A lot of manufacturers participate in the creation of your favorite products. Various U.S. companies supply the parts.

Many of these suppliers are small companies:
- 230k small manufacturers contribute to U.S. supply chains
- 42% of all U.S. manufacturing workers are employed by small manufacturers

Supply Chains are complex and include all of the companies that play a role in creating and delivering your products, from start to finish.

The Impact of Domestic Supply Chains
- 91% of executives are concerned about global supply disruptions

When U.S. manufacturers develop effective domestic supply chains, they can:
- Lower Production Costs
- Decrease Lead and Delivery Times
- Improve Profitability
- Reduce Inventory
- Spark Innovation
- Increase Efficiency
- Protect Intellectual Property
- Improve Quality and Reliability
- Diminish Risk
- Drive Exports
- Encourage Reshoring

How Manufacturers Can Improve Supply Chain Performance

Whether you’re a smaller manufacturer looking to join a supply chain or an OEM seeking to navigate the challenges of supply chain management, MEP has resources to help.
