers’ evaluations, consultations with the ITL Director, relevance to the objectives described in the ITL Grant Program Description (see Section I.5. of this NOFO), and the availability of funds.

(6) Communications Technology Laboratory (CTL) Grant Program

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.f. of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, who is the CTL Executive Officer, or designee, will make final application selections taking into consideration the results of the reviewers'
evaluations, consultations with the appropriate CTL Division Chief, relevance to the objectives described in the CTL Grant Program Description (see Section I.6. of this NOFO), and the availability of funds.

(7) NIST Center for Neutron Research (NCNR) Grant Program

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.g. of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, who is the NCNR Director, or designee, will make final application selections, taking into consideration the results of the reviewers’ evaluations, relevance to the objectives described in the NCNR Grant Program Description (see Section I.7. of this NOFO), and the availability of funds.

(8) Center for Nanoscale Science and Technology (CNST) Grant Program

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.h. of this NOFO). The reviewers may discuss the application with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, who is the CNST Director, or designee, will make final application selections, taking into consideration the results of the reviewers’ evaluations, relevance to the objectives described in the CNST Grant Program Description (see Section I.8. of this NOFO), and the availability of funds.

(9) Special Programs Office (SPO) Grant Program

Prospective applicants are encouraged to contact the appropriate point of contact listed in the SPO Grant Program Description (see Section I.9. of this NOFO) to determine the responsiveness of the application and compliance with program objectives prior to preparation of an application to the SPO Grant Program.

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.i. of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.
The Selecting Official, who is the SPO Director, or designee, will make final application selections, taking into consideration the results of the reviewers’ evaluations, relevance to the objectives described in the SPO Grant Program Description (see Section I.9. of this NOFO), and the availability of funds.

(10) Standards Coordination Office (SCO) Grant Program

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.j. of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, who is the SCO Director, or designee, will make final application selections, taking into consideration the results of the reviewers’ evaluations, relevance to the objectives described in the SCO Grant Program Description (see Section I.10. of this NOFO), and the availability of funds.

(11) International and Academic Affairs Office (IAAO) Grant Program

At least three (3) objective individuals knowledgeable about the particular area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.k. of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, the IAAO Director, or designee, will make final application selections, taking into consideration the results of the reviewers’ evaluations, relevance to the objectives described in the IAAO Grant Program Description (see Section I.11. of this NOFO), and the availability of funds.

(12) Associate Director for Laboratory Programs (ADLP) Grant Program

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.l. of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, the Associate Director for Laboratory Programs, or designee, will make final application selections, taking into consideration the results of the reviewers’ evaluations, relevance to the objectives described in the
ADLP Grant Program Description (see Section I.12. of this NOFO), and the availability of funds.

(13) Associate Director for Innovation and Industry Services (ADIIS) Grant Program

At least three (3) objective individuals knowledgeable about the particular scientific area described in the application will review the merits of each application, based on the evaluation criteria (see Section V.1.m. of this NOFO). The reviewers may discuss the applications with each other, but scores will be determined on an individual basis, not as a consensus.

The Selecting Official, the Associate Director for Innovation and Industry Services, or designee, will make final application selections, taking into consideration the results of the reviewers’ evaluations, relevance to the objectives described in the ADIIS Grant Program Description (see Section I.13. of this NOFO), and the availability of funds.

c. Federal Awarding Agency Review of Risk Posed by Applicants. After applications are proposed for funding by the Selecting Official and prior to the issuance of an award, the NIST Grants Management Division will conduct an assessment of the risk posed by the applicant in accordance with 2 C.F.R. § 200.205. In addition to reviewing repositories of government-wide eligibility, qualification or financial integrity information, the risk assessment conducted by NIST may consider items such as the financial stability of an applicant, quality of the applicant’s management systems, an applicant’s history of performance, previous audit reports and audit findings concerning the applicant and the applicant’s ability to effectively implement statutory, regulatory, or other requirements imposed on non-Federal entities. Upon review of these factors, if appropriate, specific award conditions that correspond to the degree of risk may be applied by the NIST Grants Officer pursuant to 2 C.F.R. § 200.207. In addition, NIST reserves the right to reject an application in its entirety where information is uncovered that raises a significant risk with respect to the responsibility or suitability of the applicant.

