MEP PHRASES

Since 1988, MEP has worked with 94,115 manufacturers, leading to $98.7 billion in sales and $17.1 billion in cost savings, and it has helped create and retain more than 883,337 jobs.

For every one dollar of federal investment, the MEP generates $17.8 in new sales growth and $26.6 in new client investment. This translates into $2.3 billion in new sales annually. For every $1,523 of federal investment, MEP creates or retains one manufacturing job.
Since 1996, NIST MEP has sponsored a national survey of center clients for two primary purposes: collect aggregate information on program performance indicators to report to various stakeholders on program performance; and provide center-specific program performance and impact information for center use. Fors Marsh Group, LLC, an independent survey expert, conducts the NIST MEP client survey. The survey asks clients to consider the entire set of projects or services provided by a center and to report on how their company’s performance and processes have been affected in the last 12 months. The survey asks clients to report on the impact of MEP services on bottom-line client outcomes and bottom-line impacts such as sales, jobs created/retained, capital investment and cost savings.
