Changes to SI/Innovation Class, Data Export, and Epollbook-related Requirements

John Wack
Computer Scientist
SI/Innovation Class
Conformance Clause Part 1 Chapter 2.7 Page 13

• Requirement for SI added to
  – Sub-requirement for IVVR/VVPR
  – New methods for achieving SI use Innovation Class

• Innovation class requirements mostly unchanged
• Informative text added to make clear
  – IVVR is required, of which VVPR is one type
  – New forms of IVVR may meet existing IVVR requirements in the VVSG
Data Export
Part 1 Chapter 6.6 Page 227

- Requirements for Data Export separated from Integratability
- Must export to a public format
  - Export to database no longer satisfies this requirement
- Public format to be documented, “open”
- Must include source code program for reading formatted data
- SHOULD requirement for using a common, consensus-based format for export
Technical Guidelines Development Committee  
August 17, 2007, Plenary Meeting  

Epollbook-related Requirements  
Part 1 Chapter 7.5.1 Page 244  

- Terminology changes:  
  - Credential Issuance – what an epollbook does  
  - Ballot Activation – what happens at the DRE  
- Epollbook protection of ballot secrecy strengthened  
- External connections to remote registration databases permitted  
  - Must use a firewall  
  - Switch to enable external connectivity must be secure
