OSAC Registry Approved Standards
FY 2018

The Organization of Scientific Area Committees (OSAC) for Forensic Science Registry serves as a trusted repository of high-quality, science-based standards and guidelines that address discipline-specific forensic science needs. Documents posted on the OSAC Registry have been developed using a consensus-based process that allows participation and comment from all relevant stakeholders and have been assessed to be sound by forensic science practitioners, academic researchers, measurement scientists and statisticians.

The following 12 documents were effective on the OSAC Registry at the end of fiscal year 2018 (ending September 30, 2018):

Fire and Explosion Investigation

Materials (Trace)

Seized Drugs

Interdisciplinary

Replacements/Revisions During FY 2018:

• ASTM E2329-14 (effective January 27, 2016 – July 20, 2018) was replaced by ASTM E2329-17 on July 20, 2018.
