General Comment

Any mandate of a paper-based voting system will inevitably harm voters with print disabilities as it would: 1.) end all voting system innovation and advancement to produce a fully accessible voting system that provides enhanced security; 2.) limit voters with disabilities' federal right to privately and independently verify and cast their ballots, and; 3.) ultimately segregate voters with disabilities.

Although paper-based ballot voting options have become the preferred voting system to people who believe mandating the use of paper ballots is necessary to ensure the security of elections, it must be made abundantly clear that the ability to privately and independently hand mark, verify, and cast a paper ballot is impossible for many voters with print disabilities.