3. Anticipated Announcement and Award Dates. For all NIST MSE Research Grant Programs, awards will be made approximately 90 days after the end of the review process (see Section V.2. of this NOFO). See information in Section IV.4. of this NOFO regarding awards made in a subsequent fiscal year.

4. Additional Information

a. Safety. Safety is a top priority at NIST. Employees and affiliates of award recipients who conduct project work at NIST will be expected to be safety-conscious,
to attend NIST safety training, and to comply with all NIST safety policies and procedures, and with all applicable terms of their guest research agreement.

b. **Notification to Unsuccessful Applicants.** Unsuccessful applicants will be notified in writing.

c. **Retention of Unsuccessful Applications.** For paper applications, one (1) of each non-selected application will be retained for three (3) years for record keeping purposes and the other two (2) copies will be destroyed. After three (3) years, the remaining copy will be destroyed. For applications sent through Grants.gov, an electronic copy of each non-selected application will be retained for at least three (3) years for record keeping purposes.

**VI. Federal Award Administration Information**

1. **Federal Award Notices.** Successful applicants will receive an award package from the NIST Grants Officer.

2. **Administrative and National Policy Requirements**

   a. **Uniform Administrative Requirements, Cost Principles and Audit Requirements.** Through 2. C.F.R. § 1327.101, the Department of Commerce adopted the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards at 2 C.F.R. Part 200, which apply to awards made pursuant to this NOFO. Refer to [http://go.usa.gov/SBYh](http://go.usa.gov/SBYh) and [http://go.usa.gov/SBg4](http://go.usa.gov/SBg4).

   b. **Department of Commerce Financial Assistance Standard Terms and Conditions.** The Department of Commerce Financial Assistance Standard Terms and Conditions (March 31, 2017) will apply to this award and are accessible at: [https://go.usa.gov/xXRxK](https://go.usa.gov/xXRxK). Refer to Section VII. of this NOFO, Federal Awarding Agency Contacts, Grant Rules and Regulations, if you seek the information at this link and it is no longer working or you need more information.

   c. **Pre-Award Notification Requirements.** The Department of Commerce will apply the Pre-Award Notification Requirements for Grants and Cooperative Agreements dated December 30, 2014 (79 FR 78390), accessible at [http://go.usa.gov/hKkR](http://go.usa.gov/hKkR). Refer to Section VII. of this NOFO, Federal Awarding Agency Contacts, Grant Rules and Regulations, if you seek the information at this link and it is no longer working or you need more information.
d. **Funding Availability and Limitation of Liability.** Funding for the program listed in this NOFO is contingent upon the availability of appropriations. In no event will NIST or the Department of Commerce be responsible for application preparation costs if this program fails to receive funding or is cancelled because of agency priorities. Publication of this NOFO does not oblige NIST or the Department of Commerce to award any specific project or to obligate any available funds.

e. **Collaborations with NIST Employees.** All applications should include a description of any work proposed to be performed by an entity other than the applicant, and the cost of such work should ordinarily be included in the budget. If an applicant proposes collaboration with NIST, the statement of work should include a statement of this intention, a description of the collaboration, and prominently identify the NIST employee(s) involved, if known. Any collaboration by a NIST employee must be approved by appropriate NIST management and is at the sole discretion of NIST. Prior to beginning the merit review process, NIST will verify the approval of the proposed collaboration. Any unapproved collaboration will be stricken from the application prior to the merit review. Any collaboration with an identified NIST employee that is approved by appropriate NIST management will not make an application more or less favorable in the competitive process.

f. **Use of NIST Intellectual Property.** If the applicant anticipates using any NIST-owned intellectual property to carry out the work proposed, the applicant should identify such intellectual property. This information will be used to ensure that no NIST employee involved in the development of the intellectual property will participate in the review process for that competition. In addition, if the applicant intends to use NIST-owned intellectual property, the applicant must comply with all statutes and regulations governing the licensing of Federal government patents and inventions, described in 35 U.S.C. §§ 200-212, 37 C.F.R. Part 401, 2 C.F.R. § 200.315, and in Section C.03 of the Department of Commerce Financial Assistance Standard Terms and Conditions dated March 31, 2017, found at [https://go.usa.gov/xXRxK](https://go.usa.gov/xXRxK). Questions about these requirements may be directed to the Chief Counsel for NIST, (301) 975-2803, nistcounsel@nist.gov.

