Attachments: DLP1.pdf; Minsktch - the three patent solution.pdf; Triangle.pdf

Hey Jack, long time... New patents.

I turned Michael Lombardi and TMAS into a chip... (a20190377) Then I spiced it up by layering CRADA 1681 and CRADA 1727 atop it.

Then I expanded the GNSS services with an optical data Transport (a20200079) so powerful it's got an x-ray channel for space communications.

Finally, I pushed a full syntheticGNSS RF based service channel into it (a20200158/a20200044)).

All as a family of Belarus Patents... how about that sir?

Send DoT Karen Van Dyke my best...

//Todd Glassey, creator of Crada 1681, 1727, & 1809.
