Subject: Short feedback on Cybersecurity Framework Draft Version 1.1

To: "[cyberframework@nist.gov](mailto:cyberframework@nist.gov)" <[cyberframework@nist.gov](mailto:cyberframework@nist.gov)>

Hi,

Attached a short feedback on Cybersecurity Framework Draft Version 1.1:

1. "Framework Core" -> I would recommended to use security strategic alignment or other common definition.

The framework should serve the business goals and not the opposite.

2. Framework Profile -> I would recommended to use Common Criteria definition (e.g. Protection Profile (PP)) or other definition, such as current state Vs. desired state.

3. Pages 22-23 - Measurement Type -> metrics Vs. Measure . I would recommended to sharp the meaning of each 'measurement type'.

4. Please consider to add to the reference chapter a reference to a 'full' Cyber Threat catalog.

Thanx

Thank you,

Yuval Sinay
