Subject: CSC Mappings
To: "cyberframework@nist.gov" <cyberframework@nist.gov>

Good morning,

I've noticed an issue in some of the mappings for the CSC references. For example, the [PR.AT](#) category lists CSC9 as a reference which is now the "Limitation and Control of Network Ports, Protocols, and Services". PR.DS is also mapped to CSC 17, which is now "Security Skills Assessment and Appropriate Training to Fill Gaps", it was previously "Data Protection"

It appears that some of these references are referring to the old SANS CSC list instead of the CIS CSC list.

Thanks,

Brendan Thommes
