Cybersecurity protects the confidentiality, integrity, and availability of your information. A cybersecurity program provides advantages for small and mid-sized manufacturers:

- Improve Recovery Times After Disruptions
- Avoid Potential Losses
- Protect Valuable Data
- Ensure Employee and Customer Privacy
- Mitigate Risks

### Reality of Cyberattacks and Breaches

- **55%** of small and mid-sized businesses have experienced a data breach or cyberattack.
- **43%** of all spear-phishing attacks are targeted at small businesses.
- **60%** of impacted businesses are left severely impaired.
- **$38K** is the average cost for a small business to overcome a data breach.

### Common Types of Attacks and Breaches

- Spear Phishing
- Identity Theft
- Web Attacks
- Ransomware
- SPAM

### 5 Steps to Reduce Cyber Risks

Protecting the information of your company, employees, and customers is an ongoing process. Manufacturers will benefit from a program that:

- Identifies your assets
- Protects your data
- Detects incidents
- Responds with a plan
- Recovers normal operations

### Defense Suppliers: Compliance

Manufacturers in the DoD supply chain have until **December 31, 2017** to be in compliance with new DFAR cybersecurity requirements.
