Subject: Draft 2 Framework V1.1 Feedback

To whom it may concern,

Lines 86-87 list the parts of the Framework in this order: Framework Core, Framework Profile, and Framework Implementation Tiers. The description of these parts, however, is listed in a different order in lines 207-240 which was confusing when first reading it. I am recommending that the order of these be consistent when referenced throughout the document to help minimize confusion.

Thanks,

Paul Gunnels
