

DRAFT AGENDA

Time	Topic	Comments
DAY 1, December 5 – Why an RDaF?		
8:30-9:00	Continental Breakfast/Networking	
9:00-9:30	Welcome	Walter Copan, NIST Director, Welcome Chuck Romine, ITL Director (TBC); Setting the Framework context at NIST
9:30-9:45	Setting the stage	What are we trying to achieve at this workshop? What is different about the RDaF from the other NIST Frameworks? Who do we see as stakeholders and beneficiaries? What do we all want to see in Framework and why? How shall we proceed?
9:45-10:30	Understanding the Ecosystem: Stakeholder perspectives	This will be 5 flash talks (6 minutes) from different categories of stakeholders to tee up break-outs. Present who players are; how to engage them; why are they there; what's their role; sustainability/sustainability model. Six minutes each; no slides.
10:30-10:45	BREAK	
10:45-11:45	Break Out: Users and beneficiaries?	What would be the value of an RDaF Why would you would want a Framework. How could it be of value? (ideas like RDaF are expensive. Do we really know that? Realistic estimate of costs – could we explore that? Costs of not having it?) Explore users and beneficiaries; these maybe not the exact same. be?
11:45-12:30	Group Presentations and Discussion	RESULTS: 1) Who are users & beneficiaries 2) Use cases. 3) What stakeholder groups aren't here that should be included?
12:30-1:30	LUNCH	

1:30-2:15	Understanding Life Cycle: Stakeholder Perspectives		This will be 5 flash talks (6 minutes) from stakeholders who represent different functions in the data life cycle to tee up break-outs. Objective is to understand how the Framework might address layers or functions in the life cycle.
2:15-3:15	Break-outs: Applications		Taking a life cycle perspective What else do you want from an RDaF and identify additional use cases.
3:15-3:30	Break		
3:30-4:15	Group Presentations and Discussion		RESULTS: 1) What is wanted from and RDaF 2) Additional User Cases for a Framework
4:15-5:00	Open Discussion		Pick up themes or issues from the day for further discussion.
6:00-	Informal Networking/Group Dinners		Informal gathering at the open Bar in the Courtyard by Marriott Rockville 2500 Research Blvd, Rockville, MD 20850. Groups can self-organize for dinner at local restaurants.
DAY 2, December 6 -- What should be in it and how to develop it?			
8:30	Get your coffee		
8:40-9:00	Recap of Day 1		We've gained understanding of many perspectives and how it can be used and some use cases
9:00-10:00	Break out: What should be in an RDaF? Content, Components, and Elements		Pick 2-3 use cases to help guide thinking, but don't be restricted to them. Based on what we've heard and the use cases what should be in an RDaF? What components need to be included to come out supporting use cases and to deliver benefits.
10:00-10:45	Report out & discussion – Developing RDaF content.		Begin to develop a conceptual outline of an RDaF.
10:45-11:00	BREAK		
11:00-11:45	Break-out: Process. How should we go about it?		How should we proceed from here to complete the scoping study? (Provide the proposed steps?) Assuming a positive outcome of the scoping, what should be the next steps? What is proposed: 1) full scoping 2)Pilot in two disciplines 3)Full development? Who should be involved?
11:45-12:30	Group Presentations and Discussion		Each group should present 1) a path to take the workshop results and complete the scoping. Once the initial scoping is done, 2) what should be the steps to a final Framework and what would it take to get there.
12:30-1:00	Summary and wrap up		What have we heard and where will we go from here? What is the interest in continued involvement of participants?
1:00-3:00	Steering Group Meeting		The Steering Group will convene for a working lunch.
