

## GLOSSARY

**Awareness** - Having knowledge or realization.

**Cartesian coordinate** - A system of representing points in space in terms of their distance from a given origin measured along a set of mutually perpendicular axis (written X, Y, Z) with reference to 3 axes.

**Demonstrate** - To show clearly and deliberately. To present by experiments, examples or practical application.

**Experiment** – A scientific procedure undertaken to make a discovery, test a hypothesis, or demonstrate a known fact.

**Imperial measurement system** - A system of measurement which includes using inches and feet.

**Knowledge** – Facts, information and skills acquired by a person through experience or education; theoretical or practical understanding of a subject.

**Metric measurement system** - A system of measurement which includes using millimeters, centimeters and meters.

**Practical** - A lesson or exam in science or technology in which students have to do or make things, not just read or write about them.

**SWGSTAIN Terminology** - Forensic Science Communications, April 2009, Vol. 11, #2.
