Draft VVSG Overview & Production Issues

August 17, 2007

John Wack
Software Diagnostics
And
Conformance Testing Division
Technical Guidelines Development Committee
August 18, 2007, Plenary Meeting

Outline

• Changes to the VVSG since the last meeting
• Remaining work post-Aug 17
• Plans for final presentation and posting of the VVSG
Changes to the VVSG from the last meeting

- Primarily, NIST responded to comments from TGDC members
  - Each subcommittee has posted their change log
  - All comments were discussed and addressed
- Format of the VVSG changed to improve usability and simplify
- Technical edits for consistency and plain language, more basic introductory material developed
- Spreadsheets of requirements cross-referenced to VVSG 2005 and TGDC resolutions
Final Document Production

• Depending on changes from today, this should take a minimum of 2-3 weeks
• Final reviews need to be conducted, cross-references resolved, final changes to introductory material to assist readability
• NIST expects to make some wording changes here or there to requirements for the purposes of improving clarity only
Final presentation plans

- NIST will post two formats of the final TGDC version:
  - final PDF, tagged for accessibility
  - HTML version of the VVSG

- NIST will include requirements spreadsheets and more introductory/FAQ-related material

- NIST is working on a small DB of requirements to assist in answering questions such as:
  - What are all the requirements that apply to e.g., epollbooks?
  - What requirements mention e.g., cryptography?
