Subject: NIST: Review Completed - Framework for Improving Critical Infrastructure Cybersecurity Version 1.1 Draft 2; and Roadmap

All,

I have finished reviewing the Draft Framework for Improving Critical Infrastructure Cybersecurity Version 1.1 Draft 2, National Institute of Standards and Technology Revised December 5, 2017; and, the related Draft NIST Roadmap for Improving Critical Infrastructure Cybersecurity Version 1.1 December 5, 2017. Feedback was requested by January 19, 2018.

- Table 2 should incorporate mappings of HIPAA Security Rule standards and implementation specifications to the applicable NIST Cybersecurity Framework Subcategories. The mapping can be found in the document DHS Office for Civil, Rights HIPAA Security Rule Crosswalk to NIST Cybersecurity Framework v22 February 2016.
- I created a .docx (MS Word) version for you so those mappings can be cut and pasted into the final table. If you choose not to do so then the owners of that document will need to be informed that their documentation needs to be updated. It makes more sense/cost effective/etc. to have these cross references in one document and not have multiple agencies spending time and resources creating the same documentation.

ROADMAP

- I recommend that you add at least a reference to the NISTIR 8201, Internet of Things (IoT) Cybersecurity Colloquium (*A NIST Workshop Proceedings*) published December 22 2017.
- I recommend that you add at least a reference to the DHS Office for Civil Rights, HIPAA Security Rule Crosswalk to NIST Cybersecurity Framework v22 February 2016.

Please feel free to email or call me if you want to discuss or have me join additional reviews before the final versions are published in the next month or two.

Sincerely,

Dr. Rebecca Wynn, DHL, MBA, CRISC, CISSP, CASP