Any use of NIST-owned intellectual property by an applicant is at the sole discretion of NIST and will be negotiated on a case-by-case basis if a project is deemed meritorious. The applicant should indicate within the statement of work whether it already has a license to use such intellectual property or whether it intends to seek one.

If any inventions made in whole or in part by a NIST employee arise in the course of an award made pursuant to this NOFO, the United States government may...
retain its ownership rights in any such invention. Licensing or other disposition of NIST’s rights in such inventions will be determined solely by NIST, and include the possibility of NIST putting the intellectual property into the public domain.

g. Additional Consideration of Applications. NIST programs are often cross-cutting and multi-disciplinary. If a NIST program official believes an application that is not selected for funding under a specific MSE research grant program may be of interest to another NIST MSE research grant program(s), the official may forward the application to any other NIST MSE research grant program(s) that the program official believes may have an interest in the project, for potential consideration under the other NIST MSE research grant program(s) procedures. If, upon initial screening, the other NIST MSE research grant program(s) finds the application may be of programmatic interest, the application will proceed through the review and selection process (see Section V.2 of this NOFO) for the specific MSE research grant program(s). If not, the application will be returned to the original program for final processing. **Any applicant that does not wish for its application to be considered by other NIST programs should indicate on its application that it would like consideration of the project to be limited to the program to which it originally submitted the application.** Applicants will be notified if their applications have been forwarded to another NIST program(s) for potential consideration.

h. Research Activities Involving Human Subjects, Human Tissue, Data or Recordings Involving Human Subjects Including Software Testing. Any application that includes research activities involving human subjects, human tissue/cells, or data or recordings from or about human subjects, must satisfy the requirements of the Common Rule for the Protection of Human Subjects ("Common Rule"), codified for the Department of Commerce at 15 C.F.R. Part 27. Research activities involving human subjects who fall within one or more of the classes of vulnerable subjects found in 45 C.F.R. Part 46, Subparts B, C and D must satisfy the requirements of the applicable subpart(s). In addition, any such application that includes research activities on these subjects must be in compliance with all applicable statutory requirements imposed upon the Department of Health and Human Services (DHHS) and other Federal agencies, all regulations, policies and guidance adopted by DHHS, the Food and Drug Administration (FDA), and other Federal agencies on these topics, and all Executive Orders and Presidential statements of policy on applicable topics.  

(Regulatory Resources: [http://www.hhs.gov/ohrp/humansubjects/index.html](http://www.hhs.gov/ohrp/humansubjects/index.html) which includes links to FDA regulations, but may not include all applicable regulations and policies).

NIST uses the following Common Rule definitions for research and human subjects research:
Research: A systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge. Activities which meet this definition constitute research for purposes of this policy, whether or not they are conducted or supported under a program which is considered research for other purposes. For example, some demonstration and service programs may include research activities.

Human Subject: A living individual about whom an investigator (whether professional or student) conducting research obtains data through intervention or interaction with the individual or identifiable private information.

1) Intervention includes both physical procedures by which data are gathered and manipulations of the subject or the subject's environment that are performed for research purposes.

2) Interaction includes communication or interpersonal contact between investigator and subject.

3) Private information includes information about behavior that occurs in a context in which an individual can reasonably expect that no observation or recording is taking place, and information which has been provided for specific purposes by an individual and which the individual can reasonably expect will not be made public (for example, a medical record). Private information must be individually identifiable (i.e., the identity of the subject is or may readily be ascertained by the investigator associated with the information) in order for obtaining the information to constitute research involving human subjects.

See 15 C.F.R. § 27.102 (Definitions).

