

Ribbon Cutting Ceremony

for the
Net-Zero Energy Residential Test Facility

Wednesday, September 12, 2012 – 2:00 PM

Adjacent to the Building Research Building (226) on the NIST Campus

Please join us for a ribbon cutting ceremony to celebrate completion of the Net-Zero Energy Residential Test Facility at the National Institute of Standards and Technology (NIST), in Gaithersburg, Md. The new facility will be used to demonstrate that a traditional style home can produce as much energy from renewable sources as it needs annually to support a computer-simulated family of four.

Prior and after the ribbon cutting ceremony, you are invited to participate in tours of the Net-Zero Energy Residential Test Facility. Tours will run from 11:00 AM to 1:00 PM and 3:30 to 5:00 PM. Tours will start on the hour and half-hour. Attendees who wish to participate in a tour should RSVP with their tour time selection using the registration form.
