Subject: NIST Cybersecurity Framework Update - comments
To: "cyberframework@nist.gov" <cyberframework@nist.gov>

Dear NIST,

First of all great work on giving one level up to the already well-established NIST CSF document.

Please find attached my comments and recommendations to the *Framework Version 1.1*.

In addition to the updates comments I am proposing to add two very important topics (more in the attachment):

1. IoT (Internet of Things)– needs to be added as it is considered more and more as nations critical infrastructure. We simply cannot miss the opportunity to at least mention that subject in new CSF version.
2. Process safety - Process safety focuses on major hazards impacting human life and health, environmental damage and business losses. Safety Instrumented Systems (SIS) are part of the ICS environment and are nowadays more and more often subject of attack therefore those should be also mentioned in the document.

Kind regards,
Piotr Ciepiela