1) Requirement for Federalwide Assurance. If the application is accepted for [or awarded] funding, organizations that have an IRB are required to follow the procedures of their organization for approval of exempt and non-exempt research activities that involve human subjects. Both domestic and foreign organizations performing non-exempt research activities involving human subjects will be required to have protocols approved by a cognizant, active IRB currently registered with the Office for Human Research Protections (OHRP) within the DHHS that is linked to the engaged organizations. All engaged organizations must possess a currently valid Federalwide Assurance (FWA) on file from OHRP. Information regarding how to apply for an FWA and register an IRB with OHRP can be found at http://www.hhs.gov/ohrp/assurances/index.html. NIST relies only on OHRP-
issued FWAs and IRB Registrations for both domestic and foreign organizations for NIST supported research involving human subjects. NIST will not issue its own FWAs or IRB Registrations for domestic or foreign organizations.

2) Administrative Review. The NIST Human Subjects Protection Office (HSPO) reserves the right to conduct an administrative review\(^5\) of all applications that potentially include research involving human subjects and were approved by an authorized non-NIST institutional entity (an IRB or entity analogous to the NIST HSPO) under 15 C.F.R. § 27.112 (Review by Institution). If the NIST HSPO determines that an application includes research activities that potentially involve human subjects, the applicant will be required to provide additional information to NIST for review and approval. The documents required for funded proposals are listed in each section below. Most documents will need to be produced during the proposal review process; however, the Grants Officer may allow final versions of certain required documents to be produced at an appropriate designated time post-award. Research involving human subjects may not start until the NIST Grants Officer issues an award explicitly authorizing such research. In addition, all amendments, modifications, or changes to approved research and requests for continuing review and closure will be reviewed by the NIST HSPO.

3) Required documents for proposal review. All applications involving human subject research must clearly indicate, by separable task, all research activities believed to be exempt or non-exempt research involving human subjects, the expected institution(s) where the research activities involving human subjects may be conducted, and the institution(s) expected to be engaged in the research activities.

   a. Not research determination. If an activity/task involves human subjects as defined in the Common Rule, but the applicant participant(s) indicates to NIST that the activity/task is not research as defined in the Common Rule, the following information may be requested for that activity/task:

\(^5\) Conducting an “administrative review” means that the NIST HSPO will review and verify the performing institution’s determination for research not involving human subjects or exempt human subjects research. In addition, for non-exempt human subjects research, the NIST HSPO will review and confirm that the research and performing institution(s) are in compliance with 15 C.F.R. Part 27, which means HSPO will 1) confirm the engaged institution(s) possess, or are covered under a Federalwide Assurance, 2) review the research study documentation submitted to the IRB and verify the IRB’s determination of level of risk and approval of the study for compliance with 15 C.F.R. Part 27, 3) review and verify IRB-approved substantive changes to an approved research study before the changes are implemented, and 4) review and verify that the IRB conducts an appropriate continuing review at least annually.
(1) Justification, including the rationale for the determination and such additional documentation as may be deemed necessary by NIST to review and/or support a determination that the activity/task in the application is not research as defined in the Common Rule.

(2) If the applicant participant(s) used a cognizant IRB that provided a determination that the activity/task is not research, a copy of that determination documentation must be provided to NIST. The applicant participant(s) is not required to establish a relationship with a cognizant IRB if they do not have one.

NIST will review the information submitted and may coordinate further with the applicant before determining whether the activity/task will be defined as research under the Common Rule in the applicable NIST financial assistance program or project.

b. Research not involving human subjects. If an activity/task is determined to be research and involves human subjects, but is determined to be not human subjects research (or research not involving human subjects) under the Common Rule, the following information may be requested for that activity/task:

(1) Justification, including the rationale for the determination and such additional documentation as may be deemed necessary by NIST to review and/or support a determination that the activity/task in the application is not research as defined in the Common Rule.

(2) If the applicant participant(s) used a cognizant IRB that provided a determination that the activity/task is research not involving human subjects, a copy of that determination documentation must be provided to NIST. The applicant participant(s) is not required to establish a relationship with a cognizant IRB if they do not have one.

c. Exempt research determination with no IRB. If the application appears to NIST to include exempt research activities, and the performer of the activity or the supplier and/or the receiver of the biological materials or data from human subjects does not have a cognizant IRB to provide an exemption determination, the following information may be requested during the review process so that NIST can evaluate whether an exemption under the Common Rule applies (see 15 C.F.R. § 27.101(b), (c) and (d)):

(1) The name(s) of the institution(s) where the exempt research will be conducted.
(2) The name(s) of the institution(s) providing the biological materials or
data from human subjects.

