

National Advisory Committee on Windstorm Impact Reduction (NACWIR) Member

Katherine H. Greig, MBA, MALD
Deputy Director of Policy
New York City Mayors Office of Recovery and
Resiliency

Ms. Greig's expertise is in climate resilience and risk mitigation policy and planning. She holds a Master of Arts in Law and Diplomacy from Tufts University and a Master of Business Administration from Dartmouth College. Ms. Greig's experience implementing local resiliency policies and projects in a dense urban environment combine to allow for a unique perspective on turning windstorm science and engineering into policies and plans to help save lives and reduce property damage.

Ms. Greig is the Deputy Director for Policy-Buildings, in the NYC Mayor's Office of Recovery and Resiliency, where she coordinates a \$3.5B resiliency budget across many city agencies to make NYC's building stock more resilient to climate change and flood events. She is NYC's point-of-contact for the NYC Panel on Climate Change, and leads NYC's public and interagency outreach on climate change, risk exposure, and flood insurance changes.

Ms. Greig also worked as Senior Policy Advisor for the White House Hurricane Sandy Rebuilding Task Force. She led the development of the National Flood Insurance Program-related recommendations in a strategy document the Task Force submitted to the President. She also worked across agencies, for example with the Department of Housing and Urban Development, and the Federal Emergency Management Agency (FEMA) to build support for those recommendations.

Prior to working in the field of disaster risk mitigation and resiliency, she worked as a consultant with the Boston Consulting Group where she led a variety of strategy projects for a diverse range of companies in NYC and internationally.
