# A Vendor's Approach to Patient Safety: Standards and Beyond

Ross Teague, Ph.D., Director User Experience

# Patient Safety Program Response

# Patient Safety and Risk - Proactive

Patient Safety Program

Allscripts UX Policy Council

Risk Management and HF

# Patient Safety Program

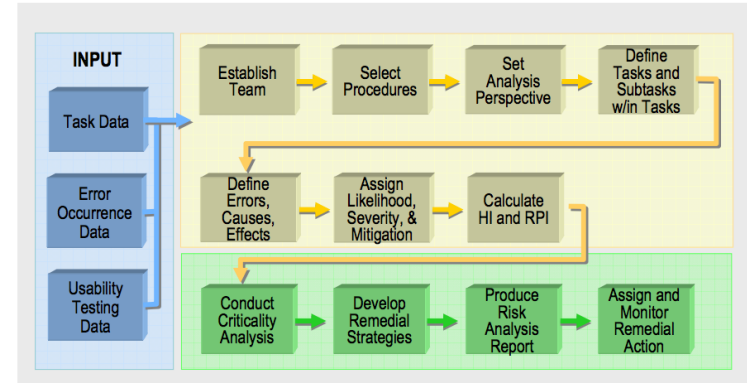

- Foster a Safety Culture
- Education and Training
  - Benefits & risks of health information technology (HIT)
  - Sociotechnical Model for HIT
- Patient Safety Council/Workgroup
  - Clinical leadership
  - Trend & research evaluation
  - Proactively mitigate future safety risk

# Allscripts UX Policy Council

- Cross business unit representation
- Approved policies: Date format, Patient identification, Color vision deficiency
- Use or based on existing standards (NIST, AAMI, SAFER)

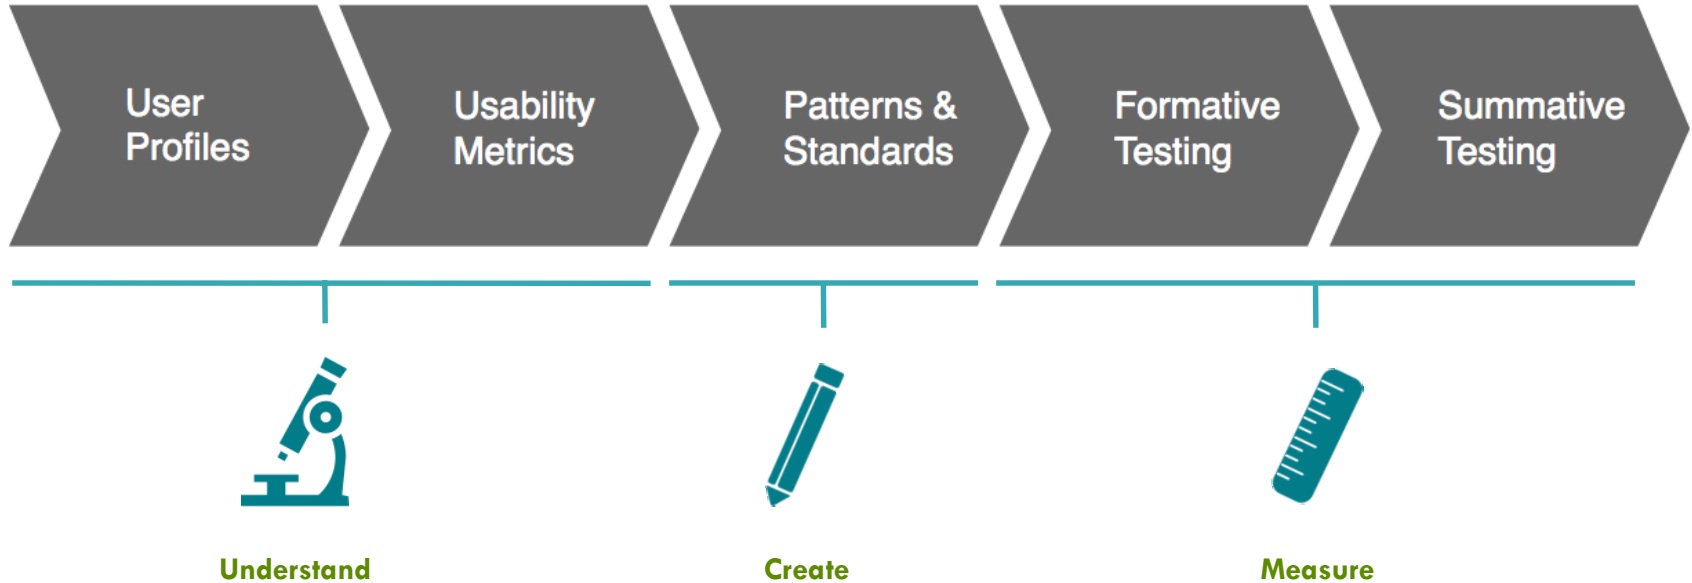

# Risk Management + HF

- Analytical methods
  - Task analysis, FMEA, HESRA
  - Errors, likelihood, severity
- *“Applying Human Factors and Usability Engineering to Medical Devices”*