(3) A copy of the protocol for the research to be conducted; and/or the
biological materials or data from human subjects to be
collected/provided, not pre-existing samples (i.e., will proposed
research collect only information without personal identifiable
information, will biological materials or data be de-identified and when
and by whom was the de-identification performed, how were the
materials or data originally collected).

(4) For pre-existing biological materials or data from human subjects,
provide copies of the consent forms used for collection and a
description of how the materials or data were originally collected and
stripped of personal identifiers. If copies of consent forms are not
available, explain.

(5) Any additional clarifying documentation that NIST may deem
necessary in order to make a determination whether the activity/task or
use of biological materials or data from human subjects is exempt
under the Common Rule.

d. Research review with an IRB. If the application appears to NIST to
include research activities (exempt or non-exempt) involving human
subjects, and the proposed performer of the activity has a cognizant IRB
registered with OHRP, and linked to their Federalwide Assurance, the
following information may be requested during the review process:

(1) The name(s) of the institution(s) where the research will be conducted.
(2) The name(s) and institution(s) of the cognizant IRB(s), and the IRB
registration number(s).
(3) The FWA number of the applicant linked to the cognizant IRB(s);
(4) The FWAs associated with all organizations engaged in the planned
research activity/task, linked to the cognizant IRB.
(5) If the IRB review(s) is pending, the estimated start date for research
involving human subjects.
(6) The IRB approval date (if currently approved for exempt or non-exempt
research).
(7) If any of the engaged organizations has applied for or will apply for an
FWA or IRB registration, those details should be clearly provided for
each engaged organization.

If the application includes research activities involving human subjects to
be performed in the first year of an award, additional documentation may
be requested by NIST during pre-award review for those performers, and
may include the following for those research activities:
(1) A signed (by the study principal investigator) copy of each applicable final IRB-approved protocol.

(2) A signed and dated approval letter from the cognizant IRB(s) that includes the name of the institution housing each applicable IRB, provides the start and end dates for the approval of the research activities, and any IRB-required interim reporting or continuing review requirements.

(3) A copy of any IRB-required application information, such as documentation of approval of special clearances (i.e., biohazard, HIPAA, etc.) conflict-of-interest letters, or special training requirements.

(4) A brief description of what portions of the IRB submitted protocol are specifically included in the application submitted to NIST, if the protocol includes tasks not included in the application, or if the protocol is supported by multiple funding sources. For protocols with multiple funding sources, NIST will not approve the study without a non-duplication-of-funding letter indicating that no other federal funds will be used to support the tasks proposed under the proposed research or ongoing project.

(5) If a new protocol will only be submitted to an IRB if an award from NIST is issued, a draft of the proposed protocol.

(6) Any additional clarifying documentation that NIST may request during the review process to perform the NIST administrative review of research involving human subjects. (See 15 C.F.R. § 27.112 (Review by Institution)).

This clause reflects the existing NIST policy and requirements for Research Involving Human Subjects. Should the policy be revised prior to award, a clause reflecting the policy current at time of award may be incorporated into the award.

If the policy is revised after award, a clause reflecting the updated policy may be incorporated into the award.

For more information regarding research projects involving human subjects, contact Anne Andrews, Director, NIST Human Subjects Protection Office (e-mail: anne.andrews@nist.gov; phone: (301) 975-5445).

i. **Research Activities Involving Live Vertebrate Animals or Pre-Existing Cell Lines/Tissues From Vertebrate Animals.** Any application that proposes research activities involving live vertebrate animals that are to be cared for, euthanized, or used by award recipients to accomplish research goals, teaching, or testing must meet the requirements of the Animal Welfare Act (AWA) (7 U.S.C. § 2131 et seq.), and the AWA final rules (9 C.F.R. Parts 1, 2, and 3), and
if appropriate, the Good Laboratory Practice for Nonclinical Laboratory Studies (21 C.F.R. Part 58). In addition, such research activities should be in compliance with the “U.S. Government Principles for Utilization and Care of Vertebrate Animals Used in Testing, Research, and Training” (Principles). The Principles and guidance on these Principles are available in the National Research Council’s “Guide for the Care and Use of Laboratory Animals,” which can be obtained from National Academy Press, 500 5th Street, N.W., Department 285, Washington, DC 20055, or as a free PDF online at http://www.nap.edu/catalog/12910/guide-for-the-care-and-use-of-laboratory-animals-eighth.

