Subject: Recent GAO AI Accountability Framework
Date: Thursday, August 26, 2021 11:38:17 AM

Hello,

At the end of June, GAO issued its AI Accountability Framework ([Artificial Intelligence: An Accountability Framework for Federal Agencies and Other Entities | U.S. GAO](#)). Our framework is designed to assist federal program managers who oversee AI systems, as well as third-party auditors who assess AI systems.

A colleague of ours passed along information about your forthcoming AI Risk Framework, and we wanted to ensure that you are aware of our product as you develop the AI RMF. We look forward to seeing your final product – please feel free to reach out if you have any questions.

Best,
Dennis H Mayo, PhD
Senior Physical Scientist, STAA
Government Accountability Office
