

Summer High School Intern Program

Interested in scientific
research?
Spend your summer
at NIST!

- The National Institute of Standards and Technology offers unique research experiences that can set you apart from your college-bound peers.
- Students work with staff in physics, chemistry, biochemistry, materials science, engineering, mathematics, statistics, information technology, and computer science. Science at NIST focuses on measurement and advanced technology.
- Some past participants have been included as authors on scientific papers.
- SHIP takes place over eight weeks, 40 hours per week, during the summer months. It's an unpaid volunteer program for students who are high school juniors and seniors at the time of application.
- NIST is an MCPS Student Service Learning Site operating in Gaithersburg, MD and Boulder, CO.