Source: HESRA Process – Federal Aviation Administration

# Risk Management + HF

<http://landing.allscripts.com/allscriptsUCD.html>

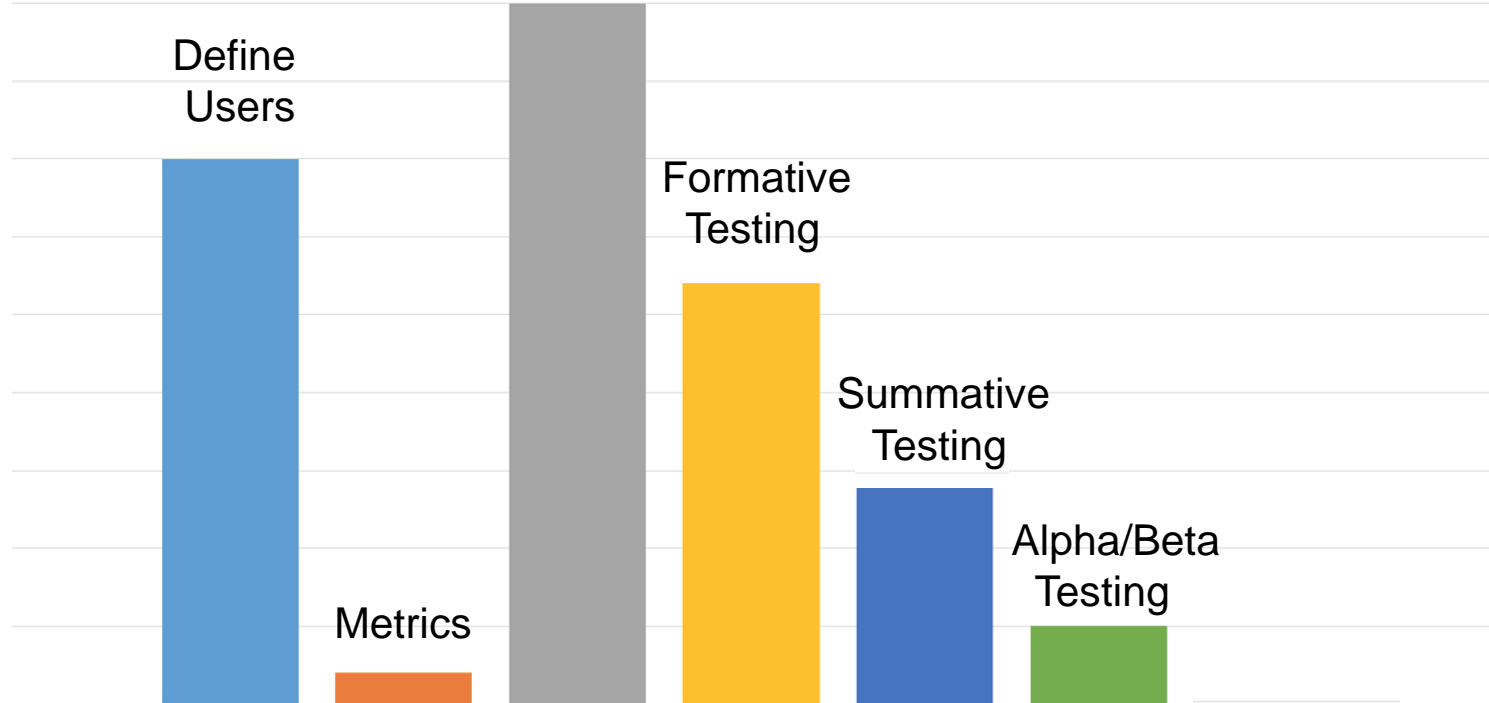

- Human-computer interaction
- Workflow and communication
- Clinical content
- Internal policies and procedures
- People
- HW and SW computing infrastructure
- External rules, regulations, and pressures
- System measurement and monitoring