1) Administrative Review. NIST reserves the right to conduct an administrative review of all applications that potentially include research activities that involve live vertebrate animals, or custom samples from, or field studies with live vertebrate animals. If the application includes research activities, field studies, or custom samples involving live vertebrate animals, the applicant will be required to provide additional information for review and approval. In addition, NIST will verify the applicant’s determination(s) of excluded samples from vertebrate animals. The documents required for funded proposals are listed in each section below. Some may be requested for a pre-review during the proposal review process; however, the Grants Officer may allow final versions of certain required documents to be produced at an appropriate designated time post-award. If an award is issued, no research activities involving live vertebrate animals shall be initiated or costs incurred for those activities under the award until the NIST Grants Officer issues written approval. In addition, all re-approvals, amendments, modifications, changes, annual reports and closure will be reviewed by NIST.

2) Required documents for NIST proposal review. The applicant should clearly indicate in the application, by separable task, all research activities believed to include research involving live vertebrate animals and the institution(s) where the research activities involving live vertebrate animals may be conducted. In addition, the applicant should

---

6 Conducting an “administrative review” means that the NIST HSPO will review and verify the performing institution’s IACUC’s approval of research with live vertebrate animals, and confirm that the research and performing institution(s) have an appropriate assurance and are in compliance with applicable regulations. HSPO will 1) confirm the engaged institution(s) possess, or are covered under an applicable assurance, 2) review the research study documentation submitted to the IACUC and verify the IACUC’s determination of level of risk and approval of the study for compliance with applicable regulations, 3) review and verify IACUC-approved substantive changes to an approved research study before the changes are implemented, and 4) review and verify that the IACUC receives an annual report for the study and conducts an appropriate continuing review at least every three years.
indicate any activity/task that involves an excluded or custom collection from vertebrate animals, or a field study with animals.

a) Excluded Collections from Vertebrate Animals: The requirements for review and approval by an Institutional Animal Care and Use Committee (IACUC) do not apply to proposed research using preexisting images of animals or to research plans that do not include live animals. These regulations also do not apply to obtaining stock or pre-existing items from animal material suppliers (e.g., tissue banks), such as pre-existing cell lines and tissue samples, or from commercial food processors, where the vertebrate animal was euthanized for food purposes and not for the purpose of sample collection.

For pre-existing cell lines and tissue samples originating from vertebrate animals, NIST requires that the proposer provide documentation or the rationale for the determination that the cell line or tissue is pre-existing and not a custom collection from live vertebrate animals for an activity/task within the proposal. NIST may require additional documentation to review and/or support the determination that the cells and/or tissues from vertebrate animals are excluded from IACUC review.

b) Custom Collections Harvested from Live Vertebrate Animals: NIST requires documentation for obtaining custom samples from live vertebrate animals from animal material suppliers and other organizations (i.e., universities, companies, and government laboratories, etc.). Custom samples includes samples from animal material suppliers, such as when a catalog item indicates that the researcher is to specify the characteristics of the live vertebrate animal to be used, or how a sample is to be collected from the live vertebrate animal.

c) Field Studies of Animals: Some field studies of animals may be exempt under the Animal Welfare Act from full review and approval by an animal care and use committee, as determined by each institution. Field study is defined as “... a study conducted on free-living wild animals in their natural habitat...” 9 C.F.R. § 1.1. However, this term excludes any study that involves an invasive procedure or that harms or materially alters the behavior of an animal under study. Field studies, with or without invasive procedures, may also require obtaining appropriate federal or local government permits (marine mammals, endangered species, etc.). If the applicant’s institution requires review and approval by an animal care and use committee, NIST will require that documentation to be provided as described below.
d) For custom collections or studies with live vertebrate animals that require review and approval by an animal care and use committee the following documentation is required:

(1) **Requirement for Assurance.** An applicable assurance for the care and use of the live vertebrate animal(s) to be used in the proposed research is required. NIST may request documentation to confirm an assurance, if adequate confirmation is not available through an assuring organization’s website. The cognizant IACUC where the research activity is located may hold one or more assurances applicable to the research activity that are acceptable to NIST. These three assurances are:

   i. Animal Welfare Assurance from the Office of Laboratory Animal Welfare (OLAW) indicated by the OLAW assurance number, *i.e.*, A-1234;
   
   ii. USDA Animal Welfare Act certification indicated by the certification number, *i.e.*, 12-R-3456;
   
   iii. Association for the Assessment and Accreditation of Laboratory Animal Care (AAALAC) indicated by providing the organization name accredited by AAALAC as listed in the AAALAC Directory of Accredited Organizations.

(2) **Documentation of Research Review by an IACUC:** If the applicant’s application appears to include research activities, field studies, or custom sample collections involving live vertebrate animals the following information regarding review by an applicable IACUC may be requested during the application review process:

1. The name(s) of the institution(s) where the research involving live vertebrate animals will be conducted and/or custom samples collected.
2. The assurance type and number, as applicable, for the cognizant Institutional Animal Care and Use Committee (IACUC) where the research activity is located. [For example: Animal Welfare Assurance from the Office of Laboratory Animal Welfare (OLAW) should be indicated by the OLAW assurance number, *i.e.* A-1234; an USDA Animal Welfare Act certification should be indicated by the certification number *i.e.* 12-R-3456; and an Association for the Assessment and Accreditation of Laboratory Animal Care (AAALAC) should be indicated by AAALAC.]
3. The IACUC approval date for the Animal Study Protocol (ASP) (if currently approved).
4. If the review by the cognizant IACUC is pending, the estimated start date for research involving vertebrate animals.
5. If any assurances or IACUCs need to be obtained or established, that should be clearly stated.
6. If any special permits are required for field studies, those details should be clearly provided for each instance, or indicated as pending.

If the application includes research activities involving vertebrate animals to be performed in the first year of an award, additional documentation may be requested by NIST during pre-award review for those performers, and may include the following for those research activities, which may also include field studies, custom sample collections involving live vertebrate animals:

1. A signed (by the Principal Investigator) copy of the IACUC approved ASP.
2. Documentation of the IACUC approval indicating the approval and expiration dates of the ASP.
3. If applicable, a non-duplication-of-funding letter if the ASP is funded from several sources.
4. If a new ASP will only be submitted to an IACUC if an award from NIST is issued, a draft of the proposed ASP may be requested.
5. Any additional clarifying documentation that NIST may request during review of applications to perform the NIST administrative review of research involving live vertebrate animals.

This clause reflects the existing NIST policy for Research Involving Live Vertebrate Animals. Should the policy be revised prior to award, a clause reflecting the policy current at time of award may be incorporated into the award.

If the policy is revised after award, a clause reflecting the updated policy may be incorporated into the award.

For more information regarding research projects involving live vertebrate animals, contact Linda Beth Schilling, Senior Analyst (e-mail: linda.schilling@nist.gov; phone: 301-975-2887).

j. Collaborations Making Use of Federal Facilities. All applications should include a description of any work proposed to be performed using Federal facilities.

If an applicant proposes use of NIST facilities, the statement of work should include a statement of this intention and a description of the facilities. Any use of
NIST facilities must be approved by appropriate NIST management and is at the sole discretion of NIST. Prior to beginning the merit review process, NIST will verify the availability of the facilities and approval of the proposed usage. Any unapproved facility use will be stricken from the application prior to the merit review. Examples of some facilities that may be available for collaborations are listed on the following NIST Web site: https://www.nist.gov/labs-major-programs/user-facilities.

3. Reporting

a. Reporting Requirements. The following reporting requirements described in Section A.01 Reporting Requirements of the Department of Commerce Financial Assistance Standard Terms and Conditions dated March 31, 2017, https://go.usa.gov/xXRxK, apply to awards in this program:

(1) Financial Reports. Each award recipient will be required to submit an SF-425, Federal Financial Report on a semi-annual basis for the periods ending March 31 and September 30 of each year to the NIST Grants Officer and Grants Specialist named in the award documents. Reports will be due within 30 days after the end of the reporting period to the NIST Grants Officer and Grants Specialist named in the award documents. A final financial report is due within 90 days after the end of the project period.

(2) Performance (Technical) Reports. Each award recipient will be required to submit a technical progress report to the NIST Grants Officer and the NIST Federal Program Officer on a semi-annual basis for the periods ending March 31 and September 30 of each year. Reports will be due within 30 days after the end of the reporting period. A final technical progress report shall be submitted within 90 days after the expiration date of the award. Technical progress reports shall conform to the requirements in 2 C.F.R. § 200.328 (http://go.usa.gov/xkVgP) and Department of Commerce Standard Terms and Conditions, Section A.01 (https://go.usa.gov/xXRxK).

(3) Patent and Property Reports. From time to time, and in accordance with the Uniform Administrative Requirements and other terms and conditions governing the award, the recipient may be required to submit property and patent reports.

(4) Recipient Integrity and Performance Matters. In accordance with section 872 of Public Law 110-417 (as amended; see 41 U.S.C. 2313), if the total value of a recipient’s currently active grants, cooperative agreements, and procurement contracts from all Federal awarding agencies exceeds $10,000,000 for any period of time during the period of performance of an award made under this NOFO, then the recipient shall be subject to the requirements specified in the award documents.
b. **Audit Requirements.** 2 C.F.R. 200 Subpart F, adopted by the Department of Commerce through 2 C.F.R. § 1327.101, requires any non-Federal entity (i.e., including non-profit institutions of higher education and other non-profit organizations) that expends Federal awards of $750,000 or more in the recipient’s fiscal year to conduct a single or program-specific audit in accordance with the requirements set out in the Subpart. Applicants are reminded that NIST, the Department of Commerce Office of Inspector General or another authorized Federal agency may conduct an audit of an award at any time.

c. **Federal Funding Accountability and Transparency Act of 2006.** In accordance with 2 C.F.R. Part 170, all recipients of a Federal award made on or after October 1, 2010, are required to comply with reporting requirements under the Federal Funding Accountability and Transparency Act of 2006 (Pub. L. No. 109-282). In general, all recipients are responsible for reporting sub-awards of $25,000 or more. In addition, recipients that meet certain criteria are responsible for reporting executive compensation. Applicants must ensure they have the necessary processes and systems in place to comply with the reporting requirements should they receive funding. Also see the Federal Register notice published September 14, 2010, at 75 FR 55663 available here [http://go.usa.gov/hKnQ](http://go.usa.gov/hKnQ).

VIII. Other

1. Personal and Business Information. The applicant acknowledges and understands that information and data contained in applications for financial assistance, as well as information and data contained in financial, performance and other reports submitted by applicants, may be used by the Department of Commerce in conducting reviews and evaluations of its financial assistance programs. For this purpose, applicant information and data may be accessed, reviewed and evaluated by Department of Commerce employees, other Federal employees, Federal agents and contractors, and/or by non-Federal personnel, all of whom enter into appropriate conflicts of interest and nondisclosure agreements covering the use of such information. As may be provided in the terms and conditions of a specific financial assistance award, applicants are expected to support program reviews and evaluations by submitting required financial and performance information and data in an accurate and timely manner, and by cooperating with Department of Commerce and external program evaluators. In accordance with 2 C.F.R. § 200.303(e), applicants are reminded that they must take reasonable measures to safeguard protected personally identifiable information and other confidential or sensitive personal or business information created or obtained in connection with a Department of Commerce financial assistance award.

In addition, Department of Commerce regulations implementing the Freedom of Information Act (FOIA), 5 U.S.C. Sec. 552, are found at 15 C.F.R. Part 4, Public Information. These regulations set forth rules for the Department regarding making requested materials, information, and records publicly available under the FOIA. Applications submitted in response to this NOFO may be subject to requests for
release under the Act. In the event that an application contains information or data that the applicant deems to be confidential commercial information that should be exempt from disclosure under FOIA, that information should be identified, bracketed, and marked as Privileged, Confidential, Commercial or Financial Information. In accordance with 15 CFR § 4.9, the Department of Commerce will protect from disclosure confidential business information contained in financial assistance applications and other documentation provided by applicants to the extent permitted by law.
